First published in 1926, 'The Science of Mind' proposes a science with a new relationship between humans and God by Ernest Holmes, an American

New Thought writer, teacher, and leader. He was the founder of a spiritual movement known as 'Religious Science', part of the greater New Thought movement. It declares that people can change their lives by vigorously engaging their minds in religious activities. Holmes believed that science, philosophy, and religion could all be connected for the betterment of each individual. According to Holmes, God is a never-ending energy source, present in the whole universe. Through prayer, a person can reach God and heal spiritual, mental, and physical wounds.

He believed that God's action and will occurred in the present and that with each and every choice a person makes, they are creating the Eternal Now. This thought was revolutionary, especially to New Age philosophy. Thoughts Are Things Red Wheel/Weiser This is Holmes' own "commentary" on his masterpiece, The Science of Mind. As such, it may be his most important book besides the textbook. These short pieces abound in counsel and guidance in metaphysics, spirituality, and healing. Here too is the history of New Thought and Religious Science; insights into the mystics; pointers on treatment; and analysis of our fears and insecurities. Founder of the worldwide Religious Science

movement, formulator of the Science of Mind philosophy, and author of metaphysical bestsellers, Dr. Holmes continually sought to simplify his teaching and get people to "use" it. In these pages he speaks directly to you in a one-on-one tutorial.

The Science of Mind: The Definitive Edition Penguin The thought of the ages has looked to the day when science and religion shall walk hand in hand through the visible to the invisible. A movement that endeavors to unify the great conclusions of human experience must be kept free from personal ambitions and interpretation. If science recognizes only a government of law whose principles are universal, and religion becomes dogmatic and often

superstitious when based on any one personality, for "Religious Science" to exist, the focus must insistently be on God; ever present, ever available. In essence, this was the primal message of the enlightened prophets of all the ages, and this is the message of Religious Science. What Religious Science Teaches is a summation of the Science of Mind theory that proclaims there is One Infinite Mind which of necessity includes all that is,

whether it be the intelligence in man, the life in the animal, or the invisible Presence which is God. In it we learn to have a spiritual sense of things.

You will discover that the key to living a life of inner peace, contentment and fulfillment is to think in creative, positive, self-affirming ways. For, in the words of the authors, "Every thought has a consequence. And every

You will learn that if you change the content and tone of the thoughts behind the things in your life, you will permanently transform yourself and your life—for the better. Thoughts Are Things is divided into four parts: "The World Around You," "The Life You Live," "Your Mental and Spiritual Health" and "The Future Is Yours."
