We live in a visual  
age. Images and

visual artefacts shape campaigns. Other international events and our understanding of them. Photographs, film and television influence how we view and approach phenomena as diverse as war, diplomacy, financial crises and election visual fields, from art and cartoons to maps, monuments and videogames, frame how politics is perceived and enacted. Drones, satellites and surveillance cameras watch us around the clock and deliver

---

images that are then put to political use. Add to this that new technologies now allow for a rapid distribution of still and moving images around the world. Digital media platforms, such as Twitter, YouTube, Facebook and Instagram, play an important role across the political spectrum, from terrorist recruitment drives to social justice campaigns. This book offers the first comprehensive engagement with the visual global politics. Written by leading experts in numerous scholarly disciplines and presented in accessible and engaging language, Visual Global

Politics is a one-stop source for students, scholars and practitioners interested in understanding the crucial and persistent role of images in today ' s world. Performance Artists Talking in the Eighties John Wiley & Sons Bestselling author of Broken Ground “ offers fascinating glimpses ” into the real world of criminal forensics from its beginnings to the modern day (The Boston Globe). The dead can tell us all about themselves: where they came from, how they lived, how they died, and, of

course, who killed them. Using the messages left by a corpse, a crime scene, or the faintest of human traces, forensic scientists unlock the mysteries of the past and serve justice. In Forensics, international bestselling crime author Val McDermid guides readers through this field, drawing on interviews with top-level professionals, ground-breaking research, and her own experiences on the scene. Along the way, McDermid discovers how maggots collected from a corpse can help determine one ' s time of death; how a DNA

---

trace a millionth the size of a grain of salt can be used to convict a killer; and how a team of young Argentine scientists led by a maverick American anthropologist were able to uncover the victims of a genocide. Prepare to travel to war zones, fire scenes, and autopsy suites as McDermid comes into contact with both extraordinary bravery and wickedness, tracing the history of forensics from its earliest beginnings to the cutting-edge science of the modern day. The End of Books--or

Books Without End? Penguin  
Rufus Takes It Slow is a story about a tortoise going on a grand adventure in the great outdoors. This children's book is for ages two to ten, maybe even for some adults, considering it's a story with a moral. The story is heavily themed on nature, and the beauty that there is to behold in the world, featuring a combination of caricatures and photos taken from Tahoe, Montana, and the city of Santa Cruz. It is an adventure about learning to take a step back and smell the roses. Lots of colorful animals will make appearances in this tale. Creatures of the sky such as an owl, and a bird, to critters that roam around on the ground like a

rabbit, squirrel, snails, and even an armadillo with big red shoes.

The Jigsaw Man  
Routledge  
The Second Edition of this classic work has been thoroughly updated and revised with an additional chapter providing a powerful rebuttal to The Bell Curve. Ronald J Samuda presents a

---

comprehensive analysis of the perspectives, pitfalls, fallacies, issues, consequences and trends in the use of standardized norm-referenced tests with American minorities. He demonstrates that testing continues to be the primary method for injecting pseudoscientific arguments which bolster discrimination, prejudice and social injustice.

**Picking Up the Pieces**

Cambridge University Press

'For those of us who play by the rule book, few things are more fascinating and rankling than those who choose to tear it apart. Some of the stories I tell here are heart-breaking, others enraging and some plain weird but what connects them is the insight they give us into the human condition.'

Kerry Daynes has worked with some of the

most complex and challenging criminals in prisons and secure hospitals as well as the victims of crime. A large part of her day job is spent delving into the psyche of convicted men and women to try to understand what lies behind their actions and how to set them on the path to becoming law-abiding citizens. The true story of one of the most devastating wildfires in Australian history and the search for the man who started it. On the scorching February day in 2009, a man lit two fires in the Australian state of Victoria, then sat on the roof of his house to watch the inferno. What came to be known as the Black Saturday bushfires killed 173 people and injured hundreds more, making them among the deadliest and most destructive wildfires in Australian history. As communities reeling from the unspeakable loss demanded answers, detectives scrambled to piece together what really happened. They soon began to suspect the fires had been deliverately set by an arsonist. The Arsonist takes readers on the hunt for this man, and inside the puzzle of his mind. But this book is also the story of fire in the Anthropocene. The command of fire has defined and sustained us as a species, and now, as climate change normalizes devastating wildfires worldwide, we must contend with the forces of inequality, and desperate yearning for power, that can lead to such destruction. Written with Chloe Hooper's trademark lyric detail and nuance, *The Arsonist* is a reminder that in the age of fire, all of us are gatekeepers. *Talking with Serial Killers* Page Publishing Inc In this book, renowned

---

profiler Dr. Richard Kocsis presents a distinct approach to profiling called Crime Action Profiling or CAP. The volume explains the scope and methodology employed in the studies that the author has undertaken over the past decade and a half. CAP adopts the view that profiling essentially represents a psychological technique that has its foundations in the disciplinary knowledge of forensic psychology.

Women Who Bash/Love Men  
Random House Australia  
In 1994, Stefanie Hinrichs dreamed of owning a horse, leaving school and marrying Keanu Reeves. But God had other plans for the teenager. Her family belonged to a controversial Doomsday cult led by self-proclaimed Messiah William Kamm, also known as the 'Little Pebble', who was building

a new promised land for his followers deep in the Australian bush. Stefanie was forced to become the false prophet's child bride - one of eighty-four mystical spouses chosen by the Lord to bear twenty-seven children for his new heavenly dynasty. Forbidden from telling anyone about the illicit sexual relationship, she kept a diary.

responsible. This book looks at "offender profiling" that helps the police to identify and track individual criminals by the nature of their crime. Streets with a Story Random House Pyotr Ilyich Tchaikovsky's life - and premature death - has long been mythologised and misunderstands tood. John Suchet draws back the curtain to show us the real man behind the music. A shy,

---

emotional child, Tchaikovsky came late to composing as a career. Doubting himself at every turn and keenly wounded by criticism, he went on to become one of the world's best-loved composers. Yet behind the success lay sadness: the death of his mother haunted him all his life, while his incessant attempts to suppress his homosexuality took a huge

toll. From his disastrous marriage to his extraordinary relationship with his female patron, his many amorous liaisons and his devotion to friends and family, Suchet shows us how the complexity of Tchaikovsky's emotional life plays out in his music. Long hidden behind sanitised depictions by his brother and the Russian authorities, Tchaikovsky:

The Man Revealed examines the complex and contradictory character of this great artist, and how he came to take his rightful place among the world's greatest composers. **Mindhunter** HarperCollins UK "J. An investigative criminologist , Christopher Berry-Dee is a man who

talks to serial killers. Their pursuit of horror and violence is described in their own words, transcribed from audio and videotape interviews conducted deep inside some of the toughest prisons in the world. Berry-Dee describes the circumstances of his meetings with some of the world's most evil men and reproduces, verbatim, their very

words as they describe their crimes and discuss their remorse -- or lack of it. This work offers a penetrating insight into the workings of the criminal mind.
