The Kneebone Boy Hodder & Stoughton

In an entertaining cross between Babe and Marley & Me, a family of six (plus a dog, cat, and several chickens) decides to invite two mini-pigs into their chaotic household. Matt Whyman enjoyed a quiet writer's life in the English countryside . . . until his career wife, Emma, discovered the existence of a pig said to fit inside a handbag. She believes not one but two would be a perfect addition to the already diverse Whyman clan, which includes a dog, a cat, a gaggle of chickens, as well as four children. Nobody could have anticipated the misadventures two little piglets could bring. From stealing his spot on the family sofa to trashing his neighbor's garden while drunk on fermented apples, Butch and Roxi swiftly establish themselves as "animals of mass distraction." Funny, touching, and endlessly entertaining, Oink charts the battle of hearts, snouts, and minds between a family man and two mini-pigs.

The Wanderer HarperCollins

"An unforgettable look at the peculiar horrors and humiliations involved in solitary confinement" from the prisoners who have survived it (New York Review of Books). On any given day, the United States holds more than eighty-thousand people in solitary confinement, a punishment that—beyond fifteen days—has been denounced as a form of cruel and degrading treatment by the UN Special Rapporteur on Torture. Now, in a book that will add a startling new dimension to the debates around human rights and prison reform, former and current prisoners describe the devastating effects of isolation on their minds and bodies, the solidarity expressed between individuals who live side by side for years without ever meeting one another face to face, the ever-present specters of madness and suicide, and the struggle to maintain hope and humanity. As Chelsea Manning wrote from her own solitary confinement cell, "The personal accounts by prisoners are some of the most disturbing that I have ever read." These firsthand accounts are supplemented by the writing of noted experts, exploring the psychological, legal, ethical, and political dimensions of solitary confinement. "Do we really think it makes sense to lock so many people alone in tiny cells for twenty-three hours a day, for months, sometimes for years at a time? That is not going to make us safer. That's not going to make us stronger." —President Barack Obama "Elegant but harrowing." —San Francisco Chronicle "A potent cry of anguish from men and women buried way down in the hole." —Kirkus Reviews

Winner of the 2012 Anisfield-Wolf Book Award for Nonfiction A revelatory look at why we dehumanize each other, with stunning examples from world history as well as today's headlines "Brute." "Cockroach." "Lice." "Vermin." "Dog." "Beast." These and other monikers are constantly in use to refer to other humans—for political, religious, ethnic, or sexist reasons. Human beings have a tendency to regard members of their own kind as less than human. This tendency has made atrocities like the Holocaust, the genocide in Rwanda, and the slave trade possible, and yet we still find it in phenomena such as xenophobia, homophobia, military propaganda, and racism. Less Than Human draws on a rich mix of history, psychology, biology, anthropology and philosophy to document the pervasiveness of dehumanization, describe its forms, and explain why we so often resort to it. David Livingstone Smith posits that this behavior is rooted in human nature, but gives us hope in also stating that biological traits are malleable, showing us that change is possible. Less Than Human is a chilling indictment of our nature, and is as timely as it is relevant.

The System of Nature St. Martin's Press

Originally published in 1984. Paul Henri Thiery, Baron d'Holbach (1723-1789), was the center of the radical wing of the philosophers. Holbach wrote, translated, edited, and issued a stream of books and pamphlets, often under other names, that has made him the despair of bibliographers but has connected his name, by innuendo, gossip, and association, with most of what was written in defense of atheistic materialism in late eighteenth-century France. Holbach is best known for The System of Nature (1770) and deservedly, since it is a clear exposition of his main ideas. His initial position determines all the rest of his argument: 'There is not, there can be nothing out of that Nature which includes all beings.' Conceiving of nature as strictly limited to matter and motion, both of which have always existed, he flatly denies that there is any such thing as spirit or supernatural. This is the first of three volumes.

Nothing is more unsettling in this world than a kid with a gun . . . On the streets of Medellín, Colombia, actions speak louder than words, and the rule of the bandidos is the only law worth listening to. Like most kids of their age, Shorty and Alberto work for their local cartel. They run cigarettes, offer protection . . . and occasionally assassinate someone. The work is tough, and dangerous, but the boys are commanding respect like they've never known, and the money's

pretty good too. But then one day Alberto disappears. And Shorty realises that he is never coming back. A gangster's life is cheap, and when revenge can be bought for only a few pesos, everyone has their price . . .

Letters from and to Charles Kirkpatrick Sharpe Philadelphia Jewish Publication Society of America 1915.

Kuhn contended that the Bible derived its origins from other Pagan religions and that much of Christian history was pre-extant as Egyptian mythology. He also proposed that the Bible was symbolic and did not depict real events, and argued that the leaders of the church started to misinterpret the bible at the end of the third century. These controversial ideas outside of mainstream history and theology are rejected by most pre-eminent scholars, but many including Tom Harpur and John G. Jackson were influenced by the works of Kuhn. Harpur even dedicated his best-selling 2004 book, "The Pagan Christ" to Kuhn, calling him "a man of immense learning and even greater courage" and "one of the single greatest geniuses of the twentieth century" [who] "towers above all others of recent memory in intellect and his understanding of the world's religions."
