What's Better Than Books A haunting, heartbreaking and unforgettable novel of a woman married to a man she can never love, and drawn to another who will capture her heart forever East Africa 1903:When eighteen year old Iris Johnson is forced to choose between marrying the frightful Lord Sidcup or a faceless stranger, Jeremy Lawrence, in a far-off land, she bravely decides on the latter. Accompanied by her chaperone, Miss Logan, Iris soon	discovers a kindred spirit who shares her thirst for knowledge. As they journey from Cambridgeshire to East Africa, Iris's eyes are opened to a world she never knew existed beyond the comforts of her family home. But when Iris meets Jeremy, she realizes in a heartbeat that they will never be compatible. He is cold and cruel, spending long periods of time on hunting expeditions and leaving Iris alone. Determined to make the best of her new life, Iris begins to adjust to her surroundings; the windswept plains of Nairobi, and the delightful sunbirds that visit her window every day. And when she meets Kamau, a school teacher, Iris finds her calling,	assisting him to teach the local children English. Kamau is everything Jeremy is not. He is passionate, kind and he occupies Iris's every thought. She must make a choice, but if she follows her heart, the price she must pay will be devastating. continues to guide women as they pass through life stages, to help men better understand the girls and women in their lives, and to illuminate the delicate emotional machinery of a love relationship. Why are women more verbal than men? Why do women remember details of fights that men can't remember at all? Why do women tend to form deeper bonds with their female friends than men do with their male counterparts? These and other questions have	stumped both sexes throughout the ages. Now, pioneering neuropsychiatrist Louann Brizendine, M.D., brings together the latest findings to show how the unique structure of the female brain determines how women think, what they value, how they communicate, and who they love. While doing research as a medical student at Yale and then as a resident and faculty member at Harvard, Louann Brizendine discovered that almost all of the clinical data in	existence on neurology, psychology, and neurobiology focused exclusively on males. In response to the overwhelming need for information on the female mind, Brizendine established the first clinic in the country to study and treat women's brain function. In <i>The Female Brain</i> , Dr. Brizendine distills all her findings and the latest information from the scientific community in a highly accessible book that educates women about their
