The Stars Were Right by K. M. Alexander

Stars are not actually stationary objects! The Galaxy is rotating, and the stars are in orbit around its center. Not every star moves at the same rate - how fast they orbit can

depend on where the star is located within the Galaxy. Our Sun, being fairly far from the Galactic Center, takes over 200 million years to circle the Galaxy once.

Zac Efron, Zendaya - Rewrite The Stars (Lyrics / Lyrics Video)

It's the brightest star in Earth's sky, so bright that you might see glints of different colors radiating from it. But is Sirius the most luminous star?

Stars are immense balls of burning plasma. Yet, aside from the Sun in our own solar system, they appear as tiny pinpoints of light in the sky. Our Sun, technically a yellow dwarf, is neither the biggest or the smallest star in the universe.

The bulk of the cases heard by the Court of Star Chamber involved property rights, trade, government administration and public corruption. The Tudors were also concerned with matters of public disorder. Wolsey used the court to prosecute forgery, fraud, perjury, riot, slander, and pretty much any action that could be considered a breach of the ...
