The challenges to humanity posed by the digital future, the first detailed examination of the unprecedented form of power called "surveillance capitalism," and the quest by powerful corporations to predict and control our behavior. In this masterwork of original thinking and research, Shoshana Zuboff provides startling insights into the phenomenon that she has named surveillance capitalism. The stakes could not be higher: a global architecture of behavior modification threatens human nature in the twenty-first century just as industrial capitalism disfigured the natural world in the twentieth. Zuboff vividly brings to life the consequences as surveillance capitalism advances from Silicon Valley into every economic sector. Vast wealth and power are accumulated in ominous new "behavioral futures markets," where predictions about our behavior are bought and sold, and the production of goods and services is subordinated to a new "means of behavioral modification." The threat has shifted from a totalitarian Big Brother state to a ubiquitous digital architecture: a "Big Other" operating in the interests of surveillance capital. Here is the crucible of an

unprecedented form of power marked by extreme concentrations of knowledge and free from democratic oversight. Zuboff's comprehensive and moving analysis lays bare the threats to twenty-first century society: a controlled "hive" of total connection that seduces with promises of total certainty for maximum profit -- at the expense of democracy, freedom, and our human future. With little resistance from law or society, surveillance capitalism is on the verge of dominating the social order and shaping the digital future -- if we let it.

Since Kate Beaton appeared on the comics scene in 2007 her cartoons have become fan favourites and gathered an enormous following, appearing in the *New Yorker*, *Harper* and the *LA Times*, to name but a few. Her website, *Hark! A Vagrant*, receives an average of 1.2 million hits a month, 500 thousand of them unique. Why? Because she's not just making silly jokes. She's making jokes about everything we learned in school, and more. Praised for their expression, intelligence and comic timing, her cartoons are best known for their wonderfully light touch on historical and literary topics. The jokes are a knowing look at history through a very modern perspective, written for every reader, and are a crusade against anyone with the idea that history is boring. It's pretty hard to argue with that when you're laughing your head off at a comic about Thucydides. They also cover whatever's on her mind that week - be it the perils of city living or the pop-cultural infiltration of *Sex and the City*, featuring an array of characters, from a mischievous pony, to reinvented superheroes, to a surly teen duo who could be the anti-Hardy-Boys. Perceptive, sharp and wonderfully irreverent, *Hark! A Vagrant* is as informative as it is hilarious, and a comic collection to treasure.

Ice-Candy-Man Eye Books (US&CA)

Between 1981 and 1989 in Wroclaw Poland, in an atmosphere in which dissent was forbidden and martial law a reality, the art-activist Orange Alternative movement developed and deployed their 'socialist surrealism' in absurd street-painting and large-scale performances comprising tens of thousands of people dressed as dwarves, in an effort to destabilize the Communist government. It worked. Beginning with the 'dialectical painting' of dwarves onto the patches of white paint all over the city's walls, which uncannily marked the censorship of opposition slogans, the group moved on to both stage happenings and over-enthusiastically embrace official Soviet festivals in a way that transformed both of these into mass expressions of dissent. They illegally restaged the mass spectacle of the storming of the Winter Palace on the anniversary of the October Revolution using their own homemade tanks; organized patriotic gatherings in which anyone waving red flags or wearing red (or eating red borscht, or covering oneself in ketchup) was arrested; and inspired other Orange Alternative groups to appear across the country. Although the group existed to the left of the mainstream opposition of Solidarity, their art was a key, acknowledged factor in the overthrow of the Communist government. Lives of the Orange Men tells the story of the movement's main protagonists, and is the first stand-alone English-language account of the Orange Alternative, written autobiographically by its central figure, and featuring an appendix of newly-translated key texts including Major's 'Manifesto of Socialist Surrealism', a timeline of every Orange Alternative happening and a new foreword from the Yes Men.

“ New Dark Age is among the most unsettling and illuminating books I ’ ve read about the Internet, which is to say that it is among the most unsettling and illuminating books I ’ ve read about contemporary life. ” — New Yorker As the world around us increases in technological complexity, our understanding of it diminishes. Underlying this trend is a single idea: the belief that our existence is understandable through computation, and more data is enough to help

us build a better world. In reality, we are lost in a sea of information, increasingly divided by fundamentalism, simplistic narratives, conspiracy theories, and post-factual politics. Meanwhile, those in power use our lack of understanding to further their own interests. Despite the apparent accessibility of information, we ’ re living in a new Dark Age. From rogue financial systems to shopping algorithms, from artificial intelligence to state secrecy, we no longer understand how our world is governed or presented to us. The media is filled with unverifiable speculation, much of it generated by anonymous software, while companies dominate their employees through surveillance and the threat of automation. In his brilliant new work, leading artist and writer James Bridle surveys the history of art, technology, and information systems, and reveals the dark clouds that gather over our dreams of the digital sublime.
