“ This amazing new book . . . takes us on a journey through classic and contemporary philosophy powered by questions like ‘ What do we have the right to do? When is it okay to do this or that? ’ They explore punishment and authority and sex and gender and race and the nature of truth and knowledge and the existence of God and the meaning of life and Scott just does an incredible job. ”

—Ryan Holiday, *The Daily Stoic* Some of the best philosophers in the world gather in surprising places—preschools and playgrounds. They debate questions about metaphysics and morality, even though they ’ ve never heard the words and perhaps can ’ t even tie their shoes. They ’ re kids. And as Scott Hershovitz shows in this delightful debut, they ’ re astoundingly good philosophers. Hershovitz has two young sons, Rex and Hank.

From the time they could talk, he supported kids in their noticed that they raised philosophical questions and were determined to answer them. They re-created ancient arguments. And they advanced entirely new ones. That 's not unusual, Hershovitz says. Every kid is a philosopher. Following an agenda set by Rex and Hank, Hershovitz takes us on a fun romp through classic and contemporary philosophy, powered by questions like, Does Hank have the right to drink soda? When is it okay to swear? and, Does the number six exist? Hershovitz and his boys take on more weighty issues too. They explore punishment, authority, sex, gender, race, the nature of truth and knowledge, and the existence of God. Along the way, they get help from professional philosophers, famous and obscure. And they show that all of us have a lot to learn from listening to kids—and thinking with them. Hershovitz calls on us to

philosophical adventures. But more than that, he challenges us to join them so that we can become better, more discerning thinkers and recapture some of the wonder kids have at the world.

The Inner Philosopher Sounds True

What is art? What counts as an aesthetic experience? Does art have to be beautiful? Can one reasonably dispute about taste? What is the relation between aesthetic and moral evaluations? How to interpret a work of art? In *Conversations on Art and Aesthetics*, Hans Maes discusses

these and other key questions in aesthetics with ten world-leading philosophers of art. The exchanges are direct, open, and sharp, and give a clear account of these thinkers' core ideas and intellectual development. They also offer new insights into, and a deeper understanding of, contemporary issues in the philosophy of art.

Jean Francois-Revel, a pillar of French intellectual life in our time, became world famous for his challenges to

both Communism and Christianity. Twenty-seven years ago, his son, Matthieu Ricard, gave up a promising career as a scientist to study Tibetan Buddhism -- not as a detached observer but by immersing himself in its practice under the guidance of its greatest living masters. Meeting in an inn overlooking Katmandu, these two profoundly thoughtful men explored the questions that have occupied humankind throughout its history. Does life have meaning? What is consciousness? Is man free? What is the value of scientific and material progress? Why is there suffering, war, and hatred? Their conversation is not merely abstract: they ask each other questions about ethics, rights, and responsibilities, about

knowledge and belief, and they discuss frankly the differences in the way each has tried to make sense of his life. Utterly absorbing, inspiring, and accessible, this remarkable dialogue engages East with West, ideas with life, and science with the humanities, providing wisdom on how to enrich the way we live our lives.

The Meditations of Marcus Aurelius are treasured today--as they have been over the centuries--as an inexhaustible source of wisdom. And as one of the three most important expressions of Stoicism, this is an essential text for everyone interested in ancient religion and philosophy. Yet the clarity

and ease of the work's style are deceptive. Pierre Hadot, eminent historian of ancient thought, uncovers new levels of meaning and expands our understanding of its underlying philosophy. Written by the Roman emperor for his own private guidance and self-admonition, the Meditations set forth principles for living a good and just life. Hadot probes Marcus Aurelius's guidelines and convictions and discerns the hitherto unperceived conceptual system that grounds them. Abundantly quoting the Meditations to illustrate his analysis, the author allows Marcus Aurelius to speak directly to the reader. And Hadot unfolds for us the philosophical context of the Meditations, commenting on the philosophers Marcus Aurelius read and giving

special attention to the teachings of Epictetus, whose disciple he was. The soul, the guiding principle within us, is in Marcus Aurelius's Stoic philosophy an inviolable stronghold of freedom, the "inner citadel." This spirited and engaging study of his thought offers a fresh picture of the fascinating philosopher-emperor, a fuller understanding of the tradition and doctrines of Stoicism, and rich insight on the culture of the Roman empire in the second century. Pierre Hadot has been working on Marcus Aurelius for more than twenty years; in this book he distills his analysis and conclusions with extraordinary lucidity for the general reader.

A "heroic" biography of John Cage and his "awakening through Zen Buddhism" — "a kind of love story" about a brilliant American pioneer of the creative arts who transformed himself and his culture (The New York Times) Composer John Cage sought the silence of a mind at peace with itself—and found it in Zen Buddhism, a spiritual path that changed both his music and his view of the universe.

"Remarkably researched, exquisitely written," Where the Heart Beats weaves together "a great many threads of cultural history" (Maria Popova, Brain Pickings) to illuminate Cage's struggle to accept himself and his relationship with choreographer Merce Cunningham. Freed to be his own man, Cage originated exciting experiments that set him at the epicenter of a new avant-garde forming in the

1950s. Robert Rauschenberg, Jasper Johns, Andy Warhol, Yoko Ono, Allan Kaprow, Morton Feldman, and Leo Castelli were among those influenced by his 'teaching' and 'preaching.' Where the Heart Beats shows the blossoming of Zen in the very heart of American culture.

In this inspiring, soul-stirring memoir, Lawrence E. Carter Sr., founding dean of the Martin Luther King Jr. International Chapel,

shares his remarkable quest to experience King's "beloved community" and his surprising discovery in mid-life that King's dream was being realized by the Japanese Buddhist philosopher and tireless peace worker Daisaku Ikeda. Coming of age on the cusp of the American Civil Rights Movement, Carter was personally mentored by Martin Luther King Jr. and followed in his footsteps, first to get an advanced degree in theology at Boston University and then to teach and train a new generation of activists and ministers at King's alma mater, Morehouse College. Over the years, however, Carter was disheartened to watch the radical cosmic vision at the heart of King's message gradually diluted and marginalized. He found

himself in near despair—until the powerful dialogue between Carter and Ikeda gives hope and guidance to a new generation of reformers, activists, and visionaries. his remarkable encounter with the lay Buddhist association Soka Gakkai International and a life-changing meeting with Ikeda, its president. Carter knew that King had been inspired by Gandhi, a Hindu, and now Ikeda, a Buddhist, was showing him how King's message of justice, equality, and the fundamental dignity of life could be carried to millions of people around the world. What ensued was not a conversion but a conversation—about the essential role of interfaith dialogue, the primacy of education, and the value of a living faith to create a human revolution and realize at last Martin Luther King's truest dream of a global world house. In these dark and frustrating times,

between Carter and Ikeda gives hope and guidance to a new generation of reformers, activists, and visionaries.

In *Conversations on Consciousness*, Susan Blackmore interviews some of the great minds of our time, a who's who of eminent thinkers, all of whom have devoted much of their lives to understanding the concept of consciousness. The interviewees, ranging from major philosophers to renowned scientists, talk candidly with Blackmore about some of the key philosophical issues confronting us in a series of conversations that are revealing, insightful, and stimulating. They ruminate on the nature of consciousness (is it something apart from the brain?) and discuss if it is even possible to understand the human mind. Some of these thinkers say no, but most believe that we will pierce the mystery surrounding consciousness, and that neuroscience will provide the

key. Blackmore goes beyond the issue of consciousness to ask other intriguing questions: Is there free will? (A question which yields many conflicted replies, with most saying yes and no.) If not, how does this effect the way you live your life; and more broadly, how has your work changed the way you live? Paired with an introduction and extensive glossary that provide helpful background information, these provocative conversations illuminate how some of the greatest minds tackle some of the most difficult questions about human nature.

The prominent Buddhist religious leader and advocate for peace, Daisaku Ikeda, has placed dialogue at the centre of his efforts towards securing global justice and conflict resolution. However, far from constituting abstract plans for the future of the world, Ikeda's dialogues represent very concrete and focused activity. He concentrates on one significant individual (such as Joseph Rotblat, Linus Pauling and Mikhail

Gorbachev) at a time, or sometimes small groups, in order to attempt the transformation of thinking and society through intense discussion. This book offers detailed exploration of this crucial aspect of Ikeda's philosophy of peace.

Contributors examine topics such as: the background to Ikeda's dialogic thinking as found in the Lotus Sutra; Buddhism as a practical philosophy of dialogue; Ikeda's use of dialogue, specifically in the field of education; and dialogue in relation to the abolition of nuclear weapons. Ikeda's concept of dialogue emerges as a paradoxical movement towards common ground based on respectful difference. This study will appeal to students of peace, politics and modern Buddhism.

The Companion explores important philosophical issues concerning the practice of philosophy in the public sphere, how public philosophy relates to advocacy, philosophical collaborations with political activists, locations where public philosophy can be done, and

In this important book of Quaker spirituality, Jim Newby writes about his spiritual journey and the ways he has sought to navigate an increasingly complex world and understand his purpose in it. Each chapter within these parts concludes with queries to encourage readers to reflect upon their
