The classic guide to teaching children at home for a new generation of homeschooling parents In 2019, there were more than two million children being homeschooled. That number doubled during the pandemic and is now likely to continue increasing as more parents worry that school might not be the best place for their children to learn and grow. Teach Your Own helped launch the homeschooling movement; now, its timeless and revolutionary message of recognizing the ways children come to understand the world has been updated for today's environment. Parents and caregivers will discover how to navigate: Learning in a classroom versus learning in the world The difference between a

learning difficulty (which we all experience every time we try to learn anything) and a learning disability. Schedules that achieve the homeschooling-work-life balance that you want as a family The relationship between learning and play Homeschooling and technology And much more. John Holt's warm understanding of children and his passionate belief in every child's ability to learn have made this book an essential resource for over forty years to homeschooling families.

For some kids, school offers a positive and engaging experience. For others, it's a boring, stressful, and frustrating waste of time. If your child is in the second category, why keep tormenting them? Instead, why not help them find an educational environment where they feel genuinely motivated, excited, and empowered? In this eye-opening book, Blake Boles makes the case for leaving conventional school

and taking one of the many alternative paths through K-12 that exist today. He addresses parents' major concerns about unconventional education -- Can my kids still go to college? Will they still be employable? How will they learn to work hard? -- while highlighting the hidden benefits of self-directed learning, such as improved parent-child relationships, a more balanced decision-making process regarding college, and a heightened sense of autonomy and connection. Drawing upon 15 years of work as a mentor and guide for adolescents in alternative and experiential learning environments -- as well as his own unconventional life path -- Boles weaves together narrative, theory, and research to build a powerful argument for granting children unusual levels of freedom and responsibility.

Children are born full of curiosity, eager to participate in the world. They learn as they live, with enthusiasm and joy. Then we send them to school. We stop them from playing and actively exploring their interests, telling them it's more important to sit still and listen. The result is that for many children, their motivation to learn drops dramatically. The joy of the early years is replaced with apathy and anxiety. This is not inevitable. We are socialised to believe that schooling is synonymous with education, but it's only one approach. Self-directed education puts the child back in control of their learning. This enables children, including those diagnosed with special educational needs, to flourish in their own time and on their own terms. It enables us to put wellbeing at the centre of education. Changing Our Minds brings together research, theory and practice on learning. It includes interviews with influential thinkers in the field of self-directed education and examples from families alongside practical advice. This essential guide will give you an understanding of why self-directed education makes sense, how it works, and what to do to put it into action yourself.

THE COLFAXES DIDN'T START
TEACHING THEIR BOYS AT HOME
TO GET THEM INTO HARVARD -
BUT THAT'S WHAT
HOMESCHOOLING ACCOMPLISHED!

For over fifteen years, David and Micki Colfax educated their children at home. They don't think of themselves as pioneers, though that's what they became. Unhappy with the public schools, the Colfaxes wanted the best education possible for their four sons: a program for learning that met the evolving needs of each child and gave them complete control of how and what their children learned. The results? A prescription for excellence-Harvard educations for their sons Grant, Drew, and Reed. (Their fourth son is still too young for college.) Now the Colfaxes tell how all parents can become involved in homeschooling. In a straight-talking book that reads like a frank conversation among friends, they tell what they did and how they did it: their educational approaches, the lessons they learned, and what materials-books, equipment, educational aids-proved most useful over the years. Best of all, they show you how you can take charge of your children's education-in an invaluable sourcebook that will help you find a rewarding and successful alternative to our failing schools.

No one is immune to the byproducts of compulsory schooling and standardized testing. And while reform may be a worthy cause for some, it is not enough for countless others still trying to navigate the tyranny of what schooling has always been. *Raising Free People* argues that we need to build and work within systems truly designed for any human to learn, grow, socialize, and thrive, regardless of age, ability, background, or access to money. Families and conscious organizations across the world are healing generations of school wounds by pivoting into self-directed, intentional community-building, and *Raising Free People* shows you exactly how unschooling can help facilitate this process. Individual experiences influence our approach to parenting and education, so we need more than the rules, tools, and “bad adult” guilt trips found in so many parenting and education books. We need to reach behind our behaviors to seek and find our triggers; to examine and interrupt the ways that social

issues such as colonization still wreak havoc on our ability to trust ourselves, let alone children. *Raising Free People* explores examples of the transition from school or homeschooling to unschooling, how single parents and people facing financial challenges unschool successfully, and the ways unschooling allows us to address generational trauma and unlearn the habits we mindlessly pass on to children. In these detailed and unabashed stories and insights, Richards examines the ways that her relationships to blackness, decolonization, and healing work all combine to form relationships and enable community-healing strategies rooted in an unschooling practice. This is how millions of families center human connection, practice clear and honest communication, and raise children who do not grow up to feel that they narrowly survived their childhoods.

Many critics and fans refer to the 1990s as the decade that horror forgot, with few notable entries in the genre. Yet horror went mainstream in the '90s by speaking to the anxieties of American youth during one of the country's most prosperous eras. No longer were films made on low budgets and dependent on devotees for success. Horror found its way onto magazine covers, fashion ads and CD soundtrack covers. "Girl power" feminism and a growing distaste for consumerism defined an audience that both embraced and rejected the commercial appeal of these films. This in-depth study examines the youth subculture and politics of the era, focusing on such films as *Buffy the Vampire Slayer* (1992), *Scream* (1996), *I Know What You Did Last Summer* (1997), *Idle Hands* (1999) and *Cherry Falls* (2000).
