Star - Star - Distances to the stars: Distances to stars were first determined by the technique of trigonometric parallax, a method still used for nearby stars. When the position of a nearby star is measured from two points on opposite sides of Earth's orbit (i.e., six months apart), a small angular (artificial) displacement is observed relative to a background of very remote (essentially ... Genocide and Jedi: why the Sith may be right in Old ...

The Stars Were Right combines mystery and monsters, chases and cults, and an ancient evil in a world that is similar but not quite like our own.
