My name is Duncan Capicchiano and over the last 8 years, I have had a special interest in kidney disease because one of my beloved family members, my wife's Nanna, was diagnosed with advanced kidney failure without warning. Once I was over the shock ... love and compassion drove me to research night and day ... investigating ancient remedies through to modern science, finally developing a 100% guaranteed solution that works. Kidney disease sufferers who diligently follow the step-by- step strategies in this system are having astounding results. And ... Nanna was my first extremely grateful patient. The smile on her face and the joy in her voice when she told us how well she was feeling after following my recommendations was worth all the sleepless nights and researcher frustration I experienced in finding this kidney disease solution.

 A revolutionary program that can indefinitely postpone the need for dialysis. If you've been diagnosed with kidney failure, this book could save your life. If you suffer from diabetes, hypertension, obesity, or any of a host of conditions that put you at risk for kidney disease, you owe it to yourself to read what is in this book. If you are among the 60,000 North Americans who go on dialysis each year, the information in this book could substantially improve your quality of life. In *Coping with Kidney Disease*, a leading expert tells you, in plain English, what you need to know to: * Understand kidney failure * Recognize early warning signs of kidney failure * Get a proper diagnosis * Talk with your doctors about it * Confidently evaluate treatment options * Take charge of your treatment * Delay dialysis or even avoid the need for it altogether The centerpiece of *Coping with Kidney Disease* is Dr. Walser's revolutionary 12-step program for avoiding dialysis.

Based on treatments he has pioneered with his own patients at the Johns Hopkins University School of Medicine, the program calls for a supplemented low-protein diet supported by treatments to control blood pressure and correct high cholesterol. So effective has this breakthrough strategy proven to be that in many patients it actually worked to slow or arrest the progression of kidney failure to the end stage. Knowledge is power. Coping with Kidney Disease empowers you with what you need to take charge of kidney disease.
