Narrating Midlife: Crisis,

Transition, and Transformation is rooted in a discussion about why it is important to address the midlife years in ways that challenge and interrogate the myths that surround this phase of life. Although readers are free to construct their own meaning after reading each narrative, they are encouraged to attend to the ways in which each narrative reveals how the author grapples with their particular issues communicatively. More important, readers are invited to see the power of narrative re-framing as authors seek to understand, interpret and "live" midlife change(s) in ways that are empowering and life affirming. In this book, contributors spin compelling and meaningful narratives about change at midlife. The empty nest, the surprise discovery of cancer, re-defining one's life at midlife and re-imagining long term commitment after divorce are just some of the topics explored in this book. Auto-ethnographically crafted, the narratives presented throughout the book aim to show how managing and living through

change at midlife is very much a communicative endeavor.

The Worthy

A Spare and Unsparing Look at Affliction and Recovery that Heralds a Stunning New Voice The events that began in 1995 might keep happening to me as long as things can happen to me. Think of deep space, through which heavenly bodies fly forever. They fly until they change into new forms, simpler forms, with ever fewer qualities and increasingly beautiful names. There are names for things in spacetime

that are nothing, for things that are less than nothing. White dwarfs, red giants, black holes, singularities. But even then, in their less-than-nothing state, they keep happening. At twenty-one, just starting to comprehend the puzzles of adulthood, Sarah Manguso was faced with another: a wildly unpredictable disease that appeared suddenly and tore through her twenties, vanishing and then returning, paralyzing her for weeks at a time, programming her first to expect nothing from life and then, furiously, to expect everything. In this captivating story, Manguso recalls her nine-year

struggle: arduous blood cleansings, collapsed veins, multiple chest catheters, the deaths of friends and strangers, addiction, depression, and, worst of all for a writer, the trite metaphors that accompany prolonged illness. A book of tremendous grace and self-awareness, *The Two Kinds of Decay* transcends the very notion of what an illness story can and should be.

The Last Vampire

Conrad had it pretty

good in life -- a Porsche, pretty girls, and a trust fund full of oil money. But now, thanks to a brutal hazing incident at Louisiana State University's Gamma Chi fraternity, Conrad is dead -- a nineteen-year-old spirit suddenly without an earthly body. Make no mistake, the newly deceased Conrad is one angry ghost, and the object of his wrath is chapter president Ryan Hutchins, a "big, bright, rising star" who, in Conrad's view, is really "the darkest black hole you'll ever meet -- and I'm not just saying that because he killed me." Conrad's ghostly ability to see all but be seen by no one (except Miss Etta, Gamma Chi's elderly cook, who is gifted with paranormal

powers) confirms his suspicion that Ryan's dark hand has a wide reach, from beating his girlfriend, Maggie Meadows, to terrorizing Sarah Jane Bradford, a religious student who senses that Ryan must be stopped. Out for revenge, Conrad possesses an unsuspecting pledge's body so he can finish what Ryan started, steering them toward a depraved confrontation with a surprising outcome that will leave readers gasping. Good Neighbors Thomas Hoover Celeste Ng and Liane Moriarty's enthralling dissection of suburbia meets Shirley Jackson's creeping dread in this "wickedly funny, unnerving puzzle box of a novel" (Dan Chaon, author of *Ill*

Will) about the downward spiral of a Long Island community after a tragedy exposes its residents' depths of deception. Welcome to Maple Street, a picture-perfect slice of suburban Long Island, its residents bound by their children, their work, and their illusion of safety in a rapidly changing world. But menace skulks among this exclusive enclave. When the Wilde family arrive, they trigger their neighbors' worst fears. Dad Arlo's a gruff has-been rock star with track marks. Mom Gertie's got a thick Brooklyn accent, with high heels and tube tops to match. Their weird kids cuss like sailors. They don't fit with the way Maple Street sees itself. Maple Street's

Queen Bee, Rhea Schroeder—a lonely professor repressing a dark past—initially welcomed Gertie, but relations plummeted during one summer evening, when the new best friends shared too much, too soon. By the time the story opens, the Wildes are outcasts. As tensions mount, a sinkhole opens in a nearby park, and Rhea's daughter Shelly falls inside. The search for Shelly brings a shocking accusation against the Wildes. Suddenly, it is one mom's word against the other's in a court of public opinion that can end only in blood. Riveting and ruthless, *Good Neighbors* is "a chilling, compulsively readable novel that looks toward the future in order to help us understand how

we live now" (Kevin Wilson, author of Nothing to See Here).
