With the release of Avatar in December 2009, James Cameron cements his reputation as king of sci-fi and blockbuster filmmaking. It's a distinction he's long been building, through a directing career that includes such cinematic landmarks as The Terminator, Aliens, The Abyss, and the highest grossing movie of all time, Titanic. The Futurist is the first in-depth look at every aspect of this audacious creative genius—culminating in an exclusive behind-the-scenes glimpse of the making of Avatar, the movie that promises to utterly transform the way motion pictures are created and perceived. As decisive a break with the past as the transition from silents to

talkies, Avatar pushes 3-D, live action, and photo-realistic CGI to a new level. It rips through the emotional barrier of the screen to transport the audience to a fabulous new virtual world. With cooperation from the often reclusive Cameron, author Rebecca Keegan has crafted a singularly revealing portrait of the director's life and work. We meet the young truck driver who sees Star Wars and sets out to learn how to make even better movies himself—starting by taking apart the first 35mm camera he rented to see how it works. We observe the neophyte director deciding over lunch with Arnold Schwarzenegger that the ex-body builder turned actor is wrong in every way for the Terminator role as written, but perfect regardless. After the success of The Terminator, Cameron refines his special-effects wizardry with a big-time Hollywood budget in the creation of the relentlessly exciting Aliens. He builds an immense underwater set for The Abyss in the massive containment vessel of an abandoned nuclear power plant—where he pushes his scuba-breathing cast to and sometimes past their physical

and emotional breaking points (including a white rat that Cameron saved from drowning by performing CPR). And on the set of Titanic, the director struggles to stay in charge when someone maliciously spikes craft services' mussel chowder with a massive dose of PCP, rendering most of the cast and crew temporarily psychotic. Now, after his movies have earned over \$5 billion at the box office, James Cameron is astounding the world with the most expensive, innovative, and ambitious movie of his career. For decades the moviemaker has been ready to tell the Avatar story but was forced to hold off his ambitions until technology caught up with his vision. Going beyond the technical ingenuity and narrative power that Cameron has long demonstrated, Avatar shatters old cinematic paradigms and ushers in a new era of storytelling. The Futurist is the story of the man who finally brought movies into the twenty-first century.

As told by veteran entertainment journalist Marc Shapiro, the story of James Cameron is rich in

history and as explosively entertaining as any of his masterpiece films. Cameron the youngster built toy rockets and submarines and displayed at an early age the drive to win at any cost. The Cameron legend has it that when a neighbor stole some of little Jim's toys, he sneaked into the boy's backyard and sawed through the branches supporting his treehouse. When the treehouse collapsed, Cameron's rival ended up in the hospital. Ever since that day, James Cameron has been leaving many of those who cross his path in a state of mental or physical disrepair. But his fanaticism and incredibly strong work ethic also win the respect of those around him, and inspire many to go the extra mile. The teenager who was awestruck by the visual power and special effects of Stanley Kubrick's groundbreaking 2001: A Space Odyssey and immediately decided to become a filmmaker, has grown up to be one of the very best. But at what cost? Those who would label Cameron a self-absorbed, egotistical maniac have plenty of ammunition to back up their claims. As early as 1984's *The Terminator*, cast and crew members took to wearing T-shirts with the slogan "You can't scare me...I work for James Cameron." Of course, the infamous director never really talks to co-workers on his sets, he barks at them in succinct soundbites. And he doesn't play favorites. Not even his franchise player, Arnold Schwarzenegger, got special treatment during the filming of *True Lies*. High on a crane and ready to film a scene, he reports: "I had to go to the bathroom read

bad. Jim screams up to me, 'No you can't! You're a military man on a mission, would a real pilot land just to go to the bathroom?'" *James Cameron: An Unauthorized Biography of the Filmmaker* includes other revelations and insights: * how the idea for *The Terminator* came to him in a fever dream * how he fell overboard in love with actress Suzy Amis on the set of *Titanic* * how Cameron's antics drove several stars of *The Abyss* to near nervous breakdowns * how someone on the set of *Titanic* allegedly attempted to incapacitate the lovable director by slipping him, and the rest of the crew, the drug PCP
