Anthropology of Tourism in Central and Eastern Europe explores traveling through case studies from Austria, Bulgaria, Estonia, and Poland through an anthropological lens. The contributors of this volume touch on broader issues like identity, gender, visuality, memory, heritage, intercultural relationships, and globalization.

Hearing Before the Subcommittee on Business, Trade, and Tourism of the Committee on Commerce, Science, and Transportation, United States Senate, Ninety-seventh Congress, First Session, on Federal Role in Tourism, May 4, 1981 World Bank Publications

"Dawson's analysis draws on promotional pamphlets, newspaper advertisements, and films as well as archival sources about government, civic, and international tourism organizations. He argues that in order to understand the roots of the fully fledged consumer culture that developed in Canada, it is necessary to understand the connections between the 1930s, 1940s, and the postwar era. He underlines the significance of the Depression and the Second World War - ostensibly periods of "underconsumption"--For the development of tourism promotion and consumerism in general." "This cultural history will be welcomed by British Columbian and Canadian historians, as well as scholars of consumer culture and tourism."--Jacket.

Tourism and the Environment CABI

Transformational Tourism deals with the important issue of how travel and tourism can change human behaviour and have a positive impact on the world. The book focuses on human development in a world dominated by post-9/11 security and political challenges, economic and financial collapses, as well as environmental threats; it identifies various types of tourism that can transform human beings, such as educational, volunteer, survival, community-based, eco, farm, extreme, religious, spiritual, wellness, and mission tourism.

Tourism CABI

The first edition of a biennial publication which analyses best practice in OECD and selected non member economies. It surveys a number of initiatives taken by governments and businesses in the tourism field, and provides a statistical profile of tourism in reporting countries.

Tourism and Recreation Oxford University Press, USA

This volume continues the tradition established by Nash in The Study of Tourism Anthropological and Sociological Beginnings (2005) previously published in this series. A significant number of the founding scholars whose work has defined and provided a platform for psychology and marketing studies in tourism contribute their reflective accounts on their initial work. They also locate the initial work they conducted within the milieu in which it was created and link the early work to contemporary concerns both of their own undertaking and more broadly. This is the only publication to collate views on the development of tourism study by all these historically important tourism scholars and provides a unique insight into how the context in which tourism scholars' work influences the studies they undertake. From the renowned Tourism Social Science Series it systematically and cumulatively contributes to the formation, embodiment, and advancement of knowledge in the field of tourism. A valuable piece of tourism literature for all in the areas of advanced marketing and applied psychology, philosophy of education, social science analysis, tourism marketing research and management.

A Reflection on their Role in Development Psychology Press

This open access book discusses the relationship between periodicals, tourism, and nation-building in Mexico. It enquires into how magazines, a staple form of the promotional apparatus of tourism since its inception, articulated an imaginative geography of Mexico at a time when that industry became a critical means of economic recovery and political stability after the Revolution. Notwithstanding their vogue, popularity, reach, and close affiliations to commerce and state over several decades, magazines have not received any sustained critical attention in the scholarship on that period. This book aims to redress that oversight. It argues that illustrated magazines like Mexican Folkways (1925–1937) and Mexico This Month (1955–1971) offer rich and compelling materials in that regard, not only as unique tools for interrogating the ramifications of tourism on the country ’ s reconstruction, but as autonomous objects of study that form a vital if complex part of Mexico ’ s visual culture.

Trends and Policies CABI

Magazines, Tourism, and Nation-Building in MexicoSpringer

UBC Press

This text introduces tourism students to concepts drawn from critical theory, cultural studies and the social sciences. It does so with a light and readable touch, highlighting the ideas that underlie contemporary critical tourism studies in a practical and engaging way. Specifically, the authors examine how post-structuralist thought has led to a re-imagining of power relationships and the ways in which they are central to the production and consumption of tourism experiences. Eleven clear, relevant chapters provide an accessible

introduction to tourism defining, explaining and developing the key issues and methods in this exciting field. These topics include: • Regulating Tourism • Commodifying Tourism • Embodying Tourism • Performing Tourism • Tourism and the Everyday • Tourism and the Other • Tourism and the Environment • Tourism and the Past • Tourism Mobilities • Researching Tourism A strong teaching text, this will be well received by lecturers seeking an authoritative, multi-disciplinary book on contemporary tourism and by students who want a practical, grounded introduction which understands their learning and research needs.

The EU Member States Routledge

This text, now in its fully-updated third edition, continues to offer a comprehensive synthesis of the key issues associated with tourism, leisure and recreation.

Tourism, Religion and Pilgrimage in Jerusalem Springer

One of the fastest growing sectors of the modern economy, tourism is a complicated phenomenon and the pressures it creates on the natural and social environment have become major issues. This text presents an overview of the subject and suggests positive guidelines.

Environment, Place and Space Routledge

This three volume reference series provides an authoritative and comprehensive set of volumes collecting together the most influential articles and papers on tourism, heritage and culture. The papers have been selected and introduced by Dallen Timothy, one of the leading international scholars in tourism research. The first volume 'Managing Heritage and Cultural Tourism Resources' deals primarily with issues of conservation, interpretation, impacts of tourism and the management of those impacts. Sold individually and as a set, this series will prove an essential reference work for scholars and students in geography, tourism and heritage studies, cultural studies and beyond.

The Long View, 1700–2015Routledge

"This is an urban history of London during the pivotal years of the 1960s and 1970s, when the metropolis was transformed from an industrial city that the Victorians might have recognised to an embryonic modern 'world city.' Previous work on London in these years has tended to focus upon the 1960s -in particular the 'Swinging London' phenomenon. Mary Quant, Carnaby Street and the King's Road, Chelsea, all appear in these pages, but it is argued that the 'swinging moment' of the mid-sixties was a passing symptom of a much broader transformation from an industrial to a service-based city, and it is that transformation which this book examines. London is too complex and diverse a city to be comprehended in a simple linear narrative; this book adopts instead an innovative approach to urban history, by which London life and London's transformation are examined through a number of case studies looking at specific themes and areas of the city. Consumerism and the 'experience economy', home ownership and gentrification, deindustrialisation and deprivation, racial tension and unemployment, the attrition of public services and the steady loss of confidence in public agencies - national and local - emerge as overarching themes from the individual case studies in this book. Their combined effect, it is argued, was to prepare the ground for the Britain that Margaret Thatcher is usually held to have created after 1979 - without Thatcher herself having anything to do it"--

Regional, Economic, Cultural and Policy Issues Lexington Books

David Harrison has contributed to the academic study of tourism over the last 30 years. This book brings together a collection of his published material that reflects the role played by tourism in 'development', both in societies emerging from Western colonialism and in societies previously part of the Soviet system. The overarching theme looks at how, promoted as a tool for development, tourism can lead to conflict between competing elites, but can also empower groups previously subject to constraint by traditional authorities. Tradition is intensely manipulatable and always reflects power relations. Such pressure on tradition is but one aspect of tourism's wider social impacts. This includes changes in economic and social structure, which, for many, constitute social problems that need to be addressed. At the same time, 'sustainability', though apparently a worthy aim, can be a problematic concept, especially when applied to 'traditional' cultures, and may conflict with such ideals as egalitarianism.

Environment, Place and Space Channel View Publications

The purpose of this paper is to empirically evaluate the tourism performance of STP with respect to the main determinants that have been found in the literature. Tourism is clearly a comparative advantage of STP and already an important economic activity, however, STP is far from the characterization of a tourism-dependent small economy. Tourism represents 10.8 percent of GDP and the ratio between international inbound tourists and population is at 14.5 percent. For a summary of how STP relates to other destinations. This puts STP as the twelfth country in terms of size of direct contribution of the tourism sector to GDP and the eighteenth in terms of the ratio between tourists and population. Using data from different sources, this note analyzes STP's tourism-related characteristics and uses different empirical tools to evaluate them vis- à -vis its peers. Economic literature shows that tourism demand is affected by price and income but also by a host of other factors such as air connectivity, language, and culture among others. First, there is an extensive research agenda on measuring price and income elasticities of tourism, which is specific for different types of tourism destination. Second, there is a myriad of characteristics that are found to be important to the tourism industry, such as remoteness, language, culture, air connectivity, bilateral trade, etc. More recently, there has been many studies emphasizing the role of digital media and digital presence¹ as a key determinant of tourist decisions.

Performance, Strategies, and Sustainability CABI

"A decade after the first edition of this book established itself as one of the major books that covered the nature of the demand for tourism, and the implications of that demand, this second edition represents a significant updating of material that reflects contemporary thinking."

Foundations from Psychology Routledge

This book investigates the potential role that states can play in cosmopolitan thinking and how states could be agents for the advancement of cosmopolitan responsibilities. In doing so the book seeks to investigate the possibility that states can become bearers of cosmopolitan responsibilities across a variety of areas including human rights, atrocity prevention, climate change, and public health, while also remaining vehicles for popular self-determination withinpersisting, and at times counteracting, conditions of global pluralism.

Tourism and Poverty Reduction Taylor & Francis

Jerusalem is a city with a singular nature. Home to three religions, it contains spiritual meaning for people the world over; it is at once a tourist destination and a location with a complex political reality. Tourism, therefore, is an integral part of Jerusalem ’ s development and its political conflicts. The book traces tourism and pilgrimage to Jerusalem from the late Ottoman era, through the British Mandate, during the period of the divided city, and to the reunification of the city under Israeli rule. Throughout, the city ’ s evolution is shown to be intertwined with its tourist industry, as tourist sites, accommodations, infrastructure, and services transform the city ’ s structures and open spaces. At the same time, tourism is wielded by various parties in an effort to gain political recognition, to bolster territorial control, or to garner support. The city ’ s future and the role tourism can play in it are examined. While the construction of a “ security fence ” will have many implications on Jerusalem ’ s tourist industry, steps are proposed to minimize the effects of the security fence and optimize tourism. Written by leading academics, this title will be valuable reading for students, academics, and researchers in the fields of tourism, religious studies, geography, history, cultural studies, and anthropology.

Tourism Collaboration and Partnerships Channel View Publications

The key importance of involving diverse stakeholders in tourism planning and management is increasingly recognized. Collaboration and partnerships are essential ways of achieving this. Researchers and practitioners examine the processes, issues and politics involved in this growing field.

Anthropology of Tourism in Central and Eastern Europe Springer

By comparing countries like Venezuela and Chile, China and India, Dominican Republic and Haiti, and others, the book tries to answer the questions of which institutions and policies are crucial for stable long term economic growth.
