The Java Programming Language 5th
Java is one of the best programming languages for development. The popularity and usage of Java are still increasing even after two decades which is a big time for any Programming language. There are only a few programming languages which seem hard to get replaced and Java is one of them. Here are 5 reasons why Java is the best programming ...

Fifth-generation programming language - Wikipedia

Scala (programming language) - Wikipedia
This is the 5th edition of Murach's classic Java book that's trained thousands of developers in the last 15 years. Now fully updated to Java 9, this book helps any programmer learn Java faster and better than ever before: [[It's the one Java book that presents object-oriented features like inheritance, interfaces, and polymorphism in a way that's both understandable and useful in the real world.

In 2004, generics
were added to the
Java language, as
part of J2SE 5.0.
Prior to the
introduction of
generics, each
variable declaration
had to be of a
specific type. For
container classes,
for example, this is
a problem because
there is no easy
way to create a
container that
accepts only
specific types of
objects.
