However, the sudden murder of Malcolm's friend and right hand man, not only cause the homicide rate to shoot through the roof, but also derails their mission. 40 Days to Starting Over

Where are we heading? Stripped of all the hype and fantasy – where really is the world economy set to take us by 2040? Those of us alive today are on an extraordinary course: For several decades our future has largely been determined by a handful of relatively-obscure trends that together generate the awesome propulsion of a High-Tech engine that is

launching the international community on a voyage into completely unfamiliar territory. But where will we all end up? Based on unparalleled insights into what organizations across the globe are actually doing, for the first time the world's foremost expert on the hidden inner-workings of society explains in simple and accessible language exactly where the most deeply-established trends are taking us. How, despite claims that its accelerating progress is not sustainable for much longer, Digitization is on an inexorable course to a mind-blowing society of virtual-assistants, robot cars, cyborgs and everything on-the-record. And how Networking will combine with Digitization to lead by 2040 to computers capable of human-like interaction and an internet a billion times more powerful than today's. Dr. Scott-Morgan reveals how the Miniaturization trend offers nanotech breakthroughs ranging from cancer treatments to quantum computing – but not, as has often been claimed, Star-Trek Replicators or the threat of 'grey goo'. And he shows how exponential Simulation will support fundamental and sweeping advances that lead to almost limitless electricity and maybe almost limitless life-extension. Our world is set for a Global Renaissance. However, the backdraft of the High-Tech launch engine is also stirring up a turbulence of unintended consequences that threaten to disrupt our trajectory. Rather than Global Renaissance, we would then enter Global Chaos. Yet these are not ordinary times. In the startling conclusion to his book, Dr. Scott-Morgan reveals how in only the last couple of years a brand new exponential trend has begun to emerge out of the

turbulence. In terms of influencing our destination – whether we end up in a Global Renaissance or in Global Chaos – it is that trend that will be the most important one of all. NOTE: This is the companion volume to 'The Reality of Global Crises' by the same author.

Why do obviously intelligent people believe things in spite of the evidence against them? Will Storr has travelled across the world to meet an extraordinary cast of modern heretics in order to answer this question. He goes on a tour of Holocaust sites with David Irving and a band of neo-Nazis, experiences his own murder during 'past-life regression' hypnosis, takes part in a mass homeopathic overdose, and investigates a new disease affecting tens of thousands of people - a disease that doesn't actually exist. Using a unique mix of personal memoir, investigative journalism and the latest research from neuroscience and experimental psychology, Storr reveals why the facts just won't convince some people, and how the neurological 'hero-maker' inside all of us can so easily lead to self-deception and science-denial. The Heretics will change the way you think about thinking.

Popular anger against bankers and financial speculators has never been greater, yet the practical workings of the system remain opaque to many people. The Heretic's Guide to Global Finance aims to bridge the gap between

protest slogans and practical proposals for reform. As a stockbroker turned campaigner, Brett Scott has a unique understanding of life inside and outside the system. The Heretic's Guide to Global Finance is a practical handbook for campaigners, academics and students who wish to deepen their understanding of the inner workings of the financial sector. It shows how financial knowledge can be used to build effective social and environmental campaigns. Scott covers topics frequently overlooked, such as the cultural aspects of the financial sector, and considers major issues such as agricultural speculation, carbon markets and tar sands financing. The book shows how activists can use the internal dynamics of the

sector to reform it and showcases the growing alternative finance movement.

A religious cult has swept the globe. The cult demands strict adherence to its dogma. And the cult does not tolerate dissent. It is the cult of progressive environmentalism. In his new book, *In Global Warming We Trust*, author Tony Sadar warns that climate science has been seized by activists who put their political agenda ahead of scientific rigor and objectivity. Ideas have consequences. The leaders of the cult want us to spend a trillion dollars canceling the Industrial Revolution. With the backing of the United Nations, they are pushing a plan to reduce

worldwide carbon emissions, a move that if successful would relegate millions of people to lifelong poverty. Tony Sadar contends that before we turn the lights out on modernity, we need to critically examine the assumptions behind long-range climate forecasts and plans to alter the Earth's climate. He finds that today's climate science is driven more by self-righteousness than the time-tested science virtues of rigorous data, skeptical inquiry, and no-holds-barred debate. Sadar warns that climate science has become politicized and that activists' goals interfere with scientific judgment. He calls on the science community to put an end to the unprofessional and anti-science practices of calling skeptics of a controversial theory "deniers" and

"pseudoscientists." He shows that despite claims to the contrary, leading scientists do not agree on environmental policies. As an atmospheric science insider, Tony Sadar cautions that environmental policymakers place too much confidence in proxy data, computer models, and long-range climate forecasts and are too quick to accept claims that fossil fuels are inherently bad, that humans are destroying the planet, and that only immediate and drastic action can save the world. The book concludes with a call to action--a call to restore integrity and optimism to science.

While the world of political Islam continues to be dominated by acts of violence and a separatist agenda, there are signs of reform in the Arab Spring movement. Ayaan Hirsi Ali who has been at the forefront of the reform movement offers an analysis of what's happening and how it could happen faster. Around the world cracks are starting to appear in the world of political Islam. While its leaders remain strong and defiant and while it continues to be

characterized by separatism and an agenda of violence, a number of people have questioned its rigid stances - from Pakistani schoolgirl Malala Yousafzai to Amina Tyler, the activist who posed nude on Facebook to make a point about women's bodies belonging to themselves. Beyond that, political movements across the Middle East - the 'Arab Spring' protests - show that a number of Muslims are increasingly fed up by what they see as a system which is too inflexible, often corrupt and which prevents countries from getting ahead. Author Ayaan Hirsi Ali has long been an outspoken critic of political Islam, specifically its treatment of women. In her books she's told her own story and how she escaped the bonds of a strict Muslim upbringing. In this book she moves beyond the personal story to a more overtly political stance. While women remain her main concern she also addresses Islam's other problems - its emphasis on passivity, its hypocrisy about the modern world, its defensiveness when

criticized. Analysing the embryonic protest movements from around the world, she asks what it would take to achieve a reformation - and how long it will take.

The great thing about being Canadian is simply this: we don't take ourselves too seriously, which works out pretty well because no one else on the planet takes us seriously, either. If you're reading this book, there's a good chance you're a Canadian. But what does that mean? There are the stereotypical nods, such as politeness and apologizing, but there's so much more! To be honest, you've probably taken part in (or at least talked about) hockey, poutine, curling, canoes, health care, snowshoes, parkas, camping, beer, road work, Canadian Tire, Slurpees, moose, maple syrup, and Tim Hortons in the last 24 hours. "A Hoser's Guide to Canadian History" is your ticket to even more things "Canadian" that you may have missed during your water-cooler discussions, online chats, or your

seventeen-hour wait in the local emergency room. As you read this book, you'll discover new and exciting facts about Canada that simply weren't taught in school. As a History teacher, I found the need to spread the unvarnished truth of this great nation's past. People like Sir John "Eh" MacDonald, Tommy Douglas, and Pierre Trudeau all had a distinct impact on this great country of ours, and part of their stories are included in these pages. Even less-famous folks who helped to shape Canada got a mention: John Humphrey, Laura Secord, and Egerton Ryerson. (Yes, "Egerton" is a real name.) Canada has an exciting past, full of events that have brought us to where we are now. Like all countries, we have some things we'd like to forget, but most of those unpleasant moments happened because we had morons in Parliament, something that doesn't happen anymore. Canadians have no need to apologize for being nice, honest, and caring people. So, please enjoy this book, and if you don't, well, I'm sorry.
