Since its publication in 2008, *A Grammar of the Hittite Language* has been the definitive Hittite reference and teaching tool. This new edition brings Hoffner and Melchert's essential work up to date, incorporating the dramatic progress achieved in the field over the past fifteen years. Heavily revised and expanded, the second edition recasts the discussion of topics to better serve the linguistically informed reader. A reorganized presentation of the synchronic facts makes them accessible to both Hittitologists and linguists interested in Hittite for historical or typological purposes. Part 1 provides a thorough overview of Hittite grammar that is grounded in abundant textual examples. Part 2 is a tutorial that guides students through a series of graded lessons with illustrative sentences for translation. The tutorial is keyed to the reference grammar and includes extensive updated notes. Taken together with Part 2: Tutorial, which guides students through a series of graded lessons keyed to this reference grammar, the work remains the most comprehensive and detailed Hittite grammar ever produced.

*The Works of the Rev. Jonathan Swift, D.D. ... : with Notes, Historical and Critical* Springer Hypertheatre: Contemporary Radical Adaptation of Greek Tragedy investigates the adaptation of classical drama for the contemporary stage and explores its role as an active, polemical form of theatre which addresses present-day issues. The book's premise is that by breaking drama into constituent parts, revising, reinterpreting and rewriting to create a new, culturally and politically relevant construct, the process of adaptation creates a 'hyperplay', newly repurposed for the contemporary world. This process is explored through a diverse collection of postmodern adaptations of *Antigone*, *Medea*, and *The Trojan Women*, analysing their adaptive strategies and the evidence of how these remakings reflect the cultures of which they are a part. Central to this study is the idea that each of these adaptations becomes an entirely new play, redefining its central female figures and invoking reconfigurations of femininity which emphasise individual women's strengths and female solidarity. Written for scholars of Theatre, Adaptation, Performance Studies, and Literature, Hypertheatre places the Greek classics firmly within a contemporary feminist discourse.

Understanding. Knowledge. Insight. It is the goal of most people and humanity in general to understand and to gain knowledge. To understand our natural world. To understand space. To understand those things so tiny we can never see them. We want to understand what other people are saying, insight into what they are feeling and what makes them tick. For most people, it is natural to want to understand more about a wide variety of topics and disciplines. Perhaps the most important understanding of them all is the knowledge of self. Adult babies have traditionally not fared well in the area of understanding of ourselves. The few professional attempts to explain ABDL behaviour and thinking have been less than helpful and often insulting and deeply offensive. Being described as a paraphilia alongside and adjacent to paedophilia and other serious disorders has been the nightmare that has haunted the community for a generation. Slowly however, the light has been dawning on the extraordinary world of the adult baby. The first step was the recognition that being an adult baby is no mere affectation, fetish or odd choice of behaviour. It was the understanding that the baby self is a genuine and subjectively real identity. Not a thing, not a concept or a feeling, but an identity. A few professionals have belatedly drifted onto the scene and made a few inroads, but they have been well behind the small group of hard-working ABDLs themselves who have sought to build a body of understanding on who we are. Knowing who we are is the key to success, happiness and the ability to move forward. The works of B. Terrance Grey, Rosalie and Michael Bent led the way to building an intellectual basis of understanding of who Adult babies are. Then came Dylan Lewis, whose canon of work in this area has no peer. This new book – Living Happily as an Adult Baby – makes a promise in its title that is almost obscene in its arrogance. Adult Babies have often struggled with the power of their baby identity and happiness - especially long-term happiness – has often eluded them. This work is commended to all adult babies, their family and friends as it seeks to further humanity's understanding of this most complex identity structure. The Adult Baby.

Theatre has always been a site for selling outrage and sensation, a place where public reputations are made and destroyed in spectacular ways. This is the first book to investigate the construction and production of celebrity in the British theatre. These

exciting essays explore aspects of fame, notoriety and transgression in a wide range of performers and playwrights including David Garrick, Oscar Wilde, Ellen Terry, Laurence Olivier and Sarah Kane. This pioneering volume examines the ingenious ways in which these stars have negotiated their own fame. The essays also analyze the complex relationships between discourses of celebrity and questions of gender, spectatorship and the operation of cultural markets.

In legal jurisprudence, the phenomenon of "hard cases" presents itself as a dilemma between the legal positivists and the natural law realists. Of the former, without the metaphysical underpinnings of an objective legal or moral standard, the legal positivists cannot supply convincing arguments to supplant the sovereign as the origin and authority of law. The natural law realists face the problem of justifying the natural law. Against both views, S. Zinaich Jr. defends a middle position, Analytical Legal Naturalism (ALN). It represents an analytic norm, both necessarily true and known a posteriori. Against the legal positivists, it supplies an objective legal standard by removing--at least for hard cases--the necessity of the will of a sovereign authority. Against the natural law realists, ALN provides a nonmoral standard which, because of its analyticity and necessity, avoids the need for metaethical speculation. Finally, ALN provides a standard that not only supplies the universalizable punch to avoid political subjectivism, but does so in a conventional manner. Thus, ALN does not require a moral or modal reality as truth-making characteristics. Rather, it makes what is legally valuable or disvaluable dependent upon empirically verifiable facts that are legally relevant.

"It covers, chapter by chapter the anti-air battle in wars from Yom Kippur (1973) onwards . . . a readable, well researched and well-presented book." —Army Rumour Service (ARRSE) Anti-aircraft artillery truly came into prominence during the Second World War, shooting down more aircraft than any other weapon and seriously affecting the conduct of air operations. Development continued into the Cold War, resulting in the extensive introduction of surface-to-air missiles, or SAMs. Though the first combat success of such weapons was during the Vietnam War, when a Soviet-designed S-75 Dvina missile shot down a USAF F-4C Phantom on 24 July 1965, it was the Yom Kippur War of 1973 which brought surface-to-air missiles to the center stage. During this short but bitter conflict, Egyptian and Syrian air defenses shot down nearly fifty Israeli aircraft in the first three days alone—almost a fourth of Israel's entire combat aircraft fleet. In all, Israel lost 104 aircraft during the war and, for the first time, more aircraft were lost to SAMs than any other cause. The age of surface-to-air missiles had dawned. In this unique examination, the author details the development of not just surface-to-air missiles, but all anti-aircraft artillery, since 1972. The part that such equipment played in all of the major conflicts since then is explored, including the Soviet Afghan War, the Falklands War, in which Rapier was deployed, the conflict in Lebanon, Kosovo and Bosnia, the Gulf War, Operation Desert Storm in 1991, and Operation Iraqi Freedom in 1993. The investigation is brought right up to date by a study of the weapons, tactics and engagements seen in the conflicts in Syria and Yemen.
