The Economist Intelligence

Unit (EIU) has compiled a list of what it regards as the top 10 global risks of 2019. It makes for sobering reading, with a number of active threats to stability and security only likely to get worse before they get any better. “ Geopolitical uncertainty is on the rise and will remain a source of significant risk,” the EIU says in its 2019 global risks report.

The term has two meanings: The economy of the whole planet, i.e., global GDP. GDP stands for G ross D omestic P roduct. The way the world is today, with countries ’ economies so intertwined and interdependent that they all seem like parts of one whole. That ‘ whole ’ we call the ‘ global economy. ’ .
