The Science of Mind is a great book about spirituality that was written by a great spiritual guide. In it, Ernest Holmes talks about how our thoughts connect us to a creative law in the world. He shows us how to put spiritual ideas into practice in our daily lives. He shows how man can shape his own fate and decide what kind of life he wants to live. He says that the mind of God and the mind of man are linked. Since God's mind is infinite, this means that man's mind has an infinite number of ways to show himself. It's a book that anyone who wants to really understand ideas should read and study over and over again, since it talks about many different religious and spiritual ideas. It goes far beyond the simple goal of getting rich, spilling over into ideas like God and the divine reason.

The Science of Mind Ernest S. Holmes - A Complete Course of Lessons in the Science of Mind and Spirit . These lessons are dedicated to that truth which frees man from himself and sets him on the pathway of a new experience, which enables him to see through the mist to the Eternal and Changeless Reality. In presenting these lessons in Mental Science to the public, it is my desire to make it possible for any one, who cares to take the time to study them, to demonstrate the truths that will be discussed. It is, perhaps, hard to set down in writing a complete teaching in Mental Science that will not appear difficult to understand; but this could be said as well of any science, and the Science of Mind is no exception to the general rule. From the author of Creative Mind And Success, comes this short book on how to utilise the power of your mind. Holmes shows us how our thoughts can become reality and what we can do to use that to our benefit.

**What Religious Science Teaches Penguin**  
The thought of the ages has looked to the day when science and religion shall walk hand in hand through the visible to the invisible. A movement that endeavors to unify the great conclusions of human experience must be kept free from personal ambitions and interpretation. If science recognizes only a government of law whose principles are universal, and religion becomes dogmatic and often superstitious when based on any one personality, for "Religious Science" to exist, the focus must insistently be on God; ever present, ever available. In essence, this was the primal message of the enlightened prophets of all the ages, and this is the message of Religious Science. **What Religious Science Teaches** is a summation of the Science of Mind theory that proclaims there is One Infinite Mind which of necessity includes all that is, whether it be the intelligence in man, the life in the animal, or the invisible Presence which is God. In it we learn to have a spiritual sense of things.
