"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt The Better Angels of Our Nature Cambridge University Press She was a perfect baby, and she had a perfect name. The Value of the Humanities provides a critical account of the principal arguments used to defend the value of the Humanities.

The claims considered are: that the

Humanities study the meaning-making practices of culture, and bring to their work a distinctive understanding of what constitutes knowledge and understanding; that, though useful to society in many ways, they remain laudably at odds with, or at a remove from, instrumental use value; that they contribute to human happiness; that they are a force for democracy; and that they are a good in themselves, to be valued 'for their own sake'. Engaging closely with contemporary literary and philosophical work in the field from the UK and US, Helen Small distinguishes between arguments that retain strong Victorian roots (Mill on happiness; Arnold on use value) and those that have developed or been substantially altered since. Unlike many works in this field, The Value of the Humanities is not a polemic or a manifesto. Its purpose is to explore the grounds for each argument, and to test its validity for the present day. Tough-minded, alert to changing historical conditions for argument and changing styles of rhetoric, it promises to sharpen the terms of the public debate. Health Humanities Reader National Academies Press

Over the past forty years, the health humanities, previously called the medical humanities, has emerged as one of the most exciting fields for interdisciplinary scholarship, advancing humanistic inquiry into bioethics, human rights, health care, and the uses of technology. It has also helped inspire medical practitioners to engage in deeper reflection about the human elements of their practice. In Health Humanities Reader, editors Therese Jones, Delese Wear, and Lester D. Friedman have assembled fifty-four leading scholars, educators, artists, and clinicians to survey the rich body of work that has already emerged from the field—and to imagine fresh approaches to the health humanities in these original essays. The collection's contributors reflect the extraordinary diversity of the field, including scholars from the disciplines of disability studies, history, literature, nursing, religion, narrative medicine, philosophy, bioethics, medicine, and the social sciences. With warmth and humor, critical acumen and ethical insight, Health Humanities Reader truly humanizes the field of medicine. Its accessible language and broad scope offers something for everyone from the experienced medical professional to a reader interested in health and illness.

Writing at the End of the World Wadsworth
As a botanist, Robin Wall Kimmerer has been trained to ask questions of nature with the tools of science. As a member of the Citizen Potawatomi Nation, she embraces the notion that plants and animals are our oldest teachers. In *Braiding Sweetgrass*, Kimmerer brings these two lenses of knowledge together to take us on “ a journey that is every bit as mythic as it is scientific, as sacred as it is historical, as clever as it is wise ” (Elizabeth Gilbert). Drawing on her life as an indigenous scientist, and as a woman, Kimmerer shows how other living beings—asters and goldenrod, strawberries and squash, salamanders, algae, and sweetgrass—offer us gifts and lessons, even if we've forgotten how to hear their voices. In reflections that range from the creation of Turtle Island to the forces that threaten its flourishing today, she circles toward a central argument: that the awakening of ecological consciousness requires the acknowledgment and celebration of our reciprocal relationship with the rest of the living world. For only when we can hear the languages of other beings will we be capable of understanding the generosity of the earth, and learn to give our own gifts in return.

"An engrossing and impossibly wide-ranging project . . . In *The Free World*, every seat is a good one." —Carlos Lozada, *The Washington Post* "The *Free World* sparkles. Fully original, beautifully written . . . One hopes Menand has a sequel in mind. The bar is set very high." —David Oshinsky, *The New York Times Book Review* | Editors' Choice One of The New York Times's 100 best books of 2021 | One of The Washington Post's 50 best nonfiction books of 2021 | A Mother Jones best book of 2021 In his follow-up to the Pulitzer Prize – winning *The Metaphysical Club*, Louis Menand offers a new intellectual and cultural history of the postwar years The Cold War was not just a contest of power. It was also about ideas, in the broadest sense—economic and political, artistic and personal. In *The Free World*, the acclaimed Pulitzer Prize – winning scholar and critic Louis Menand tells the story of American culture in the pivotal years from the end of World War II to Vietnam and shows how changing economic, technological, and social forces put their mark on creations of the mind. How did elitism and an anti-totalitarian skepticism of

passion and ideology give way to a new sensibility defined by freewheeling experimentation and loving the Beatles? How was the ideal of “ freedom ” applied to causes that ranged from anti-communism and civil rights to radical acts of self-creation via art and even crime? With the wit and insight familiar to readers of *The Metaphysical Club* and his New Yorker essays, Menand takes us inside Hannah Arendt ’ s Manhattan, the Paris of Jean-Paul Sartre and Simone de Beauvoir, Merce Cunningham and John Cage ’ s residencies at North Carolina ’ s Black Mountain College, and the Memphis studio where Sam Phillips and Elvis Presley created a new music for the American teenager. He examines the post war vogue for French existentialism, structuralism and post-structuralism, the rise of abstract expressionism and pop art, Allen Ginsberg ’ s friendship with Lionel Trilling, James Baldwin ’ s transformation into a Civil Right spokesman, Susan Sontag ’ s challenges to the New York Intellectuals, the defeat of obscenity laws, and the rise of the New Hollywood. Stressing the rich flow of ideas across the Atlantic, he also shows how Europeans played a vital role in promoting and influencing American art and entertainment. By the end of the Vietnam era, the American government had lost the moral prestige it enjoyed at the end of the Second World War, but America ’ s once-despised culture had become respected and adored. With unprecedented verve and range, this book explains how that happened.

This text blends traditional introductory physics topics with an emphasis on human applications and an expanded coverage of modern physics topics, such as the existence of atoms and the conversion of mass into energy. Topical coverage is combined with the author's lively, conversational writing style, innovative features, the direct and clear manner of presentation, and the emphasis on problem solving and practical applications.

The New Humanities Reader Milkweed Editions
SHORTLISTED for the 2011 Man Booker Prize for Fiction An intense psychological drama that echoes sophisticated entertainments like *Gorky Park* and *The Talented Mr. Ripley*. Nick Platt is a British lawyer working in Moscow in the early 2000s—a place where the cascade of oil money, the tightening grip of the government, the jostling of the oligarchs, and the loosening of Soviet social mores have led to a culture where corruption, decadence, violence, and betrayal define everyday life. Nick doesn ’ t ask too many questions about the shady deals he works on—he ’ s too busy enjoying the exotic, surreally sinful nightlife Moscow has to offer. One day in the subway, he rescues two willowy sisters, Masha and Katya, from a would-be purse snatcher. Soon Nick, the seductive Masha, and long-limbed Katya are cruising the seamy glamour spots of the city. Nick begins to feel something for Masha that he is pleased to think is love. Then the sisters ask Nick to help their aged aunt, Tatiana, find a new apartment. Of course, nothing is as it seems—including this extraordinary debut novel. The twists in the story take it far beyond its noirish frame—the sordid and

vivid portrayal of Moscow serves as a backdrop for a book that examines the irresistible allure of sin, featuring characters whose hearts are as cold as the Russian winter.

The Humanities Reader: Where Literary

Cultures Meet provides students with a

collection of interdisciplinary readings from

various genres that are not usually seen as

interrelated, challenging readers to examine

familiar readings with a new perspective. The

anthology introduces students to the study of

the humanities and its exploration of

humankind. The book is organized into five

distinct units. Unit 1 underscores the

universality, longevity, and value of parables

and fables. Unit 2 spotlights Middle English

writing and the classic frame story with

emphasis on the work of Geoffrey Chaucer.

Unit 3 allows students to explore early short

story writings by Washington Irving and

Nathaniel Hawthorne. Unit 4 exposes readers

to the genre of autobiography, with selections

from two quintessential Black authors,

Frederick Douglass and Langston Hughes.

The final unit examines contemporary works

and themes through Shirley Jackson's "The

Lottery," Toni Cade Bambara's "The Lesson,"

and Zora Neale Hurston's "Sweat." Designed

to help students evaluate their world and

develop their free imagination of the mind,

The Humanities Reader is an ideal resource

for foundational courses within the

discipline.

Literary studies are at a tipping point. ." There is

broad agreement that the discipline is in "crisis" -

that it is aimless, that its intellectual energy is

spent, that all of the trends are bad, and that

fundamental change will be required to set things

right. But there is little agreement on what those

changes should be, and no one can predict

which way things will ultimately tip. Literature,

Science, and a New Humanities represents a

bold new response to the crisis in academic

literary studies. This book presents a total

challenge to dominant paradigms of literary

analysis and offers a sweeping critique of those

paradigms, and sketches outlines of a new

paradigm inspired by scientific theories,

methods, and attitudes.
