While the sculpted Ionic frieze of the Parthenon with its galloping horsemen and classically portrayed gods is reproduced in every art history text and has been much studied by scholars, no single book has yet been devoted to all its myriad aspects. This study by classical archaeologist and art historian Jenifer Neils breaks new ground by considering all aspects of this complex and controversial monument. Although the frieze has been studied for over two hundred years, most scholarship has sought an overall interpretation of the iconography rather than focusing on the sculpture's visual language, essential for a full understanding of the narrative. Neils' study not only decodes the language of the frieze, but also analyzes its conception and design, style and content, as well as its impact on later art. Unusual for its wide-ranging approach to the frieze, this book also brings ethical reasoning to bear on the issue of its possible repatriation as part of the on-going Elgin Marble debate. As one of the foremost examples of the high classical style and the finest expression of mid-fifth century Athenian ideology, the Parthenon frieze is without doubt one of the major monuments of western civilization, and as such deserves to be understood in all its dimensions. The accompanying CD-ROM contains a virtual reality Macromedia Director movie of the complete frieze, based on the plaster casts in the Skulpturhalle in Basel, Switzerland. Developed by Rachel Rosenzweig of the Department of Greek and Roman Art of the Cleveland Museum of Art, the casts are arranged in conformity with Neils' reconstruction and enable the user to view them in succession, as if walking around the Parthenon. The CD-ROM requires a computer running either MAC OS 8.01 or later, or Windows 95 or later.

Built in the fifth century b.c., the Parthenon has been venerated for more than two millennia as the West's ultimate paragon of beauty and proportion. Since the Enlightenment, it has also come to represent our political ideals, the lavish temple to the goddess Athena serving as the model for our most hallowed civic architecture. But how much do the values of those who built the Parthenon truly correspond with our own? And apart from the significance with which we have invested it, what exactly did this marvel of human hands mean to those who made it? In this revolutionary book, Joan Breton Connelly challenges our most basic assumptions about the Parthenon and the ancient Athenians. Beginning with the natural environment and its rich mythic associations, she re-creates the development of the Acropolis—the Sacred Rock at the heart of the city-state—from its prehistoric origins to its Periklean glory days as a constellation of temples among which the Parthenon stood supreme. In particular, she probes the Parthenon's legendary frieze: the 525-foot-long relief sculpture that originally encircled the upper reaches before it was partially destroyed by Venetian cannon fire (in the seventeenth century) and most of what remained was shipped off to Britain (in the nineteenth century) among the Elgin marbles. The frieze's vast enigmatic procession—a dazzling pageant of cavalymen and elders, musicians and maidens—has for more than two hundred years been thought to represent a scene of annual civic celebration in the birthplace of democracy. But thanks to a once-lost play by Euripides (the discovery of which, in the wrappings of a Hellenistic Egyptian mummy, is only one of this book's intriguing adventures), Connelly has uncovered a long-buried meaning, a story of human sacrifice set during the city's mythic founding. In a society startlingly preoccupied with cult ritual, this story was at the core of what it meant to be Athenian. Connelly reveals a world that beggars our popular notions of Athens as a city of staid philosophers, rationalists, and rhetoricians, a world in which our modern secular conception of democracy would have been simply incomprehensible. The Parthenon's full significance has been obscured until now owing in no small part, Connelly argues, to the frieze's dismemberment. And so her investigation concludes with a call to reunite the pieces, in order that what is perhaps the greatest single work of art surviving from antiquity may be viewed more nearly as its makers intended. Marshalling a breathtaking range of textual and visual evidence, full of fresh insights woven into a thrilling narrative that brings the distant past to life, *The Parthenon Enigma* is sure to become a landmark in our understanding of the civilization from which we claim cultural descent.

In this study, the analysis of the Parthenon frieze is based on the assumption that the pictorial narrative scenes of the Classical period were conceived with the intention of exemplifying comprehensive patterns of action which were related to ethical values and social status. In this way, it can be shown that - on the west, north, and south side of the frieze - the pictorial narration in several "chapters" demonstrates how the young male Athenians become qualified members of the citizenry, through a multi-stage process of civic education carried out by the democratic polis. The stages of female socialization are visualized on the east side, the goal being the status and responsibilities of a married woman who raises and educates her offspring in an Athenian oikos, as represented in the central scene of the east frieze. The messages of the other Parthenon sculptures, as well as of the colossal statue of Athena in the center of this sacred building, are closely related to this frame of reference. One could claim that the pictorial narrative of the Parthenon frieze is the first comprehensive discourse on democracy. (Series: Hephaistos. While scholars recognize both museums and films as sites where historical knowledge and cultural memory are created, the convergence between their methods of constructing the past has only recently been acknowledged. The essays in *Exhibiting the German Past* examine a range of films, museums, and experiences which blend the two, considering how authentic objects and cinematic techniques are increasingly used in similar ways by both visual media and museums. This is the first collection to focus on the museum-film connection in German-language culture and the first to approach the issue using the concept of "musealization," a process that, because it engages the cultural destruction wrought by modernization, offers new means of constructing historical knowledge and shaping collective memory within and beyond the museum's walls. Featuring a wide range of valuable case studies, *Exhibiting the German Past* offers a unique perspective on the developing relationship between museums and visual media.

*The Builder* was the foremost illustrated architectural journal of the Victorian era. It began regular publication in 1843 and rapidly became influential. Now renamed *Building*, the journal is the UK's longest running business weekly. Originally founded by Joseph Hansom, best known for his famous cab, the journal's editor from 1844 to 1883 was the architect George Godwin. During its first forty years, the journal's illustrations were mainly from wood engravings, although the editor's interest in innovation ensured that new illustrative printing techniques were also tried. The journal's subject matter is broad and international. It includes new and old buildings of all types with associated arts and sciences, such as archaeology, sculpture, building materials and construction methods. Theatres, hospitals, almshouses, workhouses, opera houses and public houses all have their place. Godwin's personal interest in sanitary reform and conservation are well represented, and his visits to Victorian slum housing have full coverage. The 846-page *Illustrations Index* features the full catalogue and six comprehensive indexes to more than 12,000 images published in the journal from 1843 to 1883. The catalogue entries include a digest of the text accompanying the illustrations. The foreword, by HRH The Prince of Wales, is followed by an historical introduction.

Depictions of cross generational relationships have always been present in popular cinema. While such relationships have historically operated within the framework of heteronormativity, and have usually explored cross generational romance in the context of older men/younger women, contemporary depictions have expanded to focus also on taboo configurations of love between older women and younger men and cross generational LGBT coupledness. Contemporary depictions have sought to complicate not only heteronormativity in cross generational relationships, but also to navigate the differences between socially acceptable love and transgressive desire. This collection focuses on the changing values and attitudes of cross generational relationships and addresses the often divisive relationship between the discourses of youth and ageing in popular culture.

This volume presents the proceedings of a conference hosted by the American School of Classical Studies, Athens and the Deutsches Archäologisches Institut, Athens in 2004. There are additional contributions from Patricia Butz, Robin Osborne, Katherine Schwab, Justin St. P. Walsh, Hilda Westervelt and Lorenz Winkler-Horacek. The contents are divided into four sections I. Structure and Ornament; II. Technique and Agency; III. Myth and Narrative and IV. Diffusion and Influence. Highlights include Robin Osborne's discussion of What you can do with a chariot but can't do with a satyr on a Greek temple; Ralf von den Hoff's consideration of the Athenian treasury at Delphi; and Katherine Schwab's presentation of New evidence for Parthenon east metope 14. The papers not only cover a great variety of issues in architectural sculpture but also present a range of case studies from all over the Greek world. The result is an important collection of current research.

Originally published in 1914, Edmonds' book is a succinct introduction to the history, art, literature and geography of ancient Greece from the prehistoric Aegean civilizations to the sack of Corinth by the Romans in 146 BC. Edmonds includes questions at the end of each chapter to stimulate discussion, and the text is augmented by fourteen maps, thirty-seven photographs and five illustrations. This book is still useful as a general introduction to ancient Greece, and will be of additional value to those with an interest in the history of Classical education in England.

Among the most debated archaeological problems is the repatriation of cultural objects that have been removed from the country of origin and then dispersed in Museums around the world. The need for the return of cultural objects to their homelands is not only derived from the people they belong to, but also from those they appreciate their value and have archaeological interest in them. However, there are a number of problems revolved around most cases, which prohibit the cultural repatriation to be achieved. The case of the Parthenon Marbles is one of the best-known claims for the repatriation of cultural property, as its sculptures, which constitute an integral part of it, have been removed from the temple and are stored in different Museums. Towards the problem of cultural repatriation, Parthenon Marbles case study is used to research to what extent the Internet can be introduced as a means of providing a form of cultural repatriation through the idea of a Virtual Museum. The argument is supported by the conception, design and construction of a Virtual Museum for the Parthenon Marbles. The web site is a pilot application implementing some sides of the temple, while providing guidelines and techniques for completion of the rest. The development of the web site also provided an opportunity for evaluating tools and techniques used in virtual museums. Finally, the VR Museum concept as a means of repatriation is evaluated, discussing the areas where such an application would be beneficial and also the level of information that can provide for the specified repatriated object(s) according to specific user groups and needs.

The *Handbook of Greek Sculpture* aims to provide a detailed examination of current research and directions in the field. Bringing together an international cast of contributors from Greece, Italy, France, Great Britain, Germany, and the United States, the volume incorporates new areas of research, such as the sculptures of Messene and Macedonia, sculpture in Roman Greece, and the contribution of Greek sculptors in Rome, as well as important aspects of Greek sculpture like techniques and patronage. The written sources (literary and epigraphical) are explored in dedicated chapters, as are function and iconography and the reception of Greek sculpture in modern Europe. Inspired by recent exhibitions on Lysippos and Praxiteles, the book also revisits the style and the personal contributions of the great masters.

Before they were written down, the poems attributed to Homer were performed orally, usually by rhapsodes (singers/reciters) who might have traveled from city to city or enjoyed a position in a wealthy household. Even after the *Iliad* and the *Odyssey* were committed to writing, rhapsodes performed the poems at festivals, often competing against each other. As they recited the epics, the rhapsodes spoke as both the narrator and the characters. These different acts—performing the poem and narrating and speaking in character within it—are seldom studied in tandem. *Homer in Performance* breaks new ground by bringing together all of the speakers involved in the performance of Homeric poetry: rhapsodes, narrators, and characters. The first part of the book presents a detailed history of the rhapsodic performance of Homeric epic from the Archaic to the Roman Imperial periods and explores how performers might have shaped the poems. The second part investigates the Homeric narrators and characters as speakers and illuminates their interactions. The contributors include scholars versed in epigraphy, the history of art, linguistics, and performance studies, as well as those capable of working with sources from the ancient Near East and from modern Russia. This interdisciplinary approach makes the volume useful to a spectrum of readers, from undergraduates to veteran professors, in disciplines ranging from classical studies to folklore.
