IPod: The Missing Manual Business Plus
This innovative study opens up a new area in sociological and urban studies: the aural experience of the social, mediated through mobile technologies of communication. Whilst we live in a world dominated by visual epistemologies of urban experience, Michael Bull argues that it is not surprising that the Apple iPod, a sound based technology, is the first consumer cultural icon of the twenty-first century. This book, in using the example of the Apple iPod, investigates the way in which we use sound to construct key areas of our daily lives. The author argues that the Apple iPod acts as an urban Sherpa for many of its users and in doing so joins the mobile army of technologies that many of us habitually use to accompany our daily lives. Through our use of such mobile and largely sound based devices, the book demonstrates how and why the spaces of the city are being transformed right in front of our ears.

Steve Jobs "O'Reilly Media, Inc."
New York Times, Wall Street Journal, and USAToday Bestseller Tony Fadell led the teams that created the iPod, iPhone and Nest Learning Thermostat and learned enough in 30+ years in Silicon Valley about leadership, design, startups, Apple, Google, decision-making, mentorship, devastating failure and unbelievable success to fill an encyclopedia. So that's what this book is. An advice encyclopedia. A mentor in a box. Written for anyone who wants to grow at work—from young grads navigating their first jobs to CEOs deciding whether to sell their company—Build is full of personal stories, practical advice and fascinating insights into some of the most impactful products and people of the 20th century. Each quick 5-20 page entry builds on the previous one, charting Tony's personal journey from a product designer to a leader, from a startup founder to an executive to a mentor. Tony uses examples that are instantly captivating, like the process of building the very first iPod and iPhone. Every chapter is designed to help readers with a problem they're facing right now—how to get funding for their startup, whether to quit their job or not, or just how to deal with the jerk in the next cubicle. Tony forged his path to success alongside mentors like Steve Jobs and Bill Campbell, icons of Silicon Valley who succeeded time

and time again. But Tony doesn't follow the Silicon Valley credo that you have to reinvent everything from scratch to make something great. His advice is unorthodox because it's old school. Because Tony's learned that human nature doesn't change. You don't have to reinvent how you lead and manage—just what you make. And Tony's ready to help everyone make things worth making.

INSIDE APPLE reveals the secret systems, tactics and leadership strategies that allowed Steve Jobs and his company to churn out hit after hit and inspire a cult-like following for its products. If Apple is Silicon Valley's answer to Willy Wonka's Chocolate Factory, then author Adam Lashinsky provides readers with a golden ticket to step inside. In this primer on leadership and innovation, the author will introduce readers to concepts like the "DRI" (Apple's practice of assigning a Directly Responsible Individual to every task) and the Top 100 (an annual ritual in which 100 up-and-coming executives are tapped a la Skull & Bones for a secret retreat with company founder Steve Jobs). Based on numerous interviews, the book offers exclusive new information about how Apple innovates, deals with its suppliers and is handling the transition into the Post Jobs Era. Lashinsky, a Senior Editor at Large for Fortune, knows the subject cold: In a 2008 cover story for the magazine entitled The Genius Behind Steve: Could Operations Whiz Tim Cook Run The Company Someday he predicted that Tim Cook, then an unknown, would eventually succeed Steve Jobs as CEO. While Inside Apple is ostensibly a deep dive into one, unique company (and its ecosystem of suppliers, investors, employees and competitors), the lessons about Jobs, leadership, product design and marketing are universal. They should appeal to anyone hoping to bring some of that Apple magic to their own company, career, or creative endeavor.
