Since the 1860s, long before scientists put a name to Alzheimer's disease, Canadian authors have been writing about age-related dementia. Originally, most of these stories were elegies, designed to offer readers consolation. Over time they evolved into narratives of gothic horror in which the illness is presented not as a normal consequence of aging but as an apocalyptic transformation. Weaving together scientific, cultural, and aesthetic depictions of dementia and Alzheimer's disease, *Forgotten* asserts that the only crisis associated with Canada's aging population is one of misunderstanding. Revealing that turning illness into something monstrous can have dangerous consequences, Marlene Goldman seeks to identify the political and social influences that have led to the gothic disease model and its effects on society. Examining the works of authors such as Alice Munro, Michael Ignatieff, Jane Rule, and Caroline Adderson alongside news stories and medical and historical discussions of Alzheimer's disease, Goldman provides an alternative, person-centred perspective to the experiences of aging and age-related dementia. Deconstructing the myths that have transformed cognitive decline into a corrosive fantasy, *Forgotten* establishes the pivotal role that fictional and non-fictional narratives play in cultural interpretations of disease.

Spanning eight decades and chronicling the wild ride of a Greek-American family through the vicissitudes of the twentieth century, Jeffrey Eugenides' witty, exuberant novel on one level tells a traditional story about three generations of a fantastic, absurd, lovable immigrant family -- blessed and cursed with generous doses of tragedy and high comedy. But there's a provocative twist. Cal, the narrator -- also Callie -- is a hermaphrodite. And the explanation for this takes us spooling back in time, through a breathtaking review of the twentieth century, to 1922, when the Turks sacked Smyrna and Callie's grandparents fled for their lives. Back to a tiny village in Asia

Minor where two lovers, and one rare genetic mutation, set our narrator's life in motion.

Middlesex is a grand, utterly original fable of crossed bloodlines, the intricacies of gender, and the deep, untidy promptings of desire. It's a brilliant exploration of divided people, divided families, divided cities and nations -- the connected halves that make up ourselves and our world.

*Miss Aluminum* is Susanna Moore's revealing and refreshing memoir of Hollywood in the 1970s. In 1963 after the death of her mother, seventeen-year-old Susanna Moore leaves her home in Hawai'i with no money, no belongings, and no prospects to live with her Irish grandmother in Philadelphia. She soon receives four trunks of expensive clothes from a concerned family friend, allowing her to assume the first of many disguises she will need to find her sometimes perilous, always valorous way. Her journey takes her from New York to Los Angeles where she becomes a model and meets Joan Didion and Audrey Hepburn. She works as a script reader for Warren Beatty and Jack Nicholson, and is given a screen test by Mike Nichols. But beneath *Miss Aluminum*'s glittering fairytale surface lies the story of a girl's insatiable hunger to learn and her anguished determination to understand the circumstances of her mother's death. Moore gives us a sardonic, often humorous portrait of Hollywood in the seventies, and of a young woman's hard-won arrival at selfhood.

The study of Montreal as a specific location in French and English writings has long been subordinated to the demands of linguistically divided and politically contentious narratives about national development. In this cross-linguistic study, Patrick Coleman models an inclusive and post-national literary history of the city itself. Tracing a sequence of moments in the emergence of the Montreal novel from World War II to the turbulent 1960s, Equivocal City offers close readings of fourteen key works of fiction, focusing on the inner dynamic of their construction as well as the unexpected convergences and contrasts in the narrative structures they adopt and the aesthetic perspective they seek to achieve. Critically sophisticated but accessibly written, this book gives a sympathetic account of how writers in both languages struggled to give integrated artistic expression to their experience of a city that was still linguistically compartmentalized and culturally insecure. By analyzing the interplay between story and narrative form, the book explores what French and English novelists could — and could not — imagine about the Montreal they sought to portray. From the responsible realism of Hugh MacLennan and Gabrielle Roy to the fractious phantasmagorias of Jacques Ferron and Leonard Cohen, Equivocal City traces the evolution of the Montreal novel with the aim of retrieving a shareable literary past.

Drawing on a selection of carefully curated autobiographical and fictional portrayals of the dementia experience, this book gives voice to some of the most pressing ethical issues that commonly arise in the context of a dementing disorder, and calls attention to various forms of narrative resistance in contemporary American literature on early-onset Alzheimer 's disease (AD). Based on the premise

that the current public discourse on AD is largely dominated by an anxiety and fear-promoting conception of the illness, this multilayered inquiry strives to look beyond the widespread horrors of forgetting and loss in AD, and, in doing so, attempts to give a better, more accurate, and more balanced impression of what it means to be living with such a diagnosis.

The central question for both the victors and the vanquished of World War II was just how widely the stain of guilt would spread over Germany. Political leaders and intellectuals on both sides of the conflict debated whether support for National Socialism tainted Germany's entire population and thus discredited the nation's history and culture. The tremendous challenge that Allied officials and German thinkers faced as the war closed, then, was how to limn a postwar German identity that accounted for National Socialism without irrevocably damning the idea and character of Germany as a whole. In the House of the Hangman chronicles this delicate process, exploring key debates about the Nazi past and German future during the later years of World War II and its aftermath. What did British and American leaders think had given rise to National Socialism, and how did these beliefs shape their intentions for occupation? What rhetorical and symbolic tools did Germans develop for handling the insidious legacy of Nazism? Considering these and other questions, Jeffrey K. Olick explores the processes of accommodation and rejection that Allied plans for a new German state inspired among the German intelligentsia. He also examines heated struggles over the value of Germany's institutional and political heritage. Along the way, he demonstrates how the moral and political vocabulary for coming to terms with National Socialism in Germany has been of enduring significance—as a crucible not only of German identity but also of contemporary thinking about memory and social justice more generally. Given the current war in Iraq, the issues contested during Germany's abjection and reinvention—how to treat a defeated enemy, how to place episodes within wider historical trajectories, how to distinguish varieties of victimhood—are as urgent today as they were sixty years ago, and In the House of the Hangman offers readers an invaluable historical perspective on these critical questions.

I wanted to write about people who have a disease which destroys the ability to communicate or recognise anyone, causes the loss of bodily functions, forces dependency and dehumanises the sufferer - as Lewy body dementia did to my Mum. Some form of dementia affects 1 in 20 of the over 65's and 1 in 5 of over 80's, so many of us - how does it feel if you know that it is happening to you? Some sufferers have said that it enriches awareness and acts as a prism through which life is viewed differently. I could see that fantasy and reality merged in my Mum's mind and often wondered if she had an alternative world where her insecurities and fears manifested themselves as monsters and where she was powerful, resourceful and a leader, in contrast to her claustrophobic, trapped and deteriorating reality. Hopefully there is still power and creativity in the human mind even when it is damaged by plaques and tangles. I have imagined her thoughts based on what she said to me and from what I observed and have described factually and honestly the journey we took together. Recording my experience of her illness, treatment and life in two nursing homes led me to question how we treat our elderly, our shocking lack of effort to communicate with those with dementia and what constitutes identity, self and the soul. 'Over Streams and Squirrel Woods' explores what can happen when reality becomes too painful, and the disconnection between people when they see and hear differently from one another. It is about boundless love, frustration, guilt and the inexorable inevitability of aging. "This is a valuable addition to the dementia literature, rewriting our expectation of what those with dementia can think." John Suchet.

Phil Hale and Rick Berry met in 1980. Hale was sixteen and Berry twenty-seven. After founding the Newbury Studio (along with Tom Canty and Rick Salvucci) in Boston, they went on to illustrate the work of people who make up a veritable Who's Who of three major literary genres: William Gibson, Stephen King, Robert E. Howard, Frank Herbert, Peter Straub and the list goes on...Going well beyond the roles of illustrators, they are considered innovators and artistic pioneers -- Berry produced the first digital cover paintings (W. Gibson's *Neuromancer*, as seen in *Time Magazine*, 8 Feb. 1993) for trade fiction in the world. Hale's superb brush work garnered him so much attention, by age eighteen he was a pro in demand. Soon he was tapped for King's *Drawing of the Three*. Among their numerous awards is the 1989 World Con Best of Show for Dry Science by Berry. Berry's design and painting for Straub's *Mrs. God* was considered by *Communication Arts* as one of the year's best illustrated books. *CA* plus the *Society of Illustrators* annuals and *Print* magazine have published their works for music, literary and pop culture. Both have also contributed extensively to gaming cards and comic books. It is remarkable ... that somehow out of the discontinuities of the unexpected universe two of the most creative artists and best draftsmen I've ever seen should meet at the right time. -- Jeff Jones

*Living Through a Revolutionary Nightmare* By 2024, reflecting on the events of 44 years ago, I am struck by the stark contrast between our hopes and reality. Back in 2010, we believed the regime 's collapse was imminent. Yet, it continues to cling to power, maintaining its oppressive, fascist grip. The “ Women, Life, Freedom ” movement of 2022 marked a significant milestone, the younger generation freeing us from the shackles of mandatory hijabs. But the regime 's frightful executions plus nonsense anti civic Ecological collapses persists, spreading its influence through regional conflicts. Russian Putin, poses as the ally of the Islamic regime, thus enables its survival by contradictory tactics ,facilitating oil sales to China Therefore undermining the sanctions imposed by the U.S. and Western Europe. Meanwhile, the global unspeakable tragedy unfolding in Gaza leaves the world in stunned silence. All eyes now turn to the United States. Our hopes for liberation remain, but the weight of these global and regional crises ignited by allied forces reminds us of how far we still have to go towards Liberty
