[The Travelling Cat Chronicles Aspect](#) From the New Yorker "20 Under 40" author of *Atmospheric Disturbances* comes a brain-twisting adventure story of a girl named Fred on a quest through a world of fantastical creatures, strange logic, and a powerful prejudice against growing up. Fred and her math-teacher mom are always on the move, and Fred is getting sick of it. She's about to have yet another birthday in a new place without friends. On the eve of turning thirteen, Fred sees something strange in the living room: her mother, dressed for a party, standing in front of an enormous paper lantern—which she steps into and disappears. Fred follows her and finds herself in the Land of Impossibility—a loopily illogical place where time is outlawed, words carry dire consequences, and her unlikely allies are a depressed

white elephant and a pugnacious mongoose mother of seventeen. With her new friends, Fred sets off in search of her mom, braving dungeons, Insult Fish, Fearsome Ferlings, and a mad Rat Queen. To succeed, the trio must find the solution to an ageless riddle. Gorgeously illustrated and reminiscent of *The Phantom Tollbooth* and *The Wonderful Wizard of Oz*, Rivka Galchen's *Rat Rule 79* is an instant classic for curious readers of all ages.

Why is it that some writers struggle for months to come up with the perfect sentence or phrase, while others, hunched over a notepad or keyboard deep into the night, seem unable to stop writing? In *The Midnight Disease: The Drive to Write, Writer's Block, and the Creative Brain* (Houghton Mifflin, January), neurologist Alice W. Flaherty explores the hows and whys of writing, revealing the science behind hypergraphia -- the overwhelming urge to write -- and its dreaded opposite, writer's block. The result is an innovative contribution to our understanding of creative drive, one that throws new light on the work of some of our greatest writers. A neurologist whose work puts her at the forefront of brain science, Flaherty herself suffered from hypergraphia after the loss of her prematurely born twins. Her unique perspective as both doctor and patient helps her make important connections between pain and the drive to

communicate and between mood disorders and the creative muse. Deftly guiding readers through the inner workings of the human brain, Flaherty sheds new light on popular notions of the origins of creativity, giving us a new understanding of the role of the temporal lobes and the limbic system. She challenges the standard idea that one side of the brain controls creative function, and explains the biology behind a visit from the muse. Flaherty writes compellingly of her bout with manic hypergraphia, when "the sight of a computer keyboard or a blank page gave me the same rush that drug addicts get from seeing their freebasing paraphernalia." Dissecting the role of emotion in writing and the ways in which brain-body and mood disorders can lead to prodigious -- or meager -- creative output, Flaherty uses examples from her own life and the lives of writers from Kafka to Anne Lamott, from Sylvia Plath to Stephen King: * Fyodor Dostoevsky, the author of nineteen novels and novellas and voluminous notebooks, diaries, and letters, suffere

[The Midnight Disease](#) Puffin This series will include monographs and collections of studies devoted to the investigation and exploration of knowledge, information and data processing systems of all kinds, no matter whether human, (other) animal, or machine. Its scope is intended to span the full range of interests from classical problems in the philosophy of mind and philosophical psychology through issues in cognitive psychology and sociobiology (concerning the mental capabilities of other species) to ideas related to artificial intelligence and to computer science. While primary

emphasis will be placed upon theoretical, conceptual and epistemological aspects of these problems and domains, empirical, experimental and methodological studies will also appear from time to time. One of the most, if not the most, exciting developments within cognitive science has been the emergence of connectionism as an alternative to the computational conception of the mind that tends to dominate the discipline. In this volume, John Tienson and Terence Horgan have brought together a fine collection of stimulating studies on connectionism and its significance. As the Introduction explains, the most pressing questions concern whether or not connectionism can provide a new conception of the nature of mentality. By focusing on the similarities and differences between connectionism and other approaches to cognitive science, the chapters of this book supply valuable resources that advance our understanding of these difficult issues. "The Mirror in the Mirror" - in the E-Book now also with illustrations by his father Edgar Ende, to whom Michael Ende dedicated this book. It is a fantastic story labyrinth of a very special kind. For the author himself, this work was of great importance: in interviews, he liked to call it his "never-ending story for adult readers." The reader is taken into a mysterious narrative world, full of bizarre situations and mysterious fates, surreal images and philosophical thoughts. Those who open themselves in amazement to these enigmatic visions and allow themselves to be drawn into the fantastic stories will emerge from Michael Ende's magic labyrinth with a new perspective. The core question is: What is reflected in a mirror that is reflected in a mirror? If two readers read the same book, they are still not reading the same thing. For both people immerse themselves into the reading. The book becomes a mirror in which the reader is reflected. But in the same way, the reader is also a mirror in which the book is reflected: The mirror in the mirror refers the reader back to himself. The FAZ, one of the major newspapers in Germany, writes that Michael Ende shows with the book "how much darkness, wildness and rawness is inherent in dreams. He

does not trivialize. His dreams make reference to reality because in dreams, Cicero wrote, 'the remnants of those objects roll and tumble about in the souls which we have thought and impelled while awake'."

What if there was something you could do-something simple, yet so powerful-that could positively influence others and change your life in the process? Critically acclaimed author River Jordan discovered that very thing... As 2009 approached, both of River Jordan's sons were about to go off to war-one to Iraq and the other to Afghanistan-and she was planning a family reunion to see them off. All River could do was pray for her sons' safety and hope to maintain her strength, until she unexpectedly came upon the perfect New Year's resolution-one that focused on others instead of herself. She would pray for a complete stranger every single day of the year. In *Praying for Strangers*, Jordan tells that the discovery that she made along the journey was not simply that her prayers touched the lives of these strangers (in often astounding ways), but that the unexpected connections she made with other people would be a profound experience that would change her life forever.

Are the arguments of the Frankfurt School still relevant? *Modern Culture and Critical Theory* investigates this question in the context of important issues in contemporary cultural politics: neoconservatism and new social movements, discontents with modernity and debates on postmodernism, the political hegemony of Ronald Reagan, and the cultural hegemony of

structuralism and poststructuralism. Russell Berman thoughtfully explores the theories of Horkheimer, Adorno, Benjamin, Lyotard, and Foucault and their relevance to both historical and contemporary issues in literature, politics, and the arts.

"We walked toward the part of the library where the air smelled as if it had been interred for years.... Finally, we got to the hallway where the wooden floor was the creakiest, and we sensed a strange whiff of excitement and fear. It smelled like a creature from a bygone time. It smelled like a dragon." Thirteen-year-old Juan's favorite things in the world are koalas, eating roast chicken, and the summer-time. This summer, though, is off to a terrible start. First, Juan's parents separate and his dad goes to Paris. Then, as if that wasn't horrible enough, Juan is sent away to his strange Uncle Tito's house for the entire break! Uncle Tito is really odd: he has zigzag eyebrows; drinks ten cups of smoky tea a day; and lives inside a huge, mysterious library. One day, while Juan is exploring the library, he notices something inexplicable and rushes to tell Uncle Tito. "The books moved!" His uncle drinks all his tea in one gulp and, sputtering, lets his nephew in on a secret: Juan is a *Princeps Reader*--which means books respond magically to him--and he's the only person capable of finding the elusive, never-before-read *Wild Book*. Juan teams up with his new friend Catalina and his little sister, and together they delve through books that scuttle from one shelf to the next, topple over unexpectedly, or even disappear altogether to find *The Wild Book* and discover its secret. But will they find it before the wicked, story-stealing *Pirate Book* does?
