Sacred Mushrooms and the Law Springer  
A bold cartography of the inner landscape visible only to those experiencing altered

states • Presents the psychedelic experience as an objective landscape that embodies the Other, rather than a subjective state of mind

- Provides corroboration of phenomena encountered by those who venture into this domain

Journeying into the invisible world revealed by his use of the dissociative psychedelic DXM (dextromethorphan), Dan Carpenter found that what he experienced was not simply subjective sensations and psychological states but an objective world of familiar, if inordinately odd, landmarks and characters. The running diary he kept of these voyages recounts impressions of a landscape charted by other travelers into this Inner Space and includes descriptions of many of the same phenomena recorded by such mind travelers as Terence and Dennis McKenna, Alexander and Ann Shulgin, and others who have experienced the hive mind--the pool of all consciousness. Into this territory where expression is like chaos theory, where oddly symmetrical order

---

manifests out of the seemingly anarchic swirl of images and events, the author ventures with the mind-set of a naturalist, accepting whatever might be rather than what he hopes he might find. What emerges is not a location crafted by subjective experience, but a landscape that embodies the Other and that represents a conscious state in which the barriers between the self and the not-self dissolve.

*Sacred Mushrooms and the Law* is the only book covering the legal landscape underlying psychedelic mushrooms. All federal and state laws concerning mushrooms are covered, and charts outline potential punishments.

Stimulating and often startling discussions between three friends, all highly original thinkers: Rupert Sheldrake, controversial biologist, Terence McKenna, psychedelic visionary, and Ralph Abraham, chaos mathematician. Their passion is to break out of paradigms that retard our evolution and to explore new possibilities. Through challenge and synergy they venture where few have gone before, leading their readers on an exciting journey of discovery. Their discussions focus on the evolution of the mind, the role of psychedelics, skepticism, the psychic powers of animals, the structure of time, the life of the heavens, the nature of God, and transformations of consciousness.

“Three fine thinkers take us plunging into the universe of chaos, mind, and spirit. Instead of leaving us lost, they bring us back with startling insights and

more wonder than we knew we had.”

—Matthew Fox, *Original Blessing and Sheer Joy* "A jam-session of the mind, an intellectual movable feast, an on-going conversation that began over twenty years ago and remains as lively and relevant today as it ever was. Sadly, Terence had to leave the conversation a little earlier than planned. But the appearance of this book of dialogues at this critical, historical juncture is a reaffirmation of the potency of the optimistic vision that the dialogues express." —Dennis McKenna, brother of the late Terence McKenna Rupert Sheldrake is a biologist and author of many books including *The Sense of Being Stared At, And Other Aspects of the Extended Mind*. Ralph Abraham is a mathematician, one of the pioneers of chaos theory and the author of several books including *Chaos, Gaia, Eros: A Chaos Pioneer Uncovers the Three Great Streams of History*. The late Terence McKenna was a scholar of shamanism, ethno-botanist, psychedelic researcher and author of many books including *Food of the Gods and True Hallucinations*.

A collection of transformational, awe-provoking psychedelic experiences. Hayes's supplemental essays provide a synopsis of the history and culture of psychedelics and a discussion of the kinetics of tripping. Specially featured is an interview with the late Terence McKenna, who was perhaps the preeminent psychedelic spokesperson of our time. A storehouse of astonishing, often otherworldly tales, *Tripping* is a compendium of forbidden memories that enables readers to trip vicariously or compare notes on their own experiences.

*A Psychonaut's Guide to the Invisible Landscape* Routledge

A journey to some of the Earth's most endangered people in the remote Upper Amazon ... a look at the rituals of the Bwiti cults of Gabon and Zaire ... a field watch on the eating habits of 'stoned' apes and chimpanzees - these adventures are all a part of ethnobotanist Terence McKenna's extraordinary quest to discover the fruit of the Tree of Knowledge. He wonders why, as a species, we are so fascinated by altered states of consciousness. Can they reveal something about our origins as human beings and our place in nature? As an odyssey of mind, body and spirit, *Food of the Gods* is one of the most fascinating and surprising histories of consciousness ever written. And as a daring work of scholarship and exploration, it offers an inspiring vision for individual fulfilment and a humane basis for our interaction with each other and with the natural world.

Sometimes illumination occurs spontaneously or, as Ram Dass experienced, in a heart-wrenching moment of opening. More commonly, it happens when we polish the mirror of the heart with daily practice—and see beyond the illusion of our transient thoughts and emotions to the vast and luminous landscape of our true nature. For five decades, Ram Dass has explored the depths of consciousness and love and brought them to life as service to others. With *Polishing the Mirror*, he gathers together his essential teachings for living in the eternal present, here and now. Readers will find within these pages a rich combination of perennial wisdom, humor, teaching stories, and detailed guidance on Ram Dass' own spiritual practices, including: Bhakti Yoga—opening our hearts to unconditional love Practices for living, aging, dying, and embracing the natural flow of life Karma Yoga—how selfless service can profoundly transform us Working with fear and suffering as a path to grace and freedom Step-by-step guidance in devotional chant, meditation and mantra practice, and much more For those new to Ram Dass' teachings, and for those to whom they are old friends, here is this vanguard

*Brotherhood of the Screaming Abyss: My Life with Terence McKenna*, is an autobiographical account of renowned ethnobotanist Dennis McKenna's childhood, his relationship with his brother, and the author's experiences with and reflections on psychedelics, philosophy, and scientific innovation. Chronicling the McKenna brothers' childhood in western Colorado during the 1950s and 1960s, Dennis writes of his adolescent adventures including his first encounters with alcohol and drugs (many of which were facilitated by Terence), and the people and ideas that shaped them both. *Brotherhood of the Screaming Abyss* weaves personal narrative through philosophical ideas and tales of psychedelic experimentation. In this book, Dennis describes these inquiries with the wisdom of perspective. In his account of what has become known as "The Experiment at La Chorrera"—which Terence documented in his own 1989 book, *True Hallucinations*—Dennis describes how he had visions of

merging mushroom and human DNA, the brothers' predictions for the future, and their evolving ideas about society and consciousness. He also offers an intellectual understanding of the hallucinogenic effects of high-dose psychedelic mushrooms and other psychedelic substances. Dennis, now world-renowned for this ethnobotanical work, describes in *Brotherhood* his early interests in cosmology and astrology, his sometimes rocky relationship with his older brother and how their paths diverged later in their lives. Dennis describes his academic career in between touching accounts of both his mother's and Terence's battles with cancer. In the 10th Anniversary edition of *Brotherhood*, Dennis reflects on scientific revelations, climate change, and the social and political crises of our time. The new edition also features both the original foreword by Luis Eduardo Luna and a new foreword by Dr. Bruce Damer. *Brotherhood of the Screaming Abyss* is a story about brotherhood, psychedelic experimentation, and the intertwining nature of science and myth.

This book is based on talks by Ram Dass at the Menninger Foundation in 1970 and at the Spring Grove Hospital in Maryland in 1972. The text grew out of the interaction between Ram Dass and the spiritual seekers in attendance at these talks. The result of this unique exchange is a useful guide for understanding the nature of consciousness--useful both to other spiritual seekers and to formally trained psychologists. It is also a celebration of the Dance

of Life--which, in the words of Ram Dass, is the "only dance there is."

Three of the most original thinkers of our time explore issues that call into question our current views of reality, morality, and the nature of life. • A wide-ranging investigation of the ecology of inner and outer space, the role of chaos theory in the dynamics of human creation, and the rediscovery of traditional wisdom. In this book of "trialogues," the late psychedelic visionary and shamanologist Terence McKenna, acclaimed biologist and originator of the morphogenetic fields theory Rupert Sheldrake, and mathematician and chaos theory scientist Ralph Abraham explore the relationships between chaos and creativity and their connection to cosmic consciousness. Their observations call into question our current views of reality, morality, and the nature of life in the universe. The authors challenge the reader to the deepest levels of thought with wide-ranging investigations of the ecology of inner and outer space, the role of chaos in the dynamics

---

of human creation, and the resacralization of the world. Among the provocative questions the authors raise are: Is Armageddon a self-fulfilling prophecy? Are we humans the imaginers or the imagined? Are the eternal laws of nature still evolving? What is the connection between physical light and the light of consciousness? Part ceremony, part old-fashioned intellectual discussion, these dialogues are an invitation to a new understanding of what Jean Houston calls "the dreamscapes of our everyday waking life."

An exploration of the emergence of a new psychedelic spirituality in the work of Philip K. Dick, Terence McKenna, and Robert Anton Wilson. A study of the spiritual provocations to be found in the work of Philip K. Dick, Terence McKenna, and Robert Anton Wilson, *High Weirdness* charts the emergence of a new psychedelic spirituality that arose from the American counterculture of the 1970s. These three authors changed the way millions of readers thought, dreamed, and experienced reality—but how did their writings reflect, as well as shape, the seismic cultural shifts taking place in America? In *High Weirdness*, Erik Davis—America's leading scholar of high strangeness—examines

the published and unpublished writings of these vital, iconoclastic thinkers, as well as their own life-changing mystical experiences. Davis explores the complex lattice of the strange that flowed through America's West Coast at a time of radical technological, political, and social upheaval to present a new theory of the weird as a viable mode for a renewed engagement with reality.
