NATIONAL BESTSELLER • The Pulitzer Prize – winning author of *The Sixth Extinction* returns to humanity's transformative impact on the environment, now asking: After doing so much damage, can we change nature, this time to save it? RECOMMENDED BY PRESIDENT OBAMA AND BILL GATES • SHORTLISTED FOR THE WAINWRIGHT PRIZE FOR WRITING • ONE OF THE TEN BEST BOOKS OF THE YEAR: *The Washington Post* • ONE OF THE BEST BOOKS OF THE YEAR: *Time*, *Esquire*, *Smithsonian Magazine*, *Vulture*, *Publishers Weekly*, *Kirkus Reviews*, *Library Journal* • "Beautifully and insistently, Kolbert shows us that it is time to think radically about the ways we manage the environment." —Helen Macdonald, *The New York Times* That man should have dominion "over all the earth, and over every creeping thing that creepeth upon the earth" is a prophecy that has hardened into fact. So pervasive are human impacts on the planet that it's said we live in a new geological epoch: the Anthropocene. In *Under a White Sky*, Elizabeth Kolbert takes a hard look at the new world we are creating. Along the way, she meets biologists who are trying to preserve the world's rarest fish, which lives in a single tiny pool in the middle of the Mojave; engineers who are turning carbon emissions to stone in Iceland; Australian researchers who are trying to develop a "super coral" that can survive on a hotter globe; and physicists who are contemplating shooting tiny diamonds into the stratosphere to cool the earth. One way to look at human civilization, says Kolbert, is as a ten-thousand-year exercise in defying nature. In *The Sixth Extinction*, she explored the ways in which our capacity for destruction has reshaped the natural world. Now she examines how the very sorts of interventions that have imperiled our planet are increasingly seen as the only hope for its salvation. By turns inspiring, terrifying, and darkly comic, *Under a White Sky* is an utterly original examination of the challenges we face.

Pulsars are rapidly spinning neutron stars, the collapsed cores of once massive stars that ended their lives as supernova explosions. In this book, Geoff McNamara explores the history, subsequent discovery and contemporary research into pulsar astronomy. The story of pulsars is brought right up to date with the announcement in 2006 of a new breed of pulsar, Rotating Radio Transients (RRATs), which emit short bursts of radio signals separated by long pauses. These may outnumber conventional radio pulsars by a ratio of four to one. Geoff McNamara ends by pointing out that, despite the enormous success of pulsar research in the second half of the twentieth century, the real discoveries are yet to be made including, perhaps, the detection of the hypothetical pulsar black hole binary system by the proposed Square Kilometre Array - the largest single radio telescope in the world.

Jana McBurney-Lin's debut novel *My Half of the Sky* introduces Li Hui, a modern young Chinese woman of marriageable age who has recently graduated from Xiamen University. Her goal is to realize Mao's words: Women hold up half of the sky. Li Hui struggles with finding love and acting with honor. Guidance and advice come from all corners of her world as well as different and conflicting generational, historical and cultural values. Everyone wants something different for and from her, particularly her parents who mourn their lack of a son while attempting to marry Li to their greatest advantage. In fact most everyone has a selfish investment in what Li Hui will do and whom she might marry. Does this sound like Jane Austen writing about the dilemmas facing young women in China today? You bet. This original and insightful work is in the best traditions of classic novels that explore people caught in the crucible of change in complex cultures. The rewards are rich for the reader, including intriguing insights into folk tales and conventional wisdom of a culture of which few of us have an intimate and timely knowledge.

When Kali falls off the edge of her kingdom and miraculously survives, she is shocked to discover there are still humans on the earth. Determined to get home, Kali entrusts a rugged monster-hunter named Griffin to guide her across a world overrun by chimera, storm dragons, basilisks and other terrifying creatures. The powerful story of the rebuilding of the World Trade Center, featuring dozens of never-before-seen color photos by the official site photographer. In late 2014, One World Trade Center—or the Freedom Tower—opened for business. It took nearly ten years, cost roughly four billion dollars, and required the sweat, strength, and stamina of hundreds of construction workers, digging deep below the earth's surface and dangling high in the air. It suffered setbacks that would've most likely scuttled any other project, including the ousting of a famed architect, the relocation of the building's footprints due to security reasons, and the internecine feuding of various politicians and governing bodies. And yet however over budget and over deadline, it ultimately got built, and today it serves as a 1,776-foot reminder of what America is capable of when we put aside our differences and pull together for a common cause. No writer followed the building of the Freedom Tower more closely than Esquire's Scott Raab. Between 2005 and 2015, Raab published a landmark ten-part series about the construction. He shadowed both the suits in their boardrooms and the hardhats in their earthmoving equipment, and chronicled it all in exquisite prose. While familiar names abound—Andrew Cuomo, Chris Christie, Mike Bloomberg and Larry Silverstein, the real estate developer who only a few weeks before 9/11 signed a ninety-nine-year, \$3.2 billion lease on the World Trade Center—just as memorable are the not-so-famous. People such as Bryan Lyons, a Yonkers-born engineer who lost his firefighter brother on 9/11 and served as a superintendent on the rebuilding effort. And Charlie Wolf, whose wife was killed in the North Tower and who, in one of the series' most powerful scenes, weeps on a policeman's shoulder after delivering her hairbrush and toothbrush for DNA samples. *Once More to the Sky* collects all ten original pieces along with a new epilogue from Raab about what's happened in the years since the Freedom Tower was completed, and why it remains such an important symbol. The four-color book also features dozens of photos—many never-before-seen—and a prologue from photographer Joe Woolhead, the official site photographer for the World Trade Center's rebuilding. Publishing to coincide with the twentieth anniversary of 9/11, it is a moving tribute to American resolve and ingenuity.

NATIONAL BESTSELLER • With stark poignancy and political dispassion *Tightrope* addresses the crisis in working-class America while focusing on solutions to mend a half century of governmental failure. This must-read book from the authors of *Half the Sky* "shows how we can and must do better" (Katie Couric). "A deft and uniquely credible exploration of rural America, and of other left-behind pockets of our country. One of the most important books I've read on the state of our disunion."—Tara Westover, author of *Educated* Drawing us deep into an "other America," the authors tell this story, in part, through the lives of some of the people with whom Kristof grew up, in rural Yamhill, Oregon. It's an area that prospered for much of the twentieth century but has been devastated in the last few decades as blue-collar jobs disappeared. About a quarter of the children on Kristof's old school bus died in adulthood from drugs, alcohol, suicide, or reckless accidents. While these particular stories unfolded in one corner of the country, they are representative of many places the authors write about, ranging from the Dakotas and Oklahoma to New York and Virginia. With their superb, nuanced reportage, Kristof and WuDunn have given us a book that is both riveting and impossible to ignore.

With her award-winning debut novel, *Purple Hibiscus*, Chimamanda Ngozi Adichie was heralded by the Washington Post Book World as the "21st century daughter" of Chinua Achebe. Now, in her masterly, haunting new novel, she recreates a seminal moment in modern African history: Biafra's impassioned struggle to establish an independent republic in Nigeria during the 1960s. With the effortless grace of a natural storyteller, Adichie weaves together the lives of five characters caught up in the extraordinary tumult of the decade. Fifteen-year-old Ugwu is houseboy to Odenigbo, a university professor who sends him to school, and in whose living room Ugwu hears voices full of revolutionary zeal. Odenigbo's beautiful mistress, Olanna, a sociology teacher, is running away from her parents' world of wealth and excess; Kainene, her urbane twin, is taking over their father's business; and Kainene's English lover, Richard, forms a bridge between their two worlds. As we follow these intertwined lives through a military coup, the Biafran secession and the subsequent war, Adichie brilliantly evokes the promise, and intimately, the devastating disappointments that marked this time and place. Epic, ambitious and triumphantly realized, *Half of a Yellow Sun* is a more powerful, dramatic and intensely emotional picture of modern Africa than any we have had before.
