Pulsars are rapidly spinning neutron stars, the collapsed cores of once massive stars that ended their lives as supernova explosions. In this book, Geoff McNamara explores the history, subsequent discovery and contemporary research into pulsar astronomy. The story of pulsars is brought right up to date with the announcement in 2006 of a new breed of pulsar, Rotating Radio Transients (RRATs), which emit short bursts of radio signals separated by long pauses. These may outnumber conventional radio pulsars by a ratio of four to one. Geoff McNamara ends by pointing out that, despite the enormous success of pulsar research in the second half of the twentieth century, the real discoveries are yet to be made including, perhaps, the detection of the hypothetical pulsar black hole binary system by the proposed Square Kilometre Array - the largest single radio telescope in the world.

**NATIONAL BESTSELLER** • With stark poignancy and political dispassion *Tightrope* addresses the crisis in working-class America while focusing on solutions to mend a half century of governmental failure. This must-read book from the authors of *Half the Sky* “shows how we can and must do better” (Katie Couric). "A deft and uniquely credible exploration of rural America, and of other left-behind pockets of our country. One of the most important books I've read on the state of our disunion."—Tara Westover, author of *Educated* Drawing us deep into an “other America,” the authors tell this story, in part, through the lives of some of the people with whom Kristof grew up, in rural Yamhill, Oregon. It's an area that prospered for much of the twentieth century but has been devastated in the last few decades as blue-collar jobs disappeared. About a quarter of the children on Kristof's old school bus died in adulthood from drugs, alcohol, suicide, or reckless accidents. While these particular stories unfolded in one corner of the country, they are representative of many places the authors write about, ranging from the Dakotas and Oklahoma to New York and Virginia. With their superb, nuanced reportage, Kristof and WuDunn have given us a book that is both riveting and impossible to ignore.

Women have played significant roles in ministry and leadership throughout the history of the church and the pages of the Bible. Today, women make up more than half the church, and do much of the mission, ministry, and discipleship in the life of the church. But women have often been held back from ministry roles. Graham Joseph Hill outlines the biblical vision for women in ministry and leadership. He offers a biblical and passionate call for women to be released to teach, to lead, to preach, to serve, to pastor, and to minister in every area of the church. The Bible paints a radical

vision of women, empowered and emboldened for full ministry participation in Christ's church. The biblical vision for women and for their role as teachers, witnesses, disciplers, and leaders transforms not only personal lives, but also the church and the world. This book offers a biblical case for women teaching and leading in the church. Hill then explores practical ways that we can empower and release more female leaders in the church, and ways that we can amplify the voices and honor the gifts of women in the way Jesus intended. Together women and men can revitalize the church and renew the world.
