Lama Surya Das, the most highly trained American lama in the Tibetan tradition, presents the definitive book on Western Buddhism for the modern-day spiritual seeker.

The radical and compelling message of Buddhism tells us that each of us has the wisdom, awareness, love, and power of the Buddha within; yet most of us are too often like sleeping Buddhas. In *Awakening the Buddha Within*, Surya Das shows how we can awaken to who we really are in order to lead a more compassionate, enlightened, and balanced life. It illuminates the guidelines and key principles embodied in the noble Eight-Fold Path and the traditional Three Enlightenment Trainings common to all schools of Buddhism: *Wisdom Training:*

Developing clear vision, insight, and inner understanding—seeing reality and ourselves as we really are. *Ethics Training: Cultivating virtue, self-discipline, and compassion in what we say and do. Meditation Training: Practicing mindfulness, concentration, and awareness of the present moment. With lively stories, meditations, and spiritual practices, Awakening the Buddha Within is an invaluable text for the novice and experienced student of Buddhism alike.* [Immortality](#) Double 9 Books The great contribution of Ernest

Holmes to modern thought is the specific form of meditation and prayer by which man can control outward conditions of his life instead of permitting conditions to control him. Based soundly and thoughtfully upon the teachings of Jesus and other great spiritual leaders and philosophers, THIS THING CALLED LIFE is an outline of the practice of Faith by which problems of every kind may be solved by every man and woman, directly, simply and effectively. Recognised as one of the foremost teachers of religious science and philosophy since William James, in this book Mr.

Holmes courageously declares that for centuries man has been putting the cart before the horse, that he is not helpless in the face of poverty, disease, evil and unhappiness, but that by this clear and simple system of thought and faith he can dominate them and introduce into his experience their exact opposites—abundance, health, good and happiness. If man will try and learn how to think, writes Mr. Holmes, he can dominate his entire life and everything in and around it.

The Science of Mind is a great book about spirituality that was written by a great spiritual guide. In it, Ernest Holmes talks about how our thoughts connect us to a creative law in the world. He shows us how to put spiritual ideas into practice in our daily lives. He shows how man can shape his own fate and decide what kind of life he wants to live. He says that the mind of God and the mind of man are linked. Since God's mind is infinite, this means that man's mind

has an infinite number of ways to show himself. It's a book that anyone who wants to really understand ideas should read and study over and over again, since it talks about many different religious and spiritual ideas. It goes far beyond the simple goal of getting rich, spilling over into ideas like God and the divine reason.

In the early part of the twentieth century, a visionary named Ernest Holmes began a journey of exploration and research that profoundly affected thinkers throughout America. His work, based on the teachings of the great philosophers, the sacred wisdom of both Eastern and Western traditions, and the empirical nature of science, offers a philosophy of religion and psychology emphasizing the limitless potential of the human mind. Now, for the first time, **The Science of Mind**

appears in paperback to coincide with the seventieth anniversary of Ernest Holmes's founding of the Religious Science movement. This book contains the fundamentals of Holmes's teachings and is a primary resource used by teaching centers and spiritual healers worldwide. Its universal principles apply to people of all spiritual backgrounds as they describe a higher level of existence attainable through the use of Nature's forces and the power of God. While imparting an unrivaled technique for living, Dr. Holmes's classic guide speaks clearly to a

complex world caught in transition and searching for guidance.

Science of the Mind Penguin First published in 1926, 'The Science of Mind' proposes a science with a new relationship between humans and God by Ernest Holmes, an American New Thought writer, teacher, and leader. He was the founder of a spiritual movement known as 'Religious Science', part of the greater New Thought movement. It declares that people can change their lives by vigorously engaging their minds in religious activities. Holmes believed that science, philosophy, and religion could all be connected for the betterment of each individual. According to

Holmes, God is a never-ending energy source, present in the whole universe. Through prayer, a person can reach God and heal spiritual, mental, and physical wounds. He believed that God's action and will occurred in the present and that with each and every choice a person makes, they are creating the Eternal Now. This thought was revolutionary, especially to New Age philosophy. I am Not a Brain Harmony
American writer, educator, theologian, and feminist pioneer EMMA CURTIS HOPKINS (1849-1925) may well be the most important woman in the history of religion in the United States. Influenced by Mary Baker

Eddy and her "Christian Science," Hopkins developed the more metaphysical philosophy of New Thought, an early "New Age" outlook that encouraged its adherents to tap the latent powers of their potent minds. Known as "the teacher of teachers," Hopkins inspired her students, many of whom went on to become influential leaders of the New Thought movement, to give full expression to their creative genius. In this 1888 book, considered by many one of the greatest works of

mysticism ever written, Hopkins encourages us all to live life with a greater awareness of the mystery and power of the universe as it is seen through the wisdom of Jesus Christ. No bleak call to celebrate Jesus' suffering or pain, this is a glorious expression of the power within us to triumph over loss, sin, and death to find new avenues to joy. Many consider the nature of human consciousness to be one of the last great unsolved mysteries. Why should the light turn on, so to speak, in human beings at all? And how is the electrical storm of neurons under our skull connected with our consciousness? Is the self only our brain's user interface, a kind of stage on which a show is performed that we cannot freely direct? In this book, philosopher Markus Gabriel challenges an increasing trend in the sciences towards neurocentrism, a notion which

rests on the assumption that the self is identical to the brain. Gabriel raises serious doubts as to whether we can know ourselves in this way. In a sharp critique of this approach, he presents a new defense of the free will and provides a timely introduction to philosophical thought about the self – all with verve, humor, and surprising insights. Gabriel criticizes the scientific image of the world and takes us on an eclectic journey of self-reflection by way of such concepts as self, consciousness, and freedom, with the aid of Kant, Schopenhauer, and Nagel but

also Dr. Who, The Walking Dead, and Fargo.

The Science of Mind Ernest S. Holmes - A Complete Course of Lessons in the Science of Mind and Spirit . These lessons are dedicated to that truth which frees man from himself and sets him on the pathway of a new experience, which enables him to see through the mist to the Eternal and Changeless Reality. In presenting these lessons in Mental Science to the public, it is my desire to make it possible for any one, who cares to take the time to study them, to demonstrate the truths that will be discussed. It is, perhaps, hard to set down in writing a complete

teaching in Mental Science that will not appear difficult to understand; but this could be said as well of any science, and the Science of Mind is no exception to the general rule. From the author of *Creative Mind And Success*, comes this short book on how to utilise the power of your mind. Holmes shows us how our thoughts can become reality and what we can do to use that to our benefit.

More than ever, people the world over are making a conscious attempt to find meaning in their lives. The excessive materialism of the late 20th century has proven an inadequate substitute for God. As we have acquired more things, we have developed an ever-growing emptiness. Even the popular media today are telling us there is a great hunger for the inner peace that comes from prayerful communion with a higher power. *Can We Talk to God?* offers readers a framework for prayer that is compatible with traditional religion, yet moves beyond it in the recognition of a divine presence within each person. This book sets forth the teaching of Ernest Holmes, called

Science of Mind, which is a synthesis of the greatest ideas of religion, science and philosophy. Originally published in 1934 as *The Ebell Lectures on Spiritual Science*, it is as fresh and profound today as it was then, offering readers answers to such important questions as: What is the nature of God? What is our relationship to God? How do we communicate with God? What is the secret of spiritual power? Where is humanity headed? How can a prayer be used to help ourselves and others? Many readers wonder, Can I talk to God? This beautiful book answers with a resounding YES!, and shows readers the way. The method of prayer it teaches will

open the door to healthier, happier living.
