David Attenborough is one of the most influential and admired figures in English television. When 26, he applied for a job in the BBC - which then meant radio - and was promptly turned down. But someone saw his rejected application and asked, would he like to try television? He would, and sixty years later, he is still at it. Elegantly told, often very funny, here is his story. At home there is his rise to controlling BBC2, introducing colour television to Britain, encounters with Montgomery, Anthony Eden, singers, athletes, explorers, the Queen, Benjamin Britten. Abroad there are people just as remarkable, journeys up tropical rivers, to the interior of New Guinea or the Australian outback, dragons, birds of paradise, flying snakes and walls of cockroaches. Now updated to cover his work since 2009, *Life on Air* is a remarkable account of David Attenborough's passion for the natural world and his lifelong quest to understand it. .

*Trials of Life* Grand Central Publishing

\*Goodreads Choice Award Winner for Best Science & Technology Book of the Year\* In this scientifically informed account of the changes occurring in the world over the last century, award-winning broadcaster and natural historian shares a lifetime of wisdom and a hopeful vision for the future. See the world. Then make it better. I am 93. I've had an extraordinary life. It's only now that I appreciate how extraordinary. As a young man, I felt I was out there in the wild, experiencing the untouched natural world - but it was an illusion. The tragedy of our time has been happening all around us, barely noticeable from day to day -- the loss of our planet's wild places, its biodiversity. I have been witness to this decline. *A Life on Our Planet* is my witness statement, and my vision for the future. It is the story of how we came to make this, our greatest mistake -- and how, if we act now, we can yet put it right. We have one final chance to create the perfect home for ourselves and restore the wonderful world we inherited. All we need is the will to do so.

David Attenborough's *The Living Planet* Volume 10: *Worlds Apart*, Volume 11: *Oceans* and Volume 12: *New Worlds* Princeton Univ Department of Art & Sir David Attenborough's career as a naturalist and broadcaster has spanned nearly five decades and there are very few places on the globe that he has not visited. In this volume of memoirs David tells stories of the people and animals he has met and the places that he has visited. Sir David's first job after Cambridge University and two years in the Royal Navy - was at the London publishing house Hodder & Stoughton. Then in 1952 he joined the BBC as a trainee producer and it was while working on the *Zoo Quest* series (1954-64) that he had his first opportunity to undertake expeditions to remote parts of the globe to capture intimate footage of rare wildlife in its natural habitat. He was Controller of BBC2 (1965-68), during which time he introduced colour television to Britain, then Director of Programmes for the BBC (1969-1972). However in 1973 he abandoned administration altogether to return to documentary-making and writing. Over the last 25 years he has established himself as the world's leading natural history programme maker with several landmark BBC series, including *Life on Earth* (1979), *The Living Planet* (1984), *The Trials of Life* (1990), *The Private Life of Plants* (1995) and *Life of Birds* (1998). Sir David Attenborough is a Trustee of the British Museum and the Royal Botanic Gardens, Kew: an Honorary Fellow of Clare College, Cambridge: a Fellow of the Royal Society and was knighted in 1985.

*LIFE ON OUR PLANET SIGNED EDITION* Ten Speed Press

There's something new under the sun *Plants live secret, unseen lives* - hidden in their magical world and on their timescale. From the richest jungles to the harshest deserts, from the snowiest alpine forest to the remotest steaming swamp, *Green Planet* travels from one great habitat to the next, showing us that plants are as aggressive, competitive and dramatic as the animals on our planet. You will discover agents of death, who ruthlessly engulf their host plant, but also those that form deep and complex relationships with other species, such as the desert cacti who use nectar-loving bats to pollinate. Although plants are undoubtedly the stars of the show, a fascinating new light will be shed on the animals that interact with them. Using the latest technologies and showcasing over two decades of new discoveries, *Green Planet* reveals the strange and wonderful life of plants like never before - a life full of remarkable behaviour, emotional stories and surprising heroes.
