Whiskey Tango Foxtrot (Aces High MC - Dakotas - Book 2) (Second edition - Sept. 2022) Liza A tattoo artist and biker named Tango came to save the day when my brother put my life in danger again. Stupid name. Sexy biker. My perpetually soaked panties were all the evidence anyone needed that Tango could dance all over my body any damn time he wanted. Unfortunately for me, he seemed to be in a weird relationship with his buddies Whiskey, Fox, and their girl Amy. No way was I signing on to be the lettuce in that screwed up sexual sandwich. Nope. Nope. Nope. I might need protection from an entire MC, but I did not need to share my man. Tango From the moment I laid eyes on her, Liza was all that I could see. Protecting her became a personal matter instead of just another job. Loving her, that was something that couldn't be helped. If only my past, and the screwed-up relationship my friends attempted to drag me into, hadn't become a problem. The explosive, behind-the-scenes story of Donald Trump’s high-stakes confrontation with Beijing, from an award-winning Washington Post columnist and peerless observer of the U.S.–China relationship There was no calm before the storm. Donald Trump’s surprise electoral victory shattered the fragile understanding between Washington and Beijing, putting the most important relationship of the twenty-first century in the hands of a novice who had bitterly attacked China from the campaign trail. Almost as soon as he entered office, Trump brought to a boil the long-simmering rivalry between the two countries, while also striking up a “friendship” with Chinese president Xi Jinping — whose manipulations of his American counterpart would undermine the White House’s already disjointed response to the historic challenge of a rising China. All the while, Trump’s own officials fought to steer U.S. policy from within. By the time the COVID-19 pandemic erupted in Wuhan, Trump’s love-hate relationship with Xi had sparked a trade war, while Xi’s aggression had pushed the world to the brink of a new Cold War. But their quarrel had also

forced a long-overdue reckoning within the United States over China’s audacious foreign-influence operations, horrific human rights abuses, and creeping digital despotism. Ironically, this awakening was one of the biggest foreign-policy victories of Trump’s fractious term in office. Filled with shocking revelations drawn from Josh Rogin’s unparalleled access to top U.S. officials from the White House and deep within the country’s foreign policy machine, *Chaos Under Heaven* reveals an administration at war with itself during perhaps our most urgent hour.

Room “Koontz has never exactly shied away from complex characters or situations. And this situation gets very complex indeed, as Jane pursues the people behind the conspiracy with the kind of single-minded relentlessness that makes the book absolutely spellbinding. As good as *The Silent Corner* was, this one’s even better. . . . Koontz is on another roll with a new series that boasts a juicy premise and a compelling star. . . . Pure gold.”—Booklist (starred review) “A deeply layered, satisfying thriller that is character-driven and nearly impossible to put down . . . grounded in many real-world, current issues . . . [The *Whispering Room*] never loses sight of the classic political/sci-fi/thriller elements that make it so much fun to read.”—Bookreporter

Do our ways of talking about contemporary terrorism have a history in the science, technology, and culture

of the Cold War? *Human Programming* explores this history in a groundbreaking work that draws connections across decades and throughout American culture, high and low. Scott Selisker argues that literary, cinematic, and scientific representations of the programmed mind have long shaped conversations in U.S. political culture about freedom and unfreedom, and about democracy and its enemies. Selisker demonstrates how American conceptions of freedom and of humanity have changed in tandem with developments in science and technology, including media technology, cybernetics, behaviorist psychology, and sociology. Since World War II, propagandists, scientists, and creative artists have adapted visions of human programmability as they sought to imagine the psychological manipulation and institutional controls that could produce the inscrutable subjects of totalitarian states, cults, and terrorist cells. At the same time, writers across the political spectrum reimaged ideals of American freedom, democracy, and diversity by way of contrast with these posthuman specters of mental unfreedom. Images of such “human automatons” circulated in popular films, trials, travelogues, and the news media, giving form to the nebulous enemies of the postwar and contemporary United States: totalitarianism, communism, total institutions, cult extremism, and fundamentalist terrorism. Ranging from discussions of *The Manchurian Candidate* and cyberpunk science fiction to the cases of Patty Hearst and the “American Taliban” John Walker Lindh,

Human Programming opens new ways of understanding the intertwined roles of literature, film, science, and technology in American culture.

"It may be the most sophisticated political thriller ever made in Hollywood," film critic Pauline Kael wrote of John Frankenheimer's terrifying 1962 political thriller about an American serviceman brainwashed in Korea and made into an assassin. Sophisticated to be sure, it's also a headlong fall through the looking-glass of American politics and the most deeply prophetic film of the second half of the American century. As Greil Marcus reconstructs the drama, *The Manchurian Candidate* is a movie in which the director and actors, including Laurence Harvey, Frank Sinatra and Angela Lansbury in an Academy Award-nominated performance, were suddenly capable of anything, beyond any expectations. This edition includes a new foreword highlighting the movie's terrifying contemporary relevance in the age of Trump and Russian interference in the US Presidential election.

When doubt is cast on a presidential election, it sets off an "intricate, skillfully spun" tale of intrigue in this near-future political thriller (Publishers Weekly). At the dawn of the twenty-first century, the CIA has been disbanded and a secret society has taken hold of powerful positions across Washington. After a long and contentious campaign, President Bedford Lockwood is celebrating his reelection. But the revelry is cut short when it's discovered that his over-zealous aides may have tampered with the vote. On the eve of the Inauguration, Lockwood's rival—the archconservative Franklin Mallory—presents evidence of fraud. When Lockwood refuses to take the oath of office, it sets in motion a series of events that may destroy him, his party, and the Constitution. From this catastrophic crisis, acclaimed author and former Washington journalist Charles McCarry weaves a smart, tense, and eerily prescient political thriller.
