As a botanist, Robin Wall Kimmerer has been trained to ask questions of nature with the tools of science. As a member of the Citizen Potawatomi Nation, she embraces the notion that plants and animals are our oldest teachers. In *Braiding Sweetgrass*, Kimmerer brings these two lenses of knowledge together to take us on “ a journey that is every bit as mythic as it is scientific, as sacred as it is historical, as clever as it is wise ” (Elizabeth Gilbert). Drawing on her life as an indigenous scientist, and as a woman, Kimmerer shows how other living beings—asters and goldenrod, strawberries and squash, salamanders, algae, and sweetgrass—offer us gifts and lessons, even if we've forgotten how to hear their voices. In reflections that range from the creation of Turtle Island to the forces that threaten its flourishing today, she circles toward a central argument: that the awakening of ecological consciousness requires the acknowledgment and celebration of our reciprocal relationship with the rest of the living world. For only when we can hear the languages of other beings will we be capable of understanding the generosity of the earth, and learn to give our own gifts in return.

DIV In her entertaining and edifying New York Times bestseller, acclaimed author Francine Prose invites you to sit by her side and take a guided tour of the tools and tricks of the masters to discover why their work has endured. Written with passion, humour and wisdom, *Reading Like a Writer* will inspire readers to return to literature with a fresh eye and an eager heart — to take pleasure in the long and magnificent sentences of Philip Roth and the breathtaking paragraphs of Isaac Babel; to look to John le Carr é for a lesson in how to advance plot through dialogue and to Flannery O ' Connor for the cunning use of the telling detail; to be inspired by Emily Bront ë ' s structural nuance and Charles Dickens ' s deceptively simple narrative techniques. Most importantly, Prose cautions readers to slow down and pay attention to words, the raw material out of which all literature is crafted, and reminds us that good writing comes out of good reading. /div

Scorched Earth is the first book to chronicle the effects of chemical warfare on the Vietnamese people and their environment, where, even today, more than 3 million people—including 500,000 children—are sick and dying from birth defects, cancer, and other illnesses that can be directly traced to Agent Orange/dioxin exposure. Weaving first-person accounts with original research, Vietnam War scholar Fred A. Wilcox examines long-term consequences for future generations, laying bare the ongoing monumental tragedy in Vietnam, and calls for the United States government to finally admit its role in chemical warfare in Vietnam. Wilcox also warns readers that unless we stop poisoning our air, food, and water supplies, the cancer epidemic in the United States and other countries will only worsen, and he urgently demands the chemical manufacturers of Agent Orange to compensate the victims of their greed and to stop using the Earth's rivers, lakes, and oceans as toxic waste dumps. Vietnam has chosen August 10—the day that the US began spraying Agent Orange on Vietnam—as Agent Orange Day, to commemorate all its citizens who were affected by the deadly chemical. *Scorched Earth* will be released upon the third anniversary of this day, in honor of all those whose families have suffered, and continue to suffer, from this tragedy.
