The Soldiers are coming for Adrian...and Everyone else like him. Safe Haven has grown too powerful to be ignored any longer. The surviving government wants all metaphysical survivors secured for their own use or eliminated, and they couldn't have chosen a better time to reemerge from their dystopian holes. Safe Haven has a new leader and a tall wall of fresh challenges to overcome in their fight for survival. Adrian's condition is critical, the camp isn't ready to accept the existence of magic, Mother Nature still has them in her crosshairs, and they are low on food, water, and fuel. The next eight weeks might be the hardest they've gone through yet, and still not be enough to ensure their survival. Can Angela bring the pieces together in time or will this be the end? -The war has begun to change us...

The mental cliffs we've been forced to leap to survive this dystopian existence-the horrors that we now hold inside-are nothing compared to the metaphysical evolutions. We're harder, stronger, more determined, but also weaker because we need each other so much. It creates vulnerabilities. We're all angrier, as well. We know the soldiers also survived the war and that we'll have to fight them to remain free. We've faced slavers and nature, attacks from crazed refugees, and personal hatred inside our own borders, but all of that was to prepare us for this moment of facing our own military. We represent what's left of the great American herd.-

Avoiding Fate Angela White

A Congolese war survivor's story of hope, victory and grace. The tragedies of war does not end when a ceasefire agreement is signed or when the last bomb is dropped; they continue in subtle but devastating ways. In *A Handful of Rice*, Tresor Yenyi narrates how his life as a young Congolese boy is torn apart after his country goes into war, leaving him traumatized, hopeless and angry. But one day a mere two years after his move to America, a friend asks him "What do you need to make Christmas special for people in Congo?", Tresor comes to a realization that due to the extreme poverty in Congo, it would only take a small packet filled with a handful of rice to positively impact the life of someone in Congo. This tiny realization leads Yenyi through a staggering series of events that eventually prompts him to launch a non-profit organization, Mwanganza International that has since transformed and rebuilt the lives of hundreds of Congolese war survivors over the past seven years. This hard-hitting memoir will open up the doors to a world where child soldiers, rape victims and malnourished street children are the realities of life. It is a book filled with fierce tales of resilience and hope.

Life After Nuclear War C9 Publications

A memoir of family, the Holocaust, trauma, and identity, in which Adam Frankel, a former Obama speechwriter, must come to terms with the legacy of his family's painful past and discover who he is in the wake of a life-changing revelation about his own origins. Adam Frankel's maternal grandparents survived the Holocaust and built new lives, with new names, in Connecticut. Though they tried to leave the horrors of their past behind, the pain they suffered

crossed generational lines—a fact most apparent in the mental health of Adam's mother. When Adam sat down with her to examine their family history in detail, he learned another shocking secret, this time one that unraveled Adam's entire understanding of who he is. In the midst of piecing together a story of inherited familial trauma, Adam discovered he was only half of who he thought he was, knowledge that raised essential questions of identity. Who was he, if not his father's son? If not part of a rich heritage of writers and public servants? Does it matter? What defines a family's bonds? What will he pass on to his own children? To rewrite his story in truth and to build a life for his own young family, Adam had to navigate his pain to find answers and a way forward. Throughout this journey into the past, his family's psyche, and his own understanding of identity, Adam comes to realize that while the nature of our families' traumas may vary, each of us is faced with the same choice. We can turn away from what we've inherited—or, we can confront it, in the hopes of moving on and stopping that trauma from inflicting pain on future generations. The stories Adam

shares with us in The Survivors are about the ways the past can haunt our future, the resilience that can be found on the other side of trauma, and the good that can come from things that are unspeakably bad.

The Survivors "This is Safe Haven Refugee Camp. Is anyone alive out there? ...hello?" War was uglier than we'd imagined. The Draft was reinstated, taking our men and boys. Within days, stores had nothing on the shelves; people began to starve. Hospitals closed due to lack of space and medicine. Police stopped answering calls; they stopped coming to work at all. Topside production faded; communications became spotty. Then the power went off...and it didn't come back on. The fall of society triggered a hard, new life where survival became the only focus. We shunned each other and the old ways, killing anyone who was different. We reverted to primitive behaviors, using the war as an excuse to commit unspeakable atrocities, and humanity slipped deeper into the abyss of possible extinction. Soon, darkness blanketed the post-apocalyptic lands with hatred and violence that seemed to have no end. "The end of the world has given us a harsh, merciless existence, where nature tries hard to push mankind to the very brink of extinction.

Everything is against us, between us... Untold miles of lawless, apocalyptic roads wait for our feet, and the future, cold and dark, offers little comfort. Without change, there can be no peace--only survivors." Nagasaki Deluxe Angela White
On August 9th, 1945, the US dropped an atomic bomb on Nagasaki. It killed a third of the population instantly, and the survivors, or hibakusha, would be affected by the life-altering medical conditions caused by the radiation for the rest of their lives. They were also marked with the stigma of their exposure to radiation, and fears of the consequences for their children. *Nagasaki* follows the previously unknown stories of five survivors and their families, from 1945 to the present day. It captures the full range of pain, fear, bravery and compassion unleashed by the destruction of a city. Susan Southard has interviewed the hibakusha over many years and her intimate portraits of their lives show the consequences of nuclear war. *Nagasaki* tells the neglected story of life after nuclear war and will help shape public debate over one of the most controversial wartime acts in history. Published for the 70th anniversary of the Hiroshima and Nagasaki bombs, this is the first study to be based on eye-witness accounts of Nagasaki in the style of John Hersey's *Hiroshima*. On August 9th, 1945, three days after the atomic bombing of Hiroshima, a 5-tonne plutonium bomb was dropped on the small, coastal city of Nagasaki. The explosion destroyed factories, shops and homes and killed 74,000 people while injuring another 75,000. The two atomic bombs marked the end of a global war but for the tens of thousands of survivors it was the beginning of a new life marked with the stigma of being hibakusha (atomic bomb-affected people). Susan Southard

has spent a decade interviewing and researching the lives of the hibakusha, raw, emotive eye-witness accounts, which reconstruct the days, months and years after the bombing, the isolation of their hospitalisation and recovery, the difficulty of re-entering daily life and the enduring impact of life as the only people in history who have lived through a nuclear attack and its aftermath. Following five teenage survivors from 1945 to the present day Southard unveils the lives they have led, their injuries in the annihilation of the bomb, the dozens of radiation-related cancers and illnesses they have suffered, the humiliating and frightening choices about marriage they were forced into as a result of their fears of the genetic diseases that may be passed through their families for generations to come. The power of *Nagasaki* lies in the detail of the survivors' stories, as deaths continued for decades because of the radiation contamination, which caused various forms of cancer. Intimate and compassionate, while being grounded in historical research *Nagasaki* reveals the censorship that kept the suffering endured by the hibakusha hidden around the world. For years after the bombings news reports and scientific research were censored by U.S. occupation forces and the U.S. government led an efficient campaign to justify the necessity and morality of dropping the bombs. As we pass the seventieth anniversary of the only atomic bomb attacks in history Susan Southard captures the full range of pain, fear, bravery and compassion unleashed by the destruction of a city. The personal stories of those who survived

beneath the mushroom clouds will transform the abstract perception of nuclear war into a visceral human experience. Nagasaki tells the neglected story of life after nuclear war and will help shape public discussion and debate over one of the most controversial wartime acts in history.
