Years after Ed Chianese's fateful trip into the Kefahuchi Tract, the tract has begun to expand and change in ways we never could have predicted—and, even more terrifying, parts of it have actually begun to fall to Earth, transforming the landscapes they encounter. Not far from Moneytown, in a neighborhood of underground clubs, body-modification chop shops, adolescent contract killers, and sexy streetwalking Monas, you'll find the Saudade Event Site: a zone of strange geography, twisted physics, and frightening psychic onslaughts—not to mention the black and white cats that come pouring out at irregular intervals. Vic Serotonin is a "travel agent" into and out of Saudade. His latest client is a woman who's nearly as unpredictable as the site itself—and maybe just as dangerous. She wants a tour just as a troubling new class of biological artifacts are leaving the site—living algorithms that are transforming the world outside in inexplicable and unsettling ways. Shadowed by a metaphysically inclined detective determined to shut his illegal operation down, Vic must make sense of a universe rapidly veering toward a virulent and viral form of chaos...and a humanity almost lost.

My Education is William S. Burroughs's final collection, first published two years before his death in 1997. It is a book of dreams, written over several decades and as personal and close to a memoir as we will see. The dreams cover themes from the mundane and ordinary -- conversations with his friends Allen Ginsberg or Ian Sommerville, feeding his cats, procuring drugs or sex -- to the erotic, bizarre, and visionary. Always a rich source of imagery in Burroughs's own fiction, in this book, dreams become a direct and powerful force in themselves. "Mr. Burroughs has lost none of his irreverence or wit, but in recent years he has acquired an elegant, elegiac tone." — [The New York Times](#)

Given that the suns of Draco stretch almost sixteen light years from end to end, it stands to reason that the cost of transportation is the most important factor of the 32nd century. And since Illyrion is the element most needed for space travel, Lorq von Ray is plenty willing to fly through the core of a recently imploded sun in order to obtain seven tons of it. The potential for profit is so great that Lorq has little difficulty cobbling together an alluring crew that includes a gypsy musician and a moon-obsessed scholar interested in the ancient art of writing a novel. What the crew doesn't know, though, is that Lorq's quest is actually fueled by a private revenge so consuming that he'll stop at nothing to achieve it. In the grandest manner of speculative fiction, *Nova* is a wise and witty classic that casts a fascinating new light on some of humanity's oldest truths and enduring myths.
