The Unifying Force: Star Wars Legends Random House Worlds

NEW YORK TIMES BESTSELLER Set before the events of Star Wars: Episode I The Phantom Menace, this new novel is a thrilling follow-up to Star Wars: Darth Plagueis. It's kill or be killed in the space penitentiary that houses the galaxy's worst criminals, where convicts face off in gladiatorial combat while an underworld gambling empire reaps the profits of the illicit blood sport. But the newest contender in this savage arena, as demonic to behold as he is deadly to challenge, is fighting for more than just survival. His do-or-die mission, for the dark masters he serves, is to capture the ultimate weapon: an object that will enable the Sith to conquer the galaxy. Sith lords Darth Plagueis and Darth Sidious are determined to possess the prize. And one of the power-hungry duo has his own treacherous plans for it. But first, their fearsome apprentice must take on a bloodthirsty prison warden, a cannibal gang, cutthroat crime lord Jabba the Hutt, and an unspeakable alien horror. No one else could brave such a gauntlet of death and live. But no one else is the dreaded dark-side disciple known as Darth Maul. Praise for Lockdown "Schreiber . . . was a great choice for this novel, imbuing the story with a dark, foreboding tone while never quite stepping into the horror territories that Death Troopers and Red Harvest took us."—Jedi News "Fans of the dark side should rejoice. Lockdown delivers a can't-put-this-down tale of scum and villainy."—Club Jade "[Lockdown is] an action-packed ride that spins one entertaining chapter after another. The multiple layers of story keeps readers guessing what will happen next and just who will live and who will die. . . . It certainly adds to the character of Darth Maul while matching [Darth] Plagueis's complexity with sheer fun. . . . Five out of five metal bikinis."—Roqoo Depot "Somehow, Schreiber is able to skate the line between hard-hitting prison story and the adventure and excitement I love from Star Wars in a way that doesn't betray either genre. It's really quite masterful."—Big Shiny Robot "Lockdown is an exciting, engaging read. . . . It actually lines up beautifully for a sequel, which I, for one, would love to read."—Coffee with Kenobi "The novel makes The Clone Wars better. It also illuminates The Phantom Menace. I think it's the hallmark of the best tie-in fiction to resonate throughout other parts of the expanded universe in that way."—Knights' Archive "By the fiftieth page, I was hooked. . . . Lockdown is a wonderful 'antihero' novel, where it's just fine to root for the villain, because there are even worse things out there. This book was so fun and entertaining. I'll have to keep an eye out for more Star Wars books from Schreiber."—Seattle Geekly

Star Wars Dark Nest III the Swarm War Harper Collins Drones are transforming warfare through the use of artificial intelligence, drone swarms, and surveillance—leading to competition between the US, China, Israel, and Iran. Who will be the next drone superpower? In the battle for the streets of Mosul in Iraq, drones in the hands of ISIS terrorists made life hell for the Iraq army and civilians. Today, defense companies are racing to develop the lasers, microwave weapons, and technology necessary for confronting the next drone threat. Seth J. Frantzman takes the reader from the midnight exercises with Israel's elite drone warriors, to the CIA headquarters where new drone technology was once adopted in the 1990s to hunt Osama bin Laden. This rapidly expanding technology could be used to target nuclear power plants and pose a threat to civilian airports. In the Middle East, the US used a drone to kill Iranian arch-terrorist Qasem Soleimani, a key Iranian commander. Drones are transforming the battlefield from Syria to Libya and Yemen. For militaries and security agencies—the main users of expensive drones—the UAV market is expanding as well; there were more than 20,000 military drones in use by 2020. Once the province of only a few militaries, drones now being built in Turkey, China, Russia, and smaller countries like Taiwan may be joining the military drone market. It's big business, too—\$100 billion will be spent over the next decade on drones. Militaries may soon be spending more on drones than tanks, much as navies transitioned away from giant vulnerable battleships to more agile ships. The future wars will be fought with drones and won by whoever has the most sophisticated technology.
