Privilege Through the Looking-Glass Taylor & Francis

Winner, 2019 William J. Goode Book Award, given by the Family Section of the American Sociological Association Finalist, 2019 C.

Wright Mills Award, given by the Society for the Study of Social Problems Riveting stories of how affluent, white children learn about race American kids are living in a world of ongoing public debates about race, daily displays of racial injustice, and for some, an increased awareness surrounding diversity and inclusion. In this heated context, sociologist Margaret A. Hagerman zeroes in on affluent, white kids to observe how they make sense of privilege, unequal educational opportunities, and police violence. In fascinating detail, Hagerman considers the role that they and their families play in the reproduction of racism and racial inequality in America. White Kids, based on two years of research involving in-depth interviews with white kids and their families, is a clear-eyed and sometimes shocking account of how white kids learn about race. In doing so, this book explores questions such as, "How do white kids learn about race when they grow up in families that do not talk openly about race or acknowledge its impact?" and "What about children growing up in families with parents who consider themselves to be 'anti-racist'?" Featuring the actual voices of young, affluent white kids and what they think about race, racism, inequality, and privilege, White Kids illuminates how white racial socialization is much more dynamic, complex, and varied than previously recognized. It is a process that stretches beyond white parents'

explicit conversations with their white children and includes not only the choices parents make about neighborhoods, schools, peer groups, extracurricular activities, and media, but also the choices made by the kids themselves. By interviewing kids who are growing up in different racial contexts—from racially segregated to meaningfully integrated and from politically progressive to conservative—this important book documents key differences in the outcomes of white racial socialization across families. And by observing families in their everyday lives, this book explores the extent to which white families, even those with anti-racist intentions, reproduce and reinforce the forms of inequality they say they reject.

HarperCollins UK

Accent on Privilege looks at the complexities of immigration, asking how native and immigrant construct race, gender, class and national identity.

Katharine Jones investigates how white English immigrants live in the United States and how they use their status as privileged foreigners to gain the upper hand with Americans. Their privilege, she finds, is created by both American Anglophilia and the ways they perform their identities as "proper" English women and men in their host country. Jones looks at the cultural aspects of this performance: how English people play up their accents, "stiff upper lip," sense of humor and fashion - even the way they drink beer. The political and cultural ties between England and the US act as a backdrop for the identity negotiations of these English people, many of whom do not even consider themselves to be immigrants. This unique exploration of the workings of white privilege offers an important new understanding of the paradoxes of how class, gender, and race

are formed in the US and, by implication, in the UK. Author note: Katharine W. Jones is Assistant Professor of Sociology at Philadelphia University.

Privilege Through the Looking-Glass is a collection of original essays that explore privilege and status characteristics in daily life. This collection seeks to make visible that which is often invisible. It seeks to sensitize us to things we have been taught not to see. Privilege, power, oppression, and domination operate in complex and insidious ways, impacting groups and individuals. And yet, these forces that affect our lives so deeply seem to at once operate in plain sight and lurk in the shadows, making them difficult to discern. Like water to a fish, environments are nearly impossible to perceive when we are immersed in them. This book attempts to expose our environments. With engaging and powerful writing, the contributors share their personal stories as a means of connecting the personal and the public. This volume applies an intersectional perspective to explore how race, class, gender, sexuality, education, and ableness converge, creating the basis for privilege and oppression. Privilege Through the Looking-Glass encourages readers to engage in self and social reflection, and can be used in a range of courses in sociology, social work, communication, education, gender studies, and African American studies. Each chapter includes discussion questions and/or activities for further engagement. "Privilege Through the Looking-Glass offers a varied and profound examination of how privilege functions as the underside of power. This is a powerful and important book about inequality, identity, agency, and the challenge of addressing difference as part of a democratic ethos in a time of growing authoritarianism all over the world. Every

educator should read this book." – Henry A. Giroux, Professor, McMaster University "A courageous volume that blends theory, personal experiences, and reflections on contemporary debates over identity. This is a book that is more about the politics of identity than identity politics. It is a powerful testament to the urgency of understanding privilege and deserves to be read widely." – Peter McLaren, Distinguished Professor, Chapman University "Privilege Through the Looking-Glass unmasks the casual 'isms' that suppress the best aspects of our humanity, by assembling a powerful and honest collection of parables. Poignant and unflinching, the contributors eschew to the cloak of objectivism to give the hard truth about privilege as a social ill, and the collective responsibility of the conscious community to confront all forms of oppression... this book has lessons for anyone with the spirit to explore better ways to be themselves and relate to others." – Ivory A. Toldson, Professor, Howard University, and Editor-in-Chief for The Journal of Negro Education Patricia Leavy, Ph.D., is an award-winning independent sociologist and best-selling author.

Power and Privilege in the Learning Sciences HarperCollins

Psychologist Madeline Levine, author of the New York Times bestseller *The Price of Privilege*, brings together cutting-edge research and thirty years of clinical experience to explode once and for all the

myth that good grades, high test scores, and college acceptances should define the parenting endgame. Parents, educators, and the media wring their hands about the plight of America's children and teens—soaring rates of emotional problems, limited coping skills, disengagement from learning and yet there are ways to reverse these disheartening trends. *Teach Your Children Well* acknowledges that every parent wants successful children. However, until we are clearer about our core values and the parenting choices that are most likely to lead to authentic, and not superficial, success, we will continue to raise exhausted, externally driven, impaired children who believe they are only as good as their last performance. Real success is always an inside job, argues Levine, and is measured not by today's report card but by the people our children become fifteen or twenty years down the line. Refusing to be diverted by manufactured controversies such as "tiger moms versus coddling moms," Levine confronts the real issues behind the way we push some of our kids to the breaking point while dismissing the talents and interests of many others. She shows us how to shift our focus from the excesses of hyperparenting and the unhealthy reliance on our children for status and meaning to a parenting style that concentrates on both enabling academic success as well as developing a sense of purpose, well-being, connection, and meaning in our children's lives. *Teach Your Children Well* is a call to action. And while it takes courage to make the changes we believe in, the time has come, says Levine, to return our overwrought families to a healthier and saner version of themselves.

Engines of Privilege Routledge

Progressives have taught us that it doesn ' t take overt discrimination to make society unfair. Privilege afforded to different groups—such as whites, males, and heterosexuals—can infect

our cultural institutions, creating unfair burdens for other groups. But one form of privilege has been overlooked: progressive privilege. Today, the progressive worldview is depicted as what is normal, right, and worth celebrating by our cultural institutions. Conservatives are marginalized and stereotyped in entertainment, news, academia, and throughout our culture. Progressive privilege isn't just unfair to conservatives; it has warped our entire political environment and made our country more divided. Recognizing progressive privilege is the first step to ending it, so that we can have a fairer, more truly inclusive society.

White Privilege: Psychoanalytic

Perspectives looks at race and the significant role it plays in society and in clinical practice. Much of the effort going into racial consciousness-raising rests on the concept of unearned "white privilege". In this book, Neil Altman looks deeply into this notion, suggesting that there are hidden assumptions in the idea of white privilege that perpetuate the very same racially prejudicial notions that are purportedly being dismantled. The book examines in depth the structure of racial categories, polarized between white and black, that are socially constructed, resting on fallacious ideas of physical or psychological differences among peoples. Altman also critically examines such related concepts as privilege, guilt, and power. It is suggested that political positions are also artificially polarized into categories of "liberal", "left" and "conservative", "right", in ways that contribute to stereotyping between people with different political leanings, foreclosing mutual respect, dialogue, and understanding. Finally, **White Privilege: Psychoanalytic Perspectives** explores the implications for the theory and practice of psychoanalytic psychotherapy, discussing these ideas in detail and depth with clinical illustrations. Drawing on Altman's rich clinical experience and many years of engaging with racial and societal problems, this book offers a new agenda for understanding and offering analytic practice in contemporary society. It will appeal to clinicians, psychoanalytic therapists, and anyone with an interest in social problems and how they manifest in society and in therapy today.

The Class Ceiling Tyndale House Publishers, Inc.

Is the American dream that exists for the middle class equally available to the working class? Using extensive interviews with parents and a variety of data sources, this book examines how social contexts and culture affect parenting decisions. By analyzing class differences in neighborhoods, schools, and networks, as well as their relationship to mobility-related parenting practices, the authors demonstrate that cultural differences are no match for economic inequalities. They show how middle-class parents have access to social contexts characterized by security, which gives rise to what the authors call "strategic parenting"--a set of practices that allow adolescents to develop the qualities and skills they will use to go off to college and, subsequently, achieve the American dream. Conversely, the contexts of working-class parents are characterized by precarity, giving rise to "defensive parenting"--an almost frantic use of harm-mitigating interventions to protect adolescents from threats to both their well-being and prospects for mobility. This important book calls for a shift in public policy away from trying to change working-class parents to improving the social contexts in which society asks them to raise the next generation. Book Features: An explanation for social class differences in educationally

relevant, mobility-related parenting practices that contrasts with the dominant cultural explanation. Research findings that are informed by a variety of data sources, including interview data, survey data, social network data, census data, and crime statistics. Two new parenting concepts--strategic parenting and defensive parenting--that capture how middle-class and working-class parents pursue social mobility for their children.

Privilege and Punishment Random House

A rigorous, compelling and balanced examination of the British public school system and the inequalities it entrenches. Private schools are institutions that children who are already privileged attend and have those privileges further entrenched, almost certainly for life, through a high-quality, richly-resourced education. The Engines of Privilege contends that in a society that mouths the virtues of equality of opportunity, of fairness and of social cohesion, the continuation of this educational apartheid amounts to an act of national self-harm that does all of us serious damage.

Intrinsic to any vision of the future of Britain has to be the nature of our educational system. Yet the quality of conversation on the issue of private education remains surprisingly sterile, patchy and highly subjective. Accessible, evidence-based and inclusive, Engines of

Privilege aims to kick-start a long overdue national debate. Clear, vigorous prose is combined with forensic analysis to compelling effect, illuminating the painful contrast between the importance of private schools in British society and the near-absence of serious, policy-making debate, above all on the left.

How the attorney-client relationship favors the privileged in criminal court—and denies justice to the poor and to working-class people of color The number of Americans arrested, brought to court, and incarcerated has skyrocketed in recent decades. Criminal defendants come from all races and economic walks of life, but they experience punishment in vastly different ways. Privilege and Punishment examines how racial and class inequalities are embedded in the attorney-client relationship, providing a devastating portrait of inequality and injustice within and beyond the criminal courts. Matthew Clair conducted extensive fieldwork in the Boston court system, attending criminal hearings and interviewing defendants, lawyers, judges, police officers, and probation officers. In this eye-opening book, he uncovers how privilege and inequality play out in criminal court interactions. When disadvantaged defendants try to learn their legal rights and advocate for themselves, lawyers and judges often silence, coerce, and punish them. Privileged defendants, who are more likely to trust their defense attorneys, delegate authority to their lawyers, defer to judges, and are rewarded for their compliance. Clair shows how attempts to exercise legal rights often backfire on the poor and on working-class people of color, and how effective legal representation alone is no guarantee of justice. Superbly written and powerfully argued, Privilege and Punishment draws needed attention to the injustices that are perpetuated by the attorney-client relationship in today’s criminal courts, and describes the reforms needed to correct them.

In recent years, numerous studies have shown that bright, charming, seemingly confident and socially skilled teenagers from affluent, loving families are experiencing epidemic rates of depression, substance abuse, and anxiety disorders—rates higher than in any other socioeconomic group of American adolescents. Materialism, pressure to achieve, perfectionism, and disconnection are combining to create a perfect storm that is devastating children of privilege and their parents alike. In this eye-opening, provocative, and essential book, clinical psychologist Madeline Levine explodes one child-rearing myth after another. With empathy and candor, she identifies toxic cultural influences and well-intentioned, but misguided, parenting practices that are detrimental to a child's healthy self-development. Her thoughtful, practical advice provides solutions that will enable parents to help their emotionally troubled "star" child cultivate an authentic sense of self.
