Is this book for you? Only if you are ready to look at all aspects of your life to release yourself from negative feelings and bad habits, and consequently manifest a happier and healthier life. You will learn the 4Rs (Recognize, Release, Replace, and Repeat) along with insight into other tools that can help make this process more fruitful and a little easier. The information contained in this book comes from my own personal and professional experience. I know the techniques work because I've seen them work in my life and in my clients' lives. We will look at problems and solutions from physical, mental, emotional, and spiritual perspectives so you can find the right balance of each component in your life. The information will be presented from spiritual and secular viewpoints because you can approach cleaning your mind's junk drawer either way, depending on your belief system. We know that the key to changing specific aspects of your life resides in you. The required concepts are simple, but making the necessary changes is not always easy and "quick fixes" are rarely permanent. The program presented in this book is not for anyone wanting a "quick fix" because the process requires a willingness to make any changes necessary to reach your desired goals. Once you put in the necessary time and effort, you will feel uplifted and know you are on the right path in life. At that point, and apparently, without effort, the right people and the right events will materialize in your life in a synchronistic manner. This will ultimately provide you with a functional "junk drawer of the mind" that will lead to your heart's desire and fulfillment. Deborah J. McKenna is a Licensed Clinical Professional Counselor, Certified Hypnotherapist, Board Certified Coach, and a Level II EMDR Specialist. She has over thirty years of experience in the counseling field, helping clients sift through the items in their mental "Junk Drawers" by using a variety of techniques to help them blaze new paths.

Wholeness and the Implicate Order Penguin

Who am I? Where did I come from? Where am I going? How am I going to get there? We've all asked these questions, but most of us have only gotten fuzzy answers, leading to a psychospiritual malaise of whatever. Society ignores the mythopoetic notion of destiny—the idea that we have contracted with the gods to have certain experiences on earth for our enlightenment and empowerment, and so for our lives purpose and meaning. Destiny Retrieval shows how to reverse destiny loss with shamanic practices like soul clearing, pathfinding, and signpost recognition. In this comprehensive exploration, author David Kowalewski uses cross-cultural research, scientific findings, field-tested protocols, and personal experiences to unpack this ancient practice. Find out how you can be a hero in your own mind and in your own reality by embarking on your destiny quest with the help of shamans and their spirit allies. You can learn the costs of a purposeless and meaningless life and discover how shamans can reverse malaise with destiny-retrieval practices from the ancient past. Using a variety of practices, this guide offers an in-depth examination of the ancient shamanic craft of retrieving destiny to restore purpose and meaning in life.

Mavericks of the Mind Anchor

A bold cartography of the inner landscape visible only to those experiencing altered states • Presents the psychedelic experience as an objective landscape that embodies the Other, rather than a subjective state of mind • Provides corroboration of phenomena encountered by those who venture into this domain Journeying into the invisible world

revealed by his use of the dissociative psychedelic DXM (dextromethorphan), Dan Carpenter found that what he experienced was not simply subjective sensations and psychological states but an objective world of familiar, if inordinately odd, landmarks and characters. The running diary he kept of these voyages recounts impressions of a landscape charted by other travelers into this Inner Space and includes descriptions of many of the same phenomena recorded by such mind travelers as Terence and Dennis McKenna, Alexander and Ann Shulgin, and others who have experienced the hive mind—the pool of all consciousness. Into this territory where expression is like chaos theory, where oddly symmetrical order manifests out of the seemingly anarchic swirl of images and events, the author ventures with the mind-set of a naturalist, accepting whatever might be rather than what he hopes he might find. What emerges is not a location crafted by subjective experience, but a landscape that embodies the Other and that represents a conscious state in which the barriers between the self and the not-self dissolve.

Invisible Forces and Powerful Beliefs Simon and Schuster

Stimulating and often startling discussions between three friends, all highly original thinkers: Rupert Sheldrake, controversial biologist, Terence McKenna, psychedelic visionary, and Ralph Abraham, chaos mathematician. Their passion is to break out of paradigms that retard our evolution and to explore new possibilities. Through challenge and synergy they venture where few have gone before, leading their readers on an exciting journey of discovery. Their discussions focus on the evolution of the mind, the role of psychedelics, skepticism, the psychic powers of animals, the structure of time, the life of the heavens, the nature of God, and transformations of consciousness. "Three fine thinkers take us plunging into the universe of chaos, mind, and spirit. Instead of leaving us lost, they bring us back with startling insights and more wonder than we knew we had."

—Matthew Fox, "Original Blessing and Sheer Joy" "A jam-session of the mind, an intellectual movable feast, an on-going conversation that began over twenty years ago and remains as lively and relevant today as it ever was. Sadly, Terence had to leave the conversation a little earlier than planned. But the appearance of this book of dialogues at this critical, historical juncture is a reaffirmation of the potency of the optimistic vision that the dialogues express." —Dennis McKenna, brother of the late Terence McKenna Rupert Sheldrake is a biologist and author of many books including "The Sense of Being Stared At, And Other Aspects of the Extended Mind." Ralph Abraham is a mathematician, one of the pioneers of chaos theory and the author of several books including "Chaos, Gaia, Eros: A Chaos Pioneer Uncovers the Three Great Streams of History." The late Terence McKenna was a scholar of shamanism, ethno-botanist, psychedelic researcher and author of many books including "Food of the Gods and True Hallucinations."

A study of the importance of psychedelic plants and drugs in religion and society • With contributions by Albert Hofmann, R. Gordon Wasson, Jack Kornfield, Terence McKenna, the Shulgins, Rick Strassman, and others • Explores the importance of academic and religious freedom in the study of psychedelics and the mind • Exposes the need for an organized spiritual context for entheogen use in order to fully realize their transformative and sacred value We live in a time when a great many voices are calling for a spiritual renewal to address the problems that face humanity, yet the way of entheogens—one of the oldest and most widespread means of attaining a religious experience—is forbidden, surrounded

by controversy and misunderstanding. Widely employed in traditional shamanic societies, entheogens figure prominently in the origins of religion and their use continues today throughout the world. They alter consciousness in such a profound way that, depending on the set and setting, they can produce the ultimate human experiences: union with God or revelation of other mystical realities. With contributions by Albert Hofmann, Terence McKenna, Ann and Alexander Shulgin, Thomas Riedlinger, Dale Pendell, and Rick Strassman as well as interviews with R. Gordon Wasson and Jack Kornfield, this book explores ancient and modern uses of psychedelic drugs, emphasizing the complementary relationship between science and mystical experience and the importance of psychedelics to the future of religion and society. Revealing the mystical-religious possibilities of substances such as psilocybin mushrooms, mescaline, and LSD, this book exposes the vital need for developing an organized spiritual context for their use in order to fully realize their transformative and sacred value. Stressing the importance of academic and religious freedom, the authors call for a revival of scientific and religious inquiry into entheogens so they may be used safely and legally by those seeking to cultivate their spiritual awareness.

Terence McKenna's Little Book of Selected Quotes Ronin Publishing

Cited by the L.A. Weekly as "the culture's foremost spokesman for the psychedelic experience," Terence McKenna is an underground legend as a brilliant raconteur, adventurer, and expert on the experiential use of mind-altering plants. In these essays, interviews, and narrative adventures, McKenna takes us on a mesmerizing journey deep into the Amazon as well as into the hidden recesses of the human psyche and the outer limits of our culture, giving us startling visions of the past and future.

How to Change Your Mind Penguin

An exploration of the emergence of a new psychedelic spirituality in the work of Philip K. Dick, Terence McKenna, and Robert Anton Wilson. A study of the spiritual provocations to be found in the work of Philip K. Dick, Terence McKenna, and Robert Anton Wilson, High Weirdness charts the emergence of a new psychedelic spirituality that arose from the American counterculture of the 1970s. These three authors changed the way millions of readers thought, dreamed, and experienced reality—but how did their writings reflect, as well as shape, the seismic cultural shifts taking place in America? In High Weirdness, Erik Davis—America's leading scholar of high strangeness—examines the published and unpublished writings of these vital, iconoclastic thinkers, as well as their own life-changing mystical experiences. Davis explores the complex lattice of the strange that flowed through America's West Coast at a time of radical technological, political, and social upheaval to present a new theory of the weird as a viable mode for a renewed engagement with reality.

The Only Dance There Is Penguin

This well-illustrated book allows anyone with common sense, a clean kitchen, and a closet shelf to grow bumper crops of mushrooms. Besides step-by-step guides to cultivating four species of psilocybin-containing mushrooms, the book offers a wealth of additional information, including an introduction to mushroom biology, a resource guide for supplies, advice on discreetly integrating psychedelic mushrooms into outdoor gardens, and insights into the traditional use of psilocybins in sacred medicine. Also included are appendices with a summary of all included recipes.

Sometimes illumination occurs spontaneously or, as Ram Dass experienced, in a heart-wrenching moment of opening. More commonly, it happens when we polish the mirror of the heart with daily practice—and see beyond the illusion of our

transient thoughts and emotions to the vast and luminous landscape of our true nature. For five decades, Ram Dass has explored the depths of consciousness and love and brought them to life as service to others. With *Polishing the Mirror*, he gathers together his essential teachings for living in the eternal present, here and now. Readers will find within these pages a rich combination of perennial wisdom, humor, teaching stories, and detailed guidance on Ram Dass' own spiritual practices, including: Bhakti Yoga—opening our hearts to unconditional love Practices for living, aging, dying, and embracing the natural flow of life Karma Yoga—how selfless service can profoundly transform us Working with fear and suffering as a path to grace and freedom Step-by-step guidance in devotional chant, meditation and mantra practice, and much more For those new to Ram Dass' teachings, and for those to whom they are old friends, here is this vanguard spiritual explorer's complete guide to discovering who we are and why we are here, and how to become beacons of unconditional love.

Entheogens and the Future of Religion Routledge

In this book, a remarkable group of scientists, physicians, philosophers, and theologians share profound insights into our deepest questions, and the invisible forces and powerful beliefs that shape us. The Invisible Landscape MIT Press

A collection of transformational, awe-provoking psychedelic experiences. In *Tripping*, Charles Hayes has gathered fifty narratives about unforgettable psychedelic experiences from an international array of subjects representing all walks of life—respectable Baby Boomers, aging hippies, young ravers, and accomplished writers such as John Perry Barlow, Anne Waldman, Robert Charles Wilson, Paul Devereux, and Tim Page. Taking a balanced, objective approach, the book depicts a broad spectrum of altered states, from the sublime to the terrifying. Hayes's supplemental essays provide a synopsis of the history and culture of psychedelics and a discussion of the kinetics of tripping. Specially featured is an interview with the late Terence McKenna, who was perhaps the preeminent psychedelic spokesperson of our time. A storehouse of astonishing, often otherworldly tales, *Tripping* is a compendium of forbidden memories that enables readers to trip vicariously or compare notes on their own experiences.

The Invisible Landscape Park Street Press

"Pollan keeps you turning the pages . . . cleareyed and assured." —New York Times A #1 New York Times Bestseller, New York Times Book Review 10 Best Books of 2018, and New York Times Notable Book A brilliant and brave investigation into the medical and scientific revolution taking place around psychedelic drugs—and the spellbinding story of his own life-changing psychedelic experiences When Michael Pollan set out to research how LSD and psilocybin (the active ingredient in magic mushrooms) are being used to provide relief to people suffering from difficult-to-treat conditions such as depression, addiction and anxiety, he did not intend to write what is undoubtedly his most personal book. But upon discovering how these remarkable substances are improving the lives not only of the mentally ill but also of healthy people coming to grips with the challenges of everyday life, he decided to explore the landscape of the mind in the first person as well as the third. Thus began a singular adventure into various altered states of consciousness, along with a dive deep into both the latest brain science and the thriving underground community of psychedelic therapists. Pollan sifts the historical record to separate the truth about these mysterious drugs from the myths that have surrounded them since the 1960s, when a handful of psychedelic evangelists inadvertently catalyzed a powerful backlash against what was then a promising field of

research. A unique and elegant blend of science, memoir, travel writing, history, and medicine, *How to Change Your Mind* is a triumph of participatory journalism. By turns dazzling and edifying, it is the gripping account of a journey to an exciting and unexpected new frontier in our understanding of the mind, the self, and our place in the world. The true subject of Pollan's "mental travelogue" is not just psychedelic drugs but also the eternal puzzle of human consciousness and how, in a world that offers us both suffering and joy, we can do our best to be fully present and find meaning in our lives.

The Evolutionary Mind Monkfish Book Publishing David Bohm was one of the foremost scientific thinkers and philosophers of our time. Although deeply influenced by Einstein, he was also, more unusually for a scientist, inspired by mysticism. Indeed, in the 1970s and 1980s he made contact with both J. Krishnamurti and the Dalai Lama whose teachings helped shape his work. In both science and philosophy, Bohm's main concern was with understanding the nature of reality in general and of consciousness in particular. In this classic work he develops a theory of quantum physics which treats the totality of existence as an unbroken whole. Writing clearly and without technical jargon, he makes complex ideas accessible to anyone interested in the nature of reality.

The classic guide to tapping the practical benefits of an age-old book of wisdom—revised to captivate today's spiritual seekers Based on the revered Chinese philosophy with a 5,000-year-old tradition, the I Ching, or Book of Changes, is rich in revelations. An eminent expert on the powers of the subconscious, Dr. Joseph Murphy opens the guiding force of this ancient text to anyone with an appreciation of the possibilities. With the help of three coins—ordinary pennies will do—readers will learn to apply their intuitive abilities to receive the I Ching's answers. With a practical outlook, this hands-on guide presents simple techniques for enlisting the I Ching's aid in everyday problem-solving and decision-making. Murphy explains the I Ching hexagram system, revealing its roots in human psychology and the principle of constant change. Demystifying obscure terms and symbols, the author leads the way to consulting the I Ching for clarity and guidance in times of confusion and crisis. By combining basic mathematical formulas with spiritual awareness, readers will realize the miracle-working potential of their own mind and connect with the I Ching's truths. As a result, they'll gain vital insights into questions about career, family, romance, financial security, and life goals. And they'll discover the wonder of genuine peace of mind. SECRETS OF THE I CHING, does not claim to predict the future. But it does provide the tools to mark any future with the promise of greater personal and spiritual fulfillment.

The Cluttered Mind The Invisible Landscape

Terence McKenna covers wide-ranging and profound topics in his uniquely witty style and rare depth of intelligence. Topics include: the "Stoned Ape" Theory of evolution, consciousness expansion, the purpose of history, extraterrestrial possibilities, interdimensional communication, the DMT trip experience, shamanic science, alchemy and Hermeticism, the Logos, the eschaton, and many other spectra.

The Evolutionary Mind Psychology Press

Three of the most original thinkers of our time explore issues that call into question our current views of reality, morality, and the nature of life. • A wide-ranging investigation of the ecology of inner and outer space, the role of chaos theory in the dynamics of human creation, and the rediscovery of traditional wisdom. In this book of "dialogues," the late psychedelic visionary and shamanologist Terence McKenna, acclaimed biologist and originator of the morphogenetic fields theory Rupert Sheldrake, and mathematician and chaos theory scientist Ralph Abraham explore the relationships between chaos and creativity and their connection to cosmic consciousness. Their observations call into question our current views of reality, morality, and the nature of life in the universe. The authors challenge the reader to the deepest levels of thought with wide-ranging investigations of the ecology of

inner and outer space, the role of chaos in the dynamics of human creation, and the resacralization of the world. Among the provocative questions the authors raise are: Is Armageddon a self-fulfilling prophecy? Are we humans the imaginers or the imagined? Are the eternal laws of nature still evolving? What is the connection between physical light and the light of consciousness? Part ceremony, part old-fashioned intellectual discussion, these dialogues are an invitation to a new understanding of what Jean Houston calls "the dreamscapes of our everyday waking life."

True Hallucinations Inner Traditions / Bear & Co Draws on cosmological phenomena of the modern world as well as the author's own research into shamanic and metaphysical belief systems to support the Mayan theory about an unprecedented global shift predicted for the year 2012.
