In 1956, a U.S. lawyer-economist, Louis O. Kelso, created the employee stock ownership plan (ESOP) to enable the employees of a closely held newspaper chain to buy out its retiring owners. Two years later, Kelso and his co-author, the philosopher Mortimer J. Adler, explained the macro-economic theory on which the ESOP is based in this best-selling book, *The Capitalist Manifesto*.

“When you read this book, you must be prepared for a shock—particularly if you are among the millions of Americans who feel complacent about the material well-being that now prevails in this country. *THE CAPITALIST MANIFESTO* will compel you to examine, reconsider and question many dangerous economic factors and political tendencies you have accepted as inevitable—and will show you how you can do something about them. “*THE CAPITALIST MANIFESTO* sets the alarm for all American citizens—not simply one group or class. It is for stockholders, workers, labor leaders, corporation executives, investment bankers, taxpayers, small businessmen and industrialists, statesmen, legislators, judges and educators. Its purpose is to

arouse us to the real and present dangers we now face, from inflation and from the progressive socialization of our economy. What is the difference between a well-heeled existence in a welfare state and the good life in a free society? THE CAPITALIST MANIFESTO will tell you what that difference is, and why you must be a man of property in order to be a free man. It will explain the meaning of your ever-expanding opportunities for leisure. It will tell you that the goal of an industrial society should not be full employment in the production of wealth, but full enjoyment of the wealth produced. It will tell you how you, as an individual, can best use wealth to further the happiness and well-being of yourself and your fellow men." "A revolutionary force in human affairs offering still unplumbed promise for the future...."—Time Magazine

Wageless Life John Wiley & Sons

Haque maintains that the worst decade since the Great Depression is actually a crisis of institutions' ideals inherited from the industrial age. In this bold manifesto, Haque advocates a new set of ideals, and makes an irresistible business case for following the lead of companies that adopt these ideals.

What Then Must We Do? Polity

The Capitalist Manifesto defends capitalism as the world's most

moral and practical social system. This book is written for the rational mind, whether the reader is a professional intellectual or an intelligent layman. It makes the case for individual rights and freedom in terms intelligible to all rational men.

Drawing up alternate ways to "make a living" beyond capitalism To live in this world is to be conditioned by capital. Once paired with Western democracy, unfettered capitalism has led to a shrinking economic system that squeezes out billions of people—creating a planet of surplus populations. Wageless Life is a manifesto for building a future beyond the toxic failures of late-stage capitalism. Daring to imagine new social relations, new modes of economic existence, and new collective worlds, the authors provide skills and tools for perceiving—and living in—a post-capitalist future. "Never before have so many Americans been more frustrated with our economic system, more fearful that it is failing, or more open to fresh ideas about a new one. The seeds of a new economy--and, if we act upon it, a new system--are forming. What is that next system? It's not corporate capitalism, not state socialism, but something else--something entirely American. In *What Then Must We Do?*, Gar Alperovitz speaks directly to the reader about why the time is right for a revolutionary new economy movement, what it means to democratize the ownership of wealth, what it will take to build a new system to replace the decaying one--and how to strengthen our

communities through cooperatives, worker-owned companies, neighborhood corporations, small and medium-size independent businesses, and publicly owned enterprises. For the growing group of Americans pacing at the edge of confidence in the old system, or already among its detractors, *What Then Must We Do?* offers an evolutionary, common-sense solution for moving from despair and anger to strategy and action."--Publisher's website.

The Politics of Subversion U of Minnesota Press

In this manifesto-style book, radical economist and strategist Umair Haque calls for the end of the corrupt business ideals that exemplify business as usual. His passionate vision for "Capitalism 2.0," or "constructive capitalism," is one in which old paradigms of wasteful growth, inefficient competition, and self-destructive ideals are left far behind at this reset moment. According to Haque, the economic crisis was not a market failure or even a financial crisis, but an institutional one. Haque details a holistic five-step plan for both reducing the negative and exploitive nature of the current system and ensuring positive social and economic growth for the future. Haque calls for a reexamination of ideals, and urges business away from competition and rivalries and toward a globally-conscious and constructive model--and a constructive future. Haque argues that companies must learn to orient their business models around: - renewal in order to maximize efficiency - equity in order to maximize productivity - meaning in order to maximize effectiveness

- democracy in order to maximize agility - peace in order to maximize evolvability These new business ideals focus on the human element - not profit exclusively - and are easily tailored for any size or type of business, as long as they are willing to make bold and sustained changes to the current system.

The Future of Capitalism John Wiley & Sons

We need to break free from the capitalist economy. Degrowth gives us the tools to bend its bars. Economic growth isn't working, and it cannot be made to work. Offering a counter-history of how economic growth emerged in the context of colonialism, fossil-fueled industrialization, and capitalist modernity, *The Future Is Degrowth* argues that the ideology of growth conceals the rising inequalities and ecological destructions associated with capitalism, and points to desirable alternatives to it. Not only in society at large, but also on the left, we are held captive by the hegemony of growth. Even proposals for emancipatory Green New Deals or postcapitalism base their utopian hopes on the development of productive forces, on redistributing the fruits of economic growth and technological progress. Yet growing evidence shows that continued economic growth cannot be made compatible with sustaining life and is not necessary for a good life for all. This book provides a vision for postcapitalism beyond growth. Building on a vibrant field of research, it discusses the political economy and the politics of a non-growing economy. It charts a path forward through policies that democratise the economy, "now-topias" that create free spaces for experimentation, and counter-hegemonic movements that make it possible to break with the logic of growth. Degrowth perspectives offer a way to step off the treadmill of an alienating, expansionist, and hierarchical system. A handbook and a manifesto, *The Future*

Is Degrowth is a must-read for all interested in charting a way beyond the current crises.

Against the State: An Anarcho-Capitalist Manifesto diagnoses what is wrong with the American political system and tells us what we need to fix things. The cure is a radical one because, as the book incontrovertibly shows, the many problems that confront us today are no accident. They stem from the nature of government itself. Only peaceful cooperation based on the free market can rescue us from our present plight. Against the State is written by Lew Rockwell, the founder of the Mises Institute and LewRockwell.com, and the closest friend and associate of Murray Rothbard, the leading theorist of anarcho-capitalism. Rockwell applies Rothbard's combination of individualist anarchism and Austrian economics to contemporary America. The book shows how the government is based on war, both against foreign nations and against the American people themselves, through massive invasions of our liberties. Fueled by an out-of-control banking system, the American State has become in essence fascist. We cannot escape our predicament through limited government: the government is incapable of controlling itself. Only a purely private social order can save us, and Rockwell succinctly sets out how an anarcho-capitalist order would work.

Work's Intimacy Harvard Business Press

Latin America has experienced a profound transformation in the first two decades of the 21st century: it has been fully incorporated into the global economy, while excluding regions and populations devalued by the logic of capitalism.

Technological modernization has gone hand-in-hand with the reshaping of old identities and the emergence of new ones.

The transformation of Latin America has been shaped by social movements and political conflicts. The neoliberal model that

dominated the first stage of the transformation induced widespread inequality and poverty, and triggered social explosions that led to its own collapse. A new model, neo-developmentalism, emerged from these crises as national populist movements were elected to government in several countries. The more the state intervened in the economy, the more it became vulnerable to corruption, until the rampant criminal economy came to penetrate state institutions. Upper middle classes defending their privileges and citizens indignant because of corruption of the political elites revolted against the new regimes, undermining the model of neo-developmentalism. In the midst of political disaffection and public despair, new social movements, women, youth, indigenous people, workers, peasants, opened up avenues of hope against the background of darkness invading the continent. This book, written by two leading scholars of Latin America, provides a comprehensive and up-to-date account of the new Latin America that is in the process of taking shape today. It will be an indispensable text for students and scholars in Latin American Studies, sociology, politics and media and communication studies, and anyone interested in Latin America today.

Can Financial Markets be Controlled? John Wiley & Sons

The Global Financial Crisis overturned decades of received wisdom on how financial markets work, and how best to keep them in check. Since then a wave of reform and re-regulation has crashed over banks and markets. Financial firms are regulated as never before. But have these measures been successful, and do they go far enough? In this smart new polemic, former central banker and financial regulator, Howard Davies, responds with a resounding 'no'. The problems at the heart of the financial crisis remain. There is still no effective coordination of international monetary policy. The financial sector is still too big and far from protecting the economy and the tax

payer, recent government legislation is exposing both to even greater risk. To address these key challenges, Davies offers a radical alternative manifesto of reforms to restore market discipline and create a safer economic future for us all.

In this important book, Antonio Negri develops the key ideas that were to form the basis for the highly influential analyses of new forms of power and social struggle presented in Empire and Multitude. He shows how new technology and the break-up of the traditional factory have created new social subjects whose value is no longer tied to their skill. The spread of communication networks and the globalization of production mean that capitalism has become totalized - but not, Negri stresses, monolithic. On the contrary, the possibilities for subversion have correspondingly increased. Going beyond classical Marxism, he shows how old solidarities must be reformulated and new alliances created. The struggles which marked the political end of the twentieth century are now being repeated in a new historical conjuncture, giving rise to new forms of transnational solidarity that can challenge dominant global powers. This new paperback edition, which includes a new Preface by the author, is an excellent introduction to the work of one of the most influential political thinkers writing today and will be essential reading for anyone who wishes to understand the new forms of conflict and struggle that will shape the world in the twenty-first century.

Time is at the forefront of contemporary scholarly inquiry across the natural sciences and the humanities. Yet the social sciences have remained substantially isolated from time-related concerns. This book argues that time should be a key part of

social theory and focuses concern upon issues which have emerged as central to an understanding of today's social world. Through her analysis of time Barbara Adam shows that our contemporary social theories are firmly embedded in Newtonian science and classical dualistic philosophy. She exposes these classical frameworks of thought as inadequate to the task of conceptualizing our contemporary world of standardized time, computers, nuclear power and global telecommunications.

Virtually everyone—left, right, and center—believes that capitalist economies are autonomous, coherent, and regulated by their own internal laws. This view is an illusion. The reality is that economies organized around the pursuit of private profit are contradictory, incoherent, and heavily shaped by politics and governmental action. But the illusion remains hugely consequential because it has been embraced by political and economic elites who are convinced that they are powerless to change this system. The result is cycles of raised hopes followed by disappointment as elected officials discover they have no legitimate policy tools that can deliver what the public wants. In *Capitalism*, leading economic sociologist Fred L. Block argues that restoring the vitality of the United States and the world economy can be accomplished only with major reforms on the scale of the New Deal and the post-World War II building of new global institutions. *Crisis and Inequality* OUP USA

It's not capitalism, it's not neoliberalism - what if it's something worse? In this radical and visionary new book, McKenzie Wark argues that information has empowered a new kind of ruling class. Through the ownership and control of information, this emergent class dominates not only labour but capital as traditionally understood as well. And it's not just tech companies like Amazon and Google. Even Walmart and Nike can now dominate the entire production chain through the ownership of not much more than brands, patents, copyrights, and logistical systems. While techno-utopian apologists still celebrate these innovations as an improvement on capitalism, for workers—and the planet—it's worse. The new ruling class uses the powers of information to route around any obstacle labor and social movements put up. So how do we find a way out? *Capital Is Dead* offers not only the theoretical tools to analyze this new world, but ways to change it. Drawing on the writings of a surprising range of classic and contemporary theorists, Wark offers an illuminating overview of the contemporary condition and the emerging class forces that control—and contest—it. A compelling look at the B Corp movement and why socially and environmentally responsible companies are vital for everyone's future. Businesses have a big role to play in a capitalist society. They can tip the scales toward the benefit of the few, with toxic side effects for all, or they can guide us toward better, more equitable long-term solutions. Christopher Marquis tells the story of the rise of a new corporate form—the B Corporation. Founded by a group of friends who met at Stanford, these companies undergo a rigorous certification

process, overseen by the B Lab, and commit to putting social benefits, the rights of workers, community impact, and environmental stewardship on equal footing with financial shareholders. Informed by over a decade of research and animated by interviews with the movement's founders and leading figures, Marquis's book explores the rapid growth of companies choosing to certify as B Corps, both in the United States and internationally, and explains why the future of B Corporations is vital for us all.

The Capitalist Manifesto Praeger

Spiralling inequality since the 1970s and the global financial crisis of 2008 have been the two most important challenges to democratic capitalism since the Great Depression. To understand the political economy of contemporary Europe and America we must, therefore, put inequality and crisis at the heart of the picture. In this innovative new textbook Mattias Vermeiren does just this, demonstrating that both the global financial crisis and the European sovereign debt crisis resulted from a mutually reinforcing but ultimately unsustainable relationship between countries with debt-led and export-led growth models, models fundamentally shaped by soaring income and wealth inequality. He traces the emergence of these two growth models by giving a comprehensive overview, deeply informed by the comparative and international political economy literature, of recent developments in the four key domains that have shaped the dynamics of crisis and inequality: macroeconomic policy, social policy, corporate governance and financial policy. He goes on to assess the prospects for the emergence of a more egalitarian and sustainable form of democratic capitalism. This fresh and insightful overview of contemporary Western capitalism will be essential reading for all students and scholars of international and comparative political economy.

The idea of finding a 'third way' in politics has been widely discussed over recent months - not only in the UK, but in the US, Continental Europe and Latin America. But what is the third way? Supporters of the notion haven't been able to agree, and critics deny the possibility altogether. Anthony Giddens shows that developing a third way is not only a possibility but a necessity in modern politics.

Labour stands at a decisive point in its history. A change of leadership can help reinvigorate the party, but winning a fourth term of government will be impossible unless Labour's ideological position and policy outlook are thoroughly refurbished. What form should these innovations take?
