“ Pollan keeps you turning the pages . . . cleareyed and assured. ”  
—New York Times A #1 New York Times Bestseller, New York Times Book Review 10 Best Books of 2018, and New York Times Notable Book A brilliant and brave investigation into the medical and scientific revolution taking place around psychedelic drugs--and the spellbinding story of his own life-changing psychedelic experiences When Michael Pollan set out to research how LSD and psilocybin (the active ingredient in magic mushrooms) are being used to provide relief to people suffering from difficult-to-treat conditions such as depression, addiction and anxiety, he did not intend to write what is undoubtedly his most personal book. But upon discovering how these remarkable substances are improving the lives not only of the mentally ill but also of healthy people coming to grips with the challenges of everyday life, he decided to explore the landscape of the mind in the first person as well as the third. Thus began a singular adventure into various altered states of consciousness, along with a dive deep into both the latest brain science and the thriving underground community of psychedelic therapists. Pollan sifts the historical record to separate the truth about these mysterious drugs from the myths that have surrounded them since the 1960s, when a handful of psychedelic evangelists inadvertently catalyzed a powerful backlash against what was then a promising field of research. A unique and elegant blend of science, memoir, travel writing, history, and medicine, *How to Change Your Mind* is a triumph of participatory journalism. By turns dazzling and edifying, it is the gripping account of a journey to an exciting and unexpected new frontier in our understanding of the mind, the self, and our place in the world. The true subject of Pollan's "mental travelogue" is not just psychedelic drugs but

also the eternal puzzle of human consciousness and how, in a world that offers us both suffering and joy, we can do our best to be fully present and find meaning in our lives.

Terence McKenna's Little Book of Selected Quotes The Invisible Landscape

Stimulating and often startling discussions between three friends, all highly original thinkers: Rupert Sheldrake, controversial biologist, Terence McKenna, psychedelic visionary, and Ralph Abraham, chaos mathematician. Their passion is to break out of paradigms that retard our evolution and to explore new possibilities. Through challenge and synergy they venture where few have gone before, leading their readers on an exciting journey of discovery. Their discussions focus on the evolution of the mind, the role of psychedelics, skepticism, the psychic powers of animals, the structure of time, the life of the heavens, the nature of God, and transformations of consciousness. "Three fine thinkers take us plunging into the universe of chaos, mind, and spirit. Instead of leaving us lost, they bring us back with startling insights and more wonder than we knew we had."

-Matthew Fox, "Original Blessing and Sheer Joy" "A jam-session of the mind, an intellectual movable feast, an on-going conversation that began over twenty years ago and remains as lively and relevant today as it ever was. Sadly, Terence had to leave the conversation a little earlier than planned. But the appearance of this book of dialogues at this critical, historical juncture is a reaffirmation of the potency of the optimistic vision that the dialogues express." -Dennis McKenna, brother of the late Terence McKenna Rupert Sheldrake is a biologist and author of many books including "The Sense of Being Stared At, And Other Aspects of the Extended Mind." Ralph Abraham is a mathematician, one of the pioneers of chaos theory and the author of several books including "Chaos, Gaia, Eros: A Chaos Pioneer Uncovers the Three Great Streams of History." The late Terence McKenna was a scholar of shamanism, ethno-botanist,

psychedelic researcher and author of many books including "Food of the Gods and True Hallucinations."

A collection of transformational, awe-provoking psychedelic experiences. In *Tripping*, Charles Hayes has gathered fifty narratives about unforgettable psychedelic experiences from an international array of subjects representing all walks of life--respectable Baby Boomers, aging hippies, young ravers, and accomplished writers such as John Perry Barlow, Anne Waldman, Robert Charles Wilson, Paul Devereux, and Tim Page. Taking a balanced, objective approach, the book depicts a broad spectrum of altered states, from the sublime to the terrifying. Hayes's supplemental essays provide a synopsis of the history and culture of psychedelics and a discussion of the kinetics of tripping. Specially featured is an interview with the late Terence McKenna, who was perhaps the preeminent psychedelic spokesperson of our time. A storehouse of astonishing, often otherworldly tales, *Tripping* is a compendium of forbidden memories that enables readers to trip vicariously or compare notes on their own experiences.

A journey to some of the Earth's most endangered people in the remote Upper Amazon . . . a look at the rituals of the Bwiti cults of Gabon and Zaire . . . a field watch on the eating habits of 'stoned' apes and chimpanzees - these adventures are all a part of ethnobotanist Terence McKenna's extraordinary quest to discover the fruit of the Tree of Knowledge. He wonders why, as a species, we are so fascinated by altered states of consciousness. Can they reveal something about our origins as human beings and our place in nature? As an odyssey of mind, body and spirit, *Food of the Gods* is one of the most fascinating and surprising histories of consciousness ever

written. And as a daring work of scholarship and exploration, it offers an inspiring vision for individual fulfillment and a humane basis for our interaction with each other and with the natural world.

An exploration of the emergence of a new psychedelic spirituality in the work of Philip K. Dick, Terence McKenna, and Robert Anton Wilson. A study of the spiritual provocations to be found in the work of Philip K. Dick, Terence McKenna, and Robert Anton Wilson, High Weirdness charts the emergence of a new psychedelic spirituality that arose from the American counterculture of the 1970s. These three authors changed the way millions of readers thought, dreamed, and experienced reality—but how did their writings reflect, as well as shape, the seismic cultural shifts taking place in America? In High Weirdness, Erik Davis—America's leading scholar of high strangeness—examines the published and unpublished writings of these vital, iconoclastic thinkers, as well as their own life-changing mystical experiences.

Davis explores the complex lattice of the strange that flowed through America's West Coast at a time of radical technological, political, and social upheaval to present a new theory of the weird as a viable mode for a renewed engagement with reality.

Delve into the Magickal Side of I Ching Divination The Book of Changes (I Ching) is more than just an oracle--it is also an incredibly powerful tool for theoretical and practical magick and meditation. With this book, the magician can learn to use the primal elemental forces of the universe as they are revealed in the ancient Hexagrams. For the first time in a study of esoteric practices, Magick, Shamanism & Taoism provides the regular Chinese word-characters for the Hexagrams as well as representations of their archaic antecedents, based on the earliest known examples of Chinese calligraphy. This opens up the potential for creating interesting and authentic variants for talismanic magick. The I Ching is comparable to the well-known Qabalistic Tree of Life. Like the Qabalah, it comprises a "cosmic map" that seeks to define categories for all the possible permutations of elements and circumstances existing in the universal cycle of creation and destruction. Those familiar with the Qabalah will find this to be a perfect complementary system of universal symbols. This book is primarily concerned with the Book of Changes and its links to Taoism, the magickal practices of the Chinese Wu, and related schools of thought. My ambition has been to open up the I Ching so that it can be approached on several levels, all of which are important aspects of the overall whole. Whereas most books on the I Ching focus on the system's oracles as a means to divination, my work builds on that important base to include the potential for magickal rites and meditations, blending traditional ideas with contemporary experimentation. In this way, it allows for a greater personal appreciation and assimilation of the primal elemental forces that underpin the Trigrams and Hexagrams. In doing so, it not only describes

the basic tools appropriate for Chinese-style magick, but also explains the symbolism and esoteric theory behind their use. Parallels that I have drawn between Taoism and other worldviews such as shamanism, Ninjutsu, Shinto, Thelema, and Tantra help to broaden and explain fundamental occult concepts. Hexagram correspondences bring together interpretations of the figures with related symbols, gods, ritual instruments, and appropriate magickal workings in a way never before attempted in a work on the I Ching.

The Only Dance There Is Sounds True

A bold cartography of the inner landscape visible only to those experiencing altered states • Presents the psychedelic experience as an objective landscape that embodies the Other, rather than a subjective state of mind • Provides corroboration of phenomena encountered by those who venture into this domain Journeying into the invisible world revealed by his use of the dissociative psychedelic DXM (dextromethorphan), Dan Carpenter found that what he experienced was not simply subjective sensations and psychological states but an objective world of familiar, if inordinately odd, landmarks and characters. The running diary he kept of these voyages recounts impressions of a landscape charted by other travelers into this Inner Space and includes descriptions of many of the same phenomena recorded by such mind travelers as Terence and Dennis McKenna, Alexander and Ann Shulgin, and others who have experienced the hive mind--the pool of all consciousness. Into this territory where expression is like chaos theory,

where oddly symmetrical order manifests out of the seemingly anarchic swirl of images and events, the author ventures with the mind-set of a naturalist, accepting whatever might be rather than what he hopes he might find. What emerges is not a location crafted by subjective experience, but a landscape that embodies the Other and that represents a conscious state in which the barriers between the self and the not-self dissolve.

Mushrooms, Mankind, DMT, and Hyperspace Penguin  
Is this book for you? Only if you are ready to look at all aspects of your life to release yourself from negative feelings and bad habits, and consequently manifest a happier and healthier life. You will learn the 4Rs (Recognize, Release, Replace, and Repeat) along with insight into other tools that can help make this process more fruitful and a little easier. The information contained in this book comes from my own personal and professional experience. I know the techniques work because I've seen them work in my life and in my clients' lives. We will look at problems and solutions from physical, mental, emotional, and spiritual perspectives so you can find the right balance of each component in your life. The information will be presented from spiritual and secular viewpoints because you can approach cleaning your mind's junk drawer either way, depending on your belief system. We know that the key to changing specific aspects of your life resides in you. The required concepts are simple, but making the necessary changes is not always easy and "quick fixes" are rarely permanent. The program presented in this book is not for anyone wanting a "quick fix" because the process requires a willingness to make any changes necessary to reach your desired goals. Once you put in the necessary time and effort, you will feel uplifted and know you are on the right path in life. At that point, and apparently, without effort, the right people and the right events will materialize in your life in a synchronistic manner. This will ultimately provide you with a functional "junk drawer of the mind" that will lead to your heart's desire and fulfillment. Deborah J. McKenna is a Licensed Clinical Professional Counselor, Certified Hypnotherapist, Board Certified Coach, and a Level II EMDR Specialist. She has over thirty years of experience in the counseling field, helping clients sift through the items in their mental "Junk Drawers" by using a variety of techniques to help them blaze new

paths.

Throughout history, secret societies have played a crucial role in shaping events that have created our world. Only an inner circle of power elite know the full extent of the influence of the conspiracy. It is Paris, 1772, and Sigismundo Celine knows he is destined to play an important part in this history-behind-history. The masons, the English nobility, the Jacobites, the Rosicrucians, the ruling clique of pre-Revolution France: these are but a few of the factions involved in the machinations and intrigue in which Sigismundo has become enmeshed. Thrown into the Bastille, shot at, assaulted by assassins, tortured, and brutally interrogated, he knows only what he is and what he must do to become the one spoken of in the old texts. But what he doesn't know could kill him: the secret powers of Maria, the Italian beauty who has become an English Lady; the Irish fisherman, Moon, who stumbles across the inner workings of an unsuspected cult; and the question they keep asking: the identity of The Widow's Son.

Brotherhood of the Screaming Abyss: My Life with Terrence McKenna, is an autobiographical account of renowned ethnobotanist Dennis McKenna's childhood, his relationship with his brother, and the author's experiences with and reflections on

psychedelics, philosophy, and scientific innovation. Chronicling the McKenna brothers' childhood in western Colorado during the 1950s and 1960s, Dennis writes of his adolescent adventures including his first encounters with alcohol and drugs (many of which were facilitated by Terence), and the people and ideas that shaped them both. Brotherhood of the Screaming Abyss weaves personal narrative through philosophical ideas and tales of psychedelic experimentation. In this book, Dennis describes these inquiries with the wisdom of perspective. In his account of what has become known as "The Experiment at La Chorrera"-- which Terence documented in his own 1989 book, True Hallucinations -- Dennis describes how he had visions of merging mushroom and human DNA, the brothers' predictions for the future, and their evolving ideas about society and consciousness. He also offers an intellectual understanding of the hallucinogenic effects of high-dose psychedelic mushrooms and other psychedelic substances. Dennis, now world-renowned for this ethnobotanical work, describes in Brotherhood his early interests in cosmology and astrology, his sometimes rocky relationship with his older brother and how their paths diverged later in their lives. Dennis describes his academic career in between touching accounts of both his mother's and Terence's battles with cancer. In the 10th Anniversary edition of Brotherhood, Dennis reflects on scientific revelations, climate change, and the social and political crises of our time. The new edition also features both the original foreword by Luis Eduardo Luna and a new foreword by Dr. Bruce Damer. Brotherhood of the Screaming Abyss is a story about brotherhood, psychedelic experimentation, and the intertwining nature of science and myth.

“...a bizarre Internet phenomenon: an “immersive” online experience—part mystery, part game, part who knows what—known as both the Incunabula Papers and Ong’s Hat. The Incunabula Papers/Ong’s Hat was, or is, a “many-threaded, open-ended interactive narrative” that “weds an alternate history of chaos science and consciousness studies to conspiracy theories, parallel dimensions, and claims that computer-mediated environments can serve as magical tools.... the documents provoked a widespread “immersive legend-trip” in the late 1990s. Via Web forums, participants investigated the documents—manifestos—which spun up descriptions of brilliant but suppressed discoveries relating to paths that certain scientists had forged into alternate realities. Soon, those haunted dimensions existed in the minds and fantasies of Ong’s Hat’s many participants. That was evident as they responded to the original postings by uploading their own—all manner of reflections and artifacts: personal anecdotes, audio recordings, and videos—to augment what became “a really immersive world, and it was vast”.
