If you don't believe in letting your baby cry it out, but desperately want to sleep, there is now a third option, presented in Elizabeth Pantley's sanity-saving book *The No-Cry Sleep Solution*. Pantley's successful solution has been tested and proven effective by scores of mothers and their babies from across the United States, Canada, and Europe. Based on her research, Pantley's guide provides you with effective strategies to overcoming naptime and nighttime problems. *The No-Cry Sleep Solution* offers clearly explained, step-by-step ideas that steer your little ones toward a good night's sleep--all with no crying. Use the Persistent Gentle Removal System to teach baby to fall asleep without breast-feeding, bottlefeeding, or using a pacifier

On Becoming Baby Wise Penguin

The *Baby Whisperer* gives new parents everything they need to tackle the challenges of sleep, eating habits, tantrums, growth issues, and more! *The Baby Whisperer Solves All Your Problems* is an in-depth look at the most challenging issues faced by parents of babies and young children today. The book goes beyond the basics introduced in her first two books, becoming a compendium of specific and targeted parenting strategies. Each chapter tackles a different topic, from teaching babies to sleep, feeding techniques, potty training, and much more. Hogg will also discuss her two new Baby Whispering concepts, which are being patient and conscious and learning to detect "prime times"—windows of opportunity for sleep training, introducing bottles (in breast-fed babies), sippy cups, toilet training, and much more. Once you learn how to translate language, the "baby-language" your infant uses to communicate needs, feelings, and opinions, you can see your child for who he or she really is—an understanding that will serve you well as your child blossoms into the toddler years. By helping you establish a daily routine and tailor your parenting strategies according to your child's unique personality and stage of development, Tracy will teach you how to:

- Employ the Twelve Principles of Problem Solving—simple troubleshooting techniques for everyday situations
- Avoid, or remedy, accidental parenting—inadvertent adult behavior that often leads to such common parenting challenges as sleep problems, poor eating habits, separation anxiety, and tantrums
- Identify windows of opportunity for teaching babies how to get to sleep on their own, introducing bottles to breast-fed babies, toilet training, and other growth issues

For Tracy's fans, this book will be a welcome addition to the Hogg library; for readers unfamiliar with her philosophy of care, it will open a new world of understanding and insight.

The Happiest Baby on the Block McGraw Hill Professional "Lyndsey Hookway's Holistic Sleep Coaching is the book parent-child health professionals have been waiting for regarding infants', children's, and parents' sleep! The comprehensive content is comprised of an exhaustive review of the sleep literature, but it is written in a reader-friendly discussion format. (References are cited in text with the complete reference list in APA alphabetical style at the end.) I appreciate Hookway's evidence-based approach with its emphasis on human sleep biology. Yet her words constantly model sensitivity and empathy for both babies/children and their parents who live in our current cultural landscape of isolated nuclear families dependent on two incomes and often miles from physical support." -Karen Kerkhoff Gromada, MSN, RN, IBCLC, FILCA Author: Mothering Multiples: Breastfeeding and Caring for Twins or More "There is much to like in Hookway's book, including her clear understanding of the link between breastfeeding and sleeping, and the importance of sleep for parental mental health. Educating practitioners about normal infant sleep is an important task. Too many are only aware of extinction methods for addressing parental sleep concerns: with Holistic Sleep Coaching Hookway is laying the groundwork for the development of a more evidence-based and systematic approach." -Helen Ball, Professor of Anthropology, Director of the Durham Infancy & Sleep Centre (DISC), Founder of the Baby Sleep Info Source (Basis) "As a breastfeeding professional, I was curious and hopeful when I began reading Lyndsey Hookway's book, Holistic Sleep Coaching. One of the biggest worries for most new parents is how lack of sleep will impact their family, particularly within the context of breastfeeding. This book is not about training a baby how to sleep, or using dangerous methods that can comprise the breastfeeding relationship. This book IS about understanding how sleep works and how to use that knowledge to understand one's baby. It enables parents to support the

uniqueness of their child, continue breastfeeding effectively, and identify how to create the most supportive environment possible to optimize sleep within their distinct family. I would definitely recommend this book as a MUST for new parents before their baby arrives, as well as an integral resource for all perinatal professionals! -Laurel Wilson, IBCLC, RLC, CLE, CLD, CCCECo-Author of The Attachment Pregnancy and The

Greatest Pregnancy Ever Infants are probably sleeping no differently now than they were 1000 years ago. However, parenting has changed. We are dealing with the paradox of parenting information overload, coupled with time-poverty. Parents know more than ever about the importance of love, attachment and security to young children. They may know about good nutrition, stress management, toxins, skin to skin, breastfeeding, one-to-one time, emotion coaching and organic food. Parents are bombarded with appliances that are supposed to make their lives easier, and yet end up confused about what is really necessary. At the same time, modern parents are leading busy, expensive lives, and have jobs that they love or need. And within all this, their babies are still sleeping the same as they always have. Some sleep experts are quick to suggest quick fixes to lengthen infant sleep, but there is growing concern that techniques such as extinction may have negative outcomes for infants as well as being stressful for parents. Holistic Sleep Coaching is a multi-dimensional approach that looks at the big picture and recognises that babies' needs are not just physical but psychological, emotional and relational. Holistic Sleep Coaching provides an evidence-based overview of how to optimise sleep without leaving babies and children to cry for health and child care professionals.
