My sleep deprivation was affecting every aspect of my life. I read several books on sleep training, as well as blogs and websites. I was at my wits end. After following the program for two weeks, my child was consistently sleeping 11-12 hours a night and was on a consistent schedule during the day! This program has literally given me my life back." - McKel Nielsen "Two months ago I was at the end of my sleep rope with our 6-month-old, boy/girl twins. Exhausted doesn't begin to explain it, I felt desperate. After using the Baby Sleep Trainer Method we feel like we have our lives back. The babies are happy and well rested, and so are we! We have our evenings back to cook dinner, spend time with our 4-year-old daughter, hang out together, and actually do things we enjoy. The process took commitment but has been absolutely worth every bit of it." - Beth Oller, MD "Using the Baby Sleep Trainer Method, my daughter quickly went to a routine nap schedule during the day and sleeping through the night from 6:30pm to 6:30am! Also, rather than the exhausting and often unsuccessful rocking or soothing or feeding to sleep,

we were able to put her down awake in her crib and she would fall asleep on her own in just a few minutes. It was just incredible." - Online Review

The Baby Whisperer gives new parents everything they need to tackle the challenges of sleep, eating habits, tantrums, growth issues, and more! The *Baby Whisperer Solves All Your Problems* is an in-depth look at the most challenging issues faced by parents of babies and

young children today. The book goes beyond the basics introduced in her first two books, becoming a compendium of specific and targeted parenting strategies. Each chapter tackles a different topic, from teaching babies to sleep, feeding techniques, potty training, and much more. Hogg will also discuss her two new Baby Whispering concepts, which are being patient and conscious and learning to detect "prime times"—windows of opportunity for sleep training, introducing bottles (in breast-fed babies), sippy cups, toilet training, and much more. Once you learn how to translate language, the "baby-language" your infant uses to communicate needs, feelings, and opinions, you can see your child for who he or she really is—an understanding that will serve you well as your child blossoms into the toddler years. By helping you establish a daily routine and tailor your parenting strategies according to your child's unique personality and stage of development, Tracy will teach you how to: • Employ the Twelve Principles of Problem Solving—simple troubleshooting techniques for everyday situations • Avoid, or remedy, accidental parenting—inadvertent adult behavior that often leads to such common parenting challenges as sleep problems, poor eating habits, separation anxiety, and tantrums • Identify windows of opportunity for teaching babies how to get to sleep on their own, introducing bottles to breast-fed babies, toilet training, and other growth issues For Tracy's fans, this book will be a welcome addition to the Hogg library; for readers unfamiliar with her philosophy of care, it will open a new world of understanding and insight.

Getting Your Baby to Sleep the Baby Sleep Trainer Way McGraw Hill Professional

"Lyndsey Hookway's Holistic Sleep Coaching is the book parent-child health professionals have been waiting for regarding infants', children's, and parents' sleep! The comprehensive content is comprised of an exhaustive review of the sleep literature, but it is written in a reader-friendly discussion format. (References are cited in text with the complete reference list in APA alphabetical style at the end.) I appreciate Hookway's evidence-based approach with its emphasis on human sleep biology. Yet her words constantly model sensitivity and empathy for both babies/children and their parents who live in our current cultural landscape of isolated nuclear families dependent on two incomes and often miles from physical support." -Karen Kerkhoff Gromada, MSN, RN, IBCLC, FILCA Author: Mothering Multiples: Breastfeeding

and Caring for Twins or More "There is much to like in Hookway's book, including her clear understanding of the link between breastfeeding and sleeping, and the importance of sleep for parental mental health. Educating practitioners about normal infant sleep is an important task. Too many are only aware of extinction methods for addressing parental sleep concerns: with Holistic Sleep Coaching Hookway is laying the groundwork for the development of a more evidence-based and systematic approach." -Helen Ball, Professor of Anthropology, Director of the Durham Infancy & Sleep Centre (DISC), Founder of the Baby Sleep Info Source (Basis) "As a breastfeeding professional, I was curious and hopeful when I began reading Lyndsey Hookway's book, Holistic Sleep Coaching. One of the biggest worries for most new parents is how lack of sleep will impact their family, particularly within the context of breastfeeding. This book is not about training a baby how to sleep, or using dangerous methods that can comprise the breastfeeding relationship. This book IS about understanding how sleep works and how to use that knowledge to understand one's baby. It enables parents to support the uniqueness of their child, continue breastfeeding effectively, and identify how to create the most supportive environment possible to optimize sleep within their distinct family. I would definitely recommend this book as a MUST for new parents before their baby arrives, as well as an integral resource for all perinatal professionals! -Laurel Wilson, IBCLC, RLC, CLE, CLD, CCCECo-Author of The Attachment Pregnancy and The Greatest Pregnancy Ever Infants are probably sleeping no differently now than they were 1000 years ago. However, parenting has changed. We are dealing with the paradox of parenting information overload, coupled with time-poverty. Parents know more than ever about the importance of love, attachment and security to young children. They may know about good nutrition, stress management, toxins, skin to skin, breastfeeding, one-to-one time, emotion coaching and organic food. Parents are bombarded with appliances that are supposed to make their lives easier, and yet end up confused about what is really necessary. At the same time, modern parents are leading busy, expensive lives, and have jobs that they love or need. And within all this, their babies

are still sleeping the same as they always have. Some sleep experts are quick to suggest quick fixes to lengthen infant sleep, but there is growing concern that techniques such as extinction may have negative outcomes for infants as well as being stressful for parents. Holistic Sleep Coaching is a multi-dimensional approach that looks at the big picture and recognises that babies' needs are not just physical but psychological, emotional and relational. Holistic Sleep Coaching provides an evidence-based overview of how to optimise sleep without leaving babies and children to cry for health and child care professionals.

There are two major camps on getting children to sleep through the night. These methods are hotly debated and their oppositional forces can look like a battle scene from Game of Thrones. Arrows fly across internet camps and it all feels a bit life threatening. 1. Cry it out! - Deal breaker for many parents. 2. Do Whatever It Takes, All Day and All Night Long: To get your child the F to sleep. - Deal breaker for those of us who actually need real sleep to function in the real world. There are other more "gentle" approaches. These offer the much coveted "NO Cry" result. No cry - sorry to report - is Fantasy Island. The no cry unicorn baby is, for most of us, a mythological creature. The Compassionate Sleep Solution is a gentle, honest and realistic approach. Because in reality our children rarely have a gentle reaction to our ideas of what is best for them. Eileen Henry is one of the original sleep consultants in the U.S. After working with thousands of families for almost two decades she has developed the best method for dealing with a baby's very natural process of crying as well as the unnatural process of a parent having to listen to it. The Compassionate Sleep Solution will guide you through the process and show you the way to the following reality. Sleep is a developmental skill that all babies and toddlers can learn. Since crying can be a part of that reality, my method will teach you how to calm the cry.
