It is essentially a complete and up-to-date course in college level Modern World History, but presented as a graphic novel. In an engaging and humorous graphic style, Larry Gonick covers the history, personalities and big topics that have shaped our universe over the past five centuries, including the Industrial Revolution, the American Revolution, the Russian Revolution, the evolution of political, social, economic, and scientific thought, Communism, Fascism, Nazism, the Cold War,

Globalization--and much more. Volume I of the Cartoon History of the Modern World picks up from Gonick's award winning Cartoon History of the Universe Series. That series began with the Big Bang and ended with Christopher Columbus sailing for the New World. This book starts off with peoples that Columbus "discovered" and ends with the U.S. Revolution. **MOSAICS - Color by Number Book** Harper Collins Memoir in cartoons by the longtime cartoon editor of The New Yorker People tell Bob Mankoff that as the cartoon editor of The New Yorker he has the best job in the world. Never one to beat around the bush, he explains to us, in the opening of this singular, delightfully eccentric book, that because he is also a cartoonist at the magazine he actually has two of the best jobs in the world. With the help of myriad images and his funniest, most beloved cartoons, he traces his love of the craft all the way back to his childhood, when he started doing funny drawings at the age of eight. After meeting his mother, we follow his unlikely stints as a high-school basketball star, draft dodger, and sociology grad student. Though Mankoff abandoned the study of psychology in the seventies to become a cartoonist, he recently realized that the field he abandoned could help him better understand the field he was in, and here he takes up the psychology of cartooning, analyzing why some cartoons make us laugh and others don't. He allows us into the hallowed halls of The New Yorker to show us the soup-to-nuts

process of cartoon creation, giving us a detailed look not only at his own work, but that of the other talented cartoonists who keep us laughing week after week. For desert, he reveals the secrets to winning the magazine's caption contest. Throughout *How About Never--Is Never Good for You?*, we see his commitment to the motto "Anything worth saying is worth saying funny."

“ I've always looked upon cartooning as comedy ’ s last frontier. I have done stand-up, sketches, movies, monologues, awards show introductions, sound bites, blurbs, talk show appearances, and tweets, but the idea of a one-panel image with or without a caption mystified me. I felt like, yeah, sometimes I ’ m funny, but there are these other weird freaks who are actually funny. You can understand that I was deeply suspicious of these people who are actually funny. ” So writes the multitalented comedian Steve Martin in his introduction to *A Wealth of Pigeons: A Cartoon Collection*. In order to venture into this lauded territory of cartooning, he partnered with the heralded New Yorker cartoonist Harry Bliss. Steve shared caption and cartoon ideas, Harry provided impeccable artwork, and together they created this collection of humorous cartoons and comic strips, with amusing commentary about their collaboration throughout. The result: this gorgeous, funny, singular book, perfect to give as a gift or to buy for yourself.

“ The historian, ” wrote E. L. Doctorow, “ will tell you what happened. The novelist will tell you what it felt like. ” This book sees Peter Hennessy and Robert Shepard combine both approaches with the art of the interviewer, a craft at once sensitive and probing. *Reflections* collects transcripts of the best interviews from the BBC Radio 4 series *Reflections* with Peter Hennessy, a show on which the British political elite have spoken candidly about their careers and the moments that came to define their political lives. Supplementing the interviews are short

biographies and profiles of the interviewees, allowing readers a fuller picture of each speaker ’ s background and professional trajectory. This revealing book includes conversations with political heavyweights such as former prime minister John Major; former foreign secretaries Margaret Beckett, David Owen, and Jack Straw; Labour Party leader Neil Kinnock; Liberal Party leader David Steel; and chancellor of exchequer Nigel Lawson. In addition, *Reflections* presents interviews with leading women, including Shirley Williams and Clare Short, who spent years at the forefront of their parties in Westminster. From a longtime New Yorker staff cartoonist, an evocative family memoir, a love letter to New York City, and a delightful exploration of the origins of creativity—richly interleaved with the author ’ s witty, beloved cartoons *A wry and brilliantly observed portrait of the budding young cartoonist and his Upper West Side Jewish family in the age of JFK and Sputnik. Sipress, a dreamer and obsessive drawer, goes hazy when it comes to the ceaselessly imparted lessons-on-life from his father, the meticulous, upwardly mobile proprietor of Revere Jewelers, and in the face of the angsty expectations of his migraine-prone mother. With self-deprecation, wit, and artistry, Sipress paints his hapless place in his indelibly dysfunctional family, from the time he was tricked by his unreliable older sister into rocketing his pet turtle out his twelfth-floor bedroom window, to the moment he walks away from a Harvard PhD program in Russian history to begin his journey as a*

professional cartoonist. In *What ’ s So Funny?*—reminiscent of the masterly, humane recall of Roger Angell and the brainy humor of Roz Chast—Sipress's cartoons appear with spot-on precision, inducing delightful Aha moments in answer to the perennial question aimed at cartoonists: Where do you get your ideas?

We are constantly learning, either we want or not. Learning is very natural to our brains, and it is (or it should be) enjoyable. What is the best way then to learn about effective learning? Making the process simple and fun. Cartoons are a very effective method because we learn with stories, we learn with observations and being part of a narrative. This is the idea of the authors, Harvard Professor and neuroscientist Felipe Fregni and Federal University of Sao Paulo Professor of Systems Thinking Joao Arantes, when they got together to write this cartoon book about learning and how to use this knowledge in teaching practices. This book follows the book of Critical Thinking in Teaching and Learning (Felipe Fregni, 2019) and in 191 cartoons the authors show using funny and simple illustrations the basic neural principles of learning (including the basic principles of neuroplasticity, how we encode new information, the attentional system and learning, memory and learning, the critical importance of our motivation system and how to activate that in educational programs, how stress affect (or help) learning and the use of social interaction in educational programs) and how to apply these principles for teaching (including teaching methods (student-centered vs. teacher-centered methods), online teaching, teaching critical thinking and assessments). We all need to become better learners, especially in a society when fact memorization is no longer important. This book is, therefore, an essential guide to every student and teacher looking to improving their own and their students learning experience.
