The Logic of Failure, by Dietrich Dorner A book review by Ian Jay
Projects are about change, and frequently involve complex systems. There are time delays separating action and related effects. These are linkages which we often fail to recognize. The most recent and spectacular evidence of this failing was the accident at Chernobyl.

The Logic of Failure: Recognizing and Avoiding Error in Complex Situations by Dietrich Doerner. Logic of failure – certain tendencies in our patterns of thought that, while appropriate to an older, simpler world, prove disastrous for the complex and

interdependent world we live in now. The slowness of our thinking (streamlining thinking process causes us to omit key variables)

The Logic of Failure, by Dietrich Dorner

The Logic of Failure is an exploration of some of the prominent factors affecting our ability to plan and act. Factors that are at no lack to

anyone, but seem to slip away through our common sense (which just means our present and available brain capacity or capabilities); factors such as temporal configurations, realizations of non-linear relationships, tendency to employ methodism, etc.
