In an innovative fusion of labor and environmental history, *Making a Living* examines work as a central part of Americans' evolving relationship with nature, revealing the unexpected connections between the fight for workers' rights and the rise of the modern environmental movement. Chad Montrie offers six case studies: textile "mill girls" in antebellum New England, plantation slaves and newly freed sharecroppers in the Mississippi Delta, homesteading women in the Kansas and Nebraska grasslands, native-born coal miners in southern Appalachia, autoworkers in Detroit, and Mexican and Mexican American farm workers in southern California. Montrie shows how increasingly organized and mechanized production drove a wedge between workers and nature--and how workers fought back. Workers' resistance not only addressed wages and conditions, he argues, but also planted the seeds of environmental reform and environmental justice activism. Workers played a critical role in raising popular consciousness, pioneering strategies for enacting environmental regulatory policy, and initiating militant local protest. Filled with poignant and illuminating vignettes, *Making a Living* provides new insights into the intersection of the labor movement and environmentalism in America.

A History of American Working-Class Literature sheds light not only on the lived experience of class but the enormously varied creativity of working-class people throughout the history of what is now the United States.

By charting a chronology of working-class experience, as the conditions of work have changed over time, this volume shows how the practice of organizing, economic competition, place, and time shape opportunity and desire. The subjects range from transportation narratives and slave songs to the literature of deindustrialization and globalization. Among the literary forms discussed are memoir, journalism, film, drama, poetry, speeches, fiction, and song. Essays focus on plantation, prison, factory, and farm, as well as on labor unions, workers' theaters, and innovative publishing ventures. The *Oxford History of the United States* is by far the most respected multi-volume history of our nation. In this Pulitzer prize-winning, critically acclaimed addition to the series, historian Daniel Walker Howe illuminates the period from the battle of New Orleans to the end of the Mexican-American War, an era when the United States expanded to the Pacific and won control over the richest part of the North American continent. A panoramic narrative, *What Hath God Wrought* portrays revolutionary improvements in transportation and communications that accelerated the extension of the American empire. Railroads, canals, newspapers, and the telegraph dramatically lowered travel times and spurred the spread of information. These innovations prompted the emergence of mass political parties and stimulated America's economic development from an overwhelmingly rural country to a diversified economy in which commerce and industry took their place alongside agriculture. In his story, the author weaves together political and military events with social, economic, and cultural history. Howe examines the rise of Andrew Jackson and his Democratic party, but contends that John Quincy Adams and other Whigs--advocates of public education and economic integration, defenders of the rights of Indians, women, and African-Americans--were the true prophets of America's future. In addition, Howe reveals the power of religion to shape many aspects

of American life during this period, including slavery and antislavery, women's rights and other reform movements, politics, education, and literature. Howe's story of American expansion culminates in the bitterly controversial but brilliantly executed war waged against Mexico to gain California and Texas for the United States. Winner of the New-York Historical Society American History Book Prize Finalist, 2007 National Book Critics Circle Award for Nonfiction *The Oxford History of the United States* The *Oxford History of the United States* is the most respected multi-volume history of our nation. The series includes three Pulitzer Prize winners, a *New York Times* bestseller, and winners of the Bancroft and Parkman Prizes. The *Atlantic Monthly* has praised it as "the most distinguished series in American historical scholarship," a series that "synthesizes a generation's worth of historical inquiry and knowledge into one literally state-of-the-art book." Conceived under the general editorship of C. Vann Woodward and Richard Hofstadter, and now under the editorship of David M. Kennedy, this renowned series blends social, political, economic, cultural, diplomatic, and military history into coherent and vividly written narrative.
