MUTINY For Lt.

Commander Colin

MacIntyre, it began as a routine training flight over the Moon. For Dahak, a self-aware Imperial battleship, it began millennia ago when that powerful artificial intelligence underwent a mutiny in the face of the enemy. The mutiny was never resolved-Dahak was forced to maroon not just the mutineers but the entire crew on prehistoric Earth. Dahak has been helplessly waiting as the descendants of the loyal

crew regressed while the mutineers maintained control of technology that kept them alive as the millennia passed. But now Dahak's sensors indicate that the enemy that devastated the Imperium so long ago has returned-and Earth is in their path. For the sake of the planet, Dahak must mobilize its defenses. And that it cannot do until the mutineers are put down. So Dahak has picked Colin MacIntyre to be its new captain. Now MacIntyre must mobilize humanity to destroy the mutineers once and for all-or Earth will become a cinder in the path of galactic conquest. "Welcome to the Pelaran Alliance ..."With those simple

words, the Guardian spacecraft openly revealed itself to Humanity, heralding a new chapter in its 500-year-long mission to cultivate our world. Earth's population must now make its first, planet-wide decision -- join the most powerful alliance in our galaxy, or chart our own course -- deciding for ourselves which civilizations are worthy of our trust. Will we be the first world to decline the Pelarans' invitation, or does their offer come with an implied threat? Aboard Terran Fleet Command's flagship, TFS Navajo, Admiral Kevin Patterson assembles his formidable but untested forces in hopes of defending the Earth. Knowing that an attack is imminent, he must risk everything in hopes of finding his enemy and taking the initiative. Returning from TFC's first battle, Captain Tom Prescott learns that his frigate, TFS Ingenuity, is more heavily damaged than expected. Now he must race against time to prepare a new ship, then execute a daring mission to save Earth's last and best hope of avoiding full-scale interstellar war.

Starship Troopers
Simon and Schuster
Androids used to mingle among us, pretending to be human. Then an alien puppet-master altered their programming. Unknown to us, androids began leaving human society, burning their clothes and peeling off their skin to reveal the chrome-

colored bodies underneath. They gathered in a system where a star had exploded, blowing away the atmosphere of a Jupiter-like planet. The supernova had hurled heavy metals against the remaining core. The androids are mining supermetals that can turn ordinary ship weapons and shields into invincible armaments. The altered programming includes human genocide, which will start with a murderous attack on Earth. Luckily, Captain Maddox finds the enemy system. But during a space battle, something happens to hurl Victory thousands of light-years away into the Scutum-Centaurus Spiral Arm. The crippled starship will take years to reach home again. Long

before that, Earth will be a radioactive ruin. Now begins a desperate journey in hostile space that will stretch everyone as Maddox strains to reach the Lord High Admiral in time with knowledge about the coming android attack. THE LOST SUPERNOVA is the tenth book in the LOST STARSHIP SERIES.

The Lost Star Gate

In celebration of one of science fiction's most beloved franchises, an updated edition of the acclaimed Ships of the Line hardcover collection. They dared to risk it all in a skiff of reeds or leather, on a ship of wood

or steel, knowing the only thing between them and certain death was their ship. To explore, to seek out what lay beyond the close and comfortable, every explorer had to embrace danger. And as they did so, what arose was a mystical bond, a passion for the ships that carried them. From the very first time humans dared to warp the fabric of space, escaping from the ashes of the third World War, they also created ships. These vessels have become the icons of mankind's desire to rise above the

everyday, to seek out and make the unknown known. And these ships that travel the stellar seas have stirred the same passions as the ones that floated in the oceans. While every captain has wished that their starship could be outfitted in the same manner as the sailing ship H.M.S. Beagle—without weapons—that proved untenable. From the start, Starfleet realized that each vessel, due to the limited range of the early warp engines, must be able to stand alone against any attack. Thus arose the

idea, taken from the days of wooden sailing ships, that every Starfleet vessel must stand as a ship of the line. Through the actions of their captains and crews, countless starships have taken on that role. Here we remember some of those ships and their heroic crews. In celebration of one of science fiction's most beloved franchises, this updated edition of the acclaimed *Ships of the Line* hardcover collection now includes dozens of additional images brought together for the first time

in book format—spectacular renderings featured in the highly successful *Star Trek: Ships of the Line* calendar series. With text by Star Trek's own Michael Okuda, the story of each of these valiant starships now comes to life. ™, ®, & © 2014 CBS Studios, Inc. upon arrival, the would-be colonists encountered the Kresh--a diabolical alien race who quickly captured the human starship and tortured its inhabitants in hopes of learning the coordinates of Earth. Street-smart Cyrus Gant managed to escape, crashing to the surface of a nearby moon terraformed by the Kresh and inhabited by primitive humans. Now Cyrus pursues a desperate hope bound up in a single boy, a prophesized psionic named Klane--already in the clutches of the Kresh. Soon Cyrus finds himself torn between tracking down this so-called savior and escaping back

into space before it's too late. Yet as he gathers allies and firepower, he's desperate to find a way back to Earth and warn them of this alien menace...only to discover an even greater danger to the future existence of the human race. The electric interstellar action that began in Alien Honor continues in Alien Shores.

After spending four years in SEA and maturing into a highly respected UW weapons system the Joint Chief of Staff (JCS) chose the Combat Talon to lead the night low-level raid on the North Vietnamese prison camp at Son Tay. Despite the outcome of the operation the Talon I cemented its reputation as the weapons system of choice for long-range clandestine operations. In the period following the Vietnam War United States Air Force (USAF) special

operations gradually lost its political and financial support which was graphically demonstrated in the failed Desert One mission into Iran. Thanks to congressional supporters like Earl Hutto of Florida and Dan Daniel of Virginia funds for aircraft upgrades and military construction projects materialized to meet the ever-increasing threat to our nation. Under the leadership of such committed hard-driven officers as Brenci Uttaro Ferkes Meller and Thigpen the crew force became the most disciplined in our Air Force. It was capable of penetrating hostile airspace at night in a low-level mountainous environment covertly to execute any number of unconventional

warfare missions.
