Ansel Adams Ansel Adams

Ansel Adams is best known for a series of photographs he produced of America's natural heritage known collectively as the National Park Service Photographs, representative examples of which are reproduced here. This assignment was especially commissioned in 1941 by Harold Ickes of the United States Department of the Interior and the aim was to record for posterity areas that had been designated national parks, as well as portraying the Native American homelands and other monuments and areas of reclamation of the great American wilderness. These would also be used as photo-murals to decorate the walls of the Department of the Interior. Ickes was already familiar with Ansel's work having seen detailed studies of leaves and ferns which featured in an exhibition of 1936. Indeed, he liked them so much that he hung one in his own office. He eventually made Ansel's acquaintance when the photographer came to lobby Congress, seeking to have Kings River Canyon, California designated a national park. Originally, only painted murals by established artists were thought suitable for inclusion in the Mural Project, as it came to be known, as photography had yet to be considered worthy of being regarded as an art form, rather than a way of recording or documenting reality; but Ickes was convinced that Ansel's work was artistically valid and would make its own inimitable contribution to the scheme. The collection of works commissioned in 1941 was intermixed with earlier studies of the Kings Canyon area dating back to 1936, and these and the new prints were offered as part of the commission. The photographs are a pictorial testament to the majesty of the American West, captured with technical accuracy and imbued with sheer inventiveness and a deep empathy for the regions which Ansel sought to protect and maintain intact. They range from rivers and canyons, close-ups of plant life, Native American villages and their inhabitants, the mysterious and enigmatic underworld of the Carlsbad Caverns and the geysers and twisted forms of Yellowstone National Park. Together, they offer a visual feast and a source of delight and nourishment for the spirit.

A deluxe, oversized book timed for the 150th anniversary of Abraham Lincoln's signing of the Yosemite Grant, an event that laid the groundwork for the National Parks system. Ansel Adams first visited Yosemite in 1916, at the age of fourteen, and returned every year throughout his life. It was in Yosemite that he fell in love with Western wilderness and became a photographer; he made more photographs at Yosemite than at any other place. Roughly 150 breathtaking images are exquisitely reproduced in this large-format clothbound book. There are notable portraits of El Captain (the famous rock face whose Dawn Wall was recently free-climbed for the first time), Half Dome, Cathedral Rocks, Royal Arches, and other distinctive rock formations that frame the valley; grand views in all seasons and all states of weather; intimate details of nature from the Valley floor; the waterfalls--Bridaveil, Yosemite, Vernal, Nevada; studies of trees, from the giants of the Mariposa Grove to the exquisite white blossoms of the dogwood. There are gathering and clearing storms,

snow and ice, bright sunshine, and the subtle shades of dawn and dusk. The photographs have been selected and sequenced by Peter Galassi, former Chief Curator of Photography at The Museum of Modern Art, New York. His abundantly illustrated introduction sets Adams's pictures within the rich history of imagery of Yosemite.

In commemoration of the one-hundredth anniversary of his birth, Ansel Adams at 100 presents an intriguing new look at this distinguished photographer's work. The legendary curator John Szarkowski, director emeritus of the Department of Photography at New York's Museum of Modern Art, has painstakingly selected what he considers Adams' finest work and has attempted to find the single best photographic print of each. Szarkowski writes that "Ansel Adams at 100 is the product of a thorough review of work that Adams, at various times in his career, considered important. It includes many photographs that will be unfamiliar to lovers of Adams' work, and a substantial number that will be new to Adams scholars. The book is an attempt to identify that work on which Adams' claim as an important modern artist must rest." Ansel Adams at 100—the highly acclaimed international exhibition and the book, with Szarkowski's incisive critical essay—is the first serious effort since Adams' death in 1984 to reevaluate his achievement as an artist. The exhibition prints, drawn from important public and private collections, have been meticulously reproduced in tritone to create the splendid plates in this edition, faithfully rendering the nuances of the original prints. Ansel Adams at 100 is destined to be the definitive book on this great American artist. John Szarkowski is director emeritus of the Department of Photography, The Museum of Modern Art, New York. He is the author of such classic works as *Looking at Photographs*, *The Photographer's Eye*, *Photography Until Now*, and *Atget*, as well as several books of his own photographs, including the recently reissued *The Idea of Louis Sullivan*.

These photographs, the Yosemite Special Edition Prints, form the core of this essential volume. Adams' luminous images of Yosemite's unique rock formations, waterfalls, meadows, trees, and nature details are among the most distinctive of his career.
