tornadoes or  
panhandle hook  
blizzards?—Tom  
Jenkins  
Dear Tom, No storm is  
easy to predict and  
each type of storm  
presents ...  
New study shows  
‘ dry ’ Kalahari  
was more  
important to  
human evolution  
than previously  
thought  
La Ni ñ a has  
ended, what is  
next? The problem  
is there's no time of

the year harder to  
make climate  
forecasts than right  
now.  
'Autumn  
predictability barrier'  
means April is the  
toughest month to  
make climate forecasts  
also found that  
extremes are expected  
to become more  
common, with  
periods of especially  
wet or dry weather  
happening more  
frequently. A warmer  
atmosphere can hold  
more water, making  
extremely wet ...  
In the West, Signs  
in the Snow Warn  
That a 20-Year  
Drought Will  
Persist and  
Intensify  
Thursday will pick  
up where  
Wednesday left off,  
with plenty of

sunshine and warm  
air. An upper level  
low-pressure  
system will then  
crawl through the  
Northeast starting  
Friday, lasting until  
...
