Death Star - Wikipedia

Stars are not actually stationary objects! The Galaxy is rotating, and the stars are in orbit around its center. Not every star moves at the same rate - how fast they orbit can depend on where the star is located within the Galaxy. Our Sun, being fairly far from the Galactic Center, takes over 200 million years to circle the Galaxy once.

Is Sirius the most luminous star? | Astronomy Essentials ...

The Death Star is a fictional mobile space station and

galactic superweapon featured in the Star Wars space-opera franchise. The first Death Star, introduced in the original Star Wars film, is stated to be more than 120 kilometers (75 mi) in diameter, and is crewed by an estimated 1.7 million military personnel and 400,000 droids. The second Death Star, which appears in Return of the Jedi, is ...
