Children and grownups alike will learn crazy facts, what makes viruses so deadly, and what we can do to stop these microscopic assassins. Don't get too close, or you could be the next victim!

Cyrus the Virus and the Virus Crew Scholastic
"As Vera descended she heard the sound Of children playing on the merry-go-round. And on the swings she was able to see A little boy swinging - his name was Lee. 'That looks fun!' said Vera, as she started to land And sat herself down right on Lee's hand." The book is for ages to 2 - 8 Vera the Virus is a story that encourages children to wash their hands.

The Black and White Virus Mike Jason

"Examine COVID-19 from a scientific perspective. Readers will learn about the origin of the disease, its symptoms and treatments, and how people can protect themselves and others"--
White Fire Deadite Press

For the survivors of the Tilian virus, they thought their escape would lead them to a new beginning. But the effects of the virus reach far beyond simply infection. A trusted member of the survivors hides a horrible past. While in the wastelands of

America, a new threat grows. The bonds of friendship strain and shatter. The Tils have become deadlier than ever. The virus was just the beginning. Now the world must face the Tilian effect.

Virus Hunters 1

When a freak storm hits, time is the enemy as a government-created super virus gets loose and spreads through the quiet little town of Godfrey, Illinois. But the virus isn't the only threat. There are mysterious forces at play and disease is just one instrument of fear.

Virus (shrinkwrapped)

Paul Griffiths, Professor of Virology at the Royal Free Hospital and University College London studied medicine at St Bartholomew's Hospital in London and has spent his professional life in medical virology. He has an international reputation, unrivalled expertise and insight into the effect that viruses can have on patients and their families. Professor Griffiths uses this experience and stories of real patients to demonstrate how cytomegalovirus has avoided detection and treatment for so long. He introduces you to CMV, an intelligent virus which evolved millions of years ago intending to infect everyone on the planet during childhood, spreading silently throughout the world whilst remaining unrecognised. Professor Griffiths explains how modern living has jolted this stealth virus out of its complacency, rapidly altering the conditions it needs to survive. Over a period of 100 years (a blink of the eye in evolutionary time) humans have changed their world to become cleaner, longer living life forms which avoid childhood infections, have babies later in life, swap organs during transplantation and even suppress their immune systems with drugs or HIV. Professor Griffiths describes how and why this virus has come out of obscurity to become a top target for elimination. Although you may never have heard its name, there is a good chance that you, your family and your friends have encountered it. After you have heard *The Stealth Virus* tell its own story, its victims are given a voice too. This book describes how CMV is being confronted and introduces the researchers who will defend us against its insidious and sometimes devastating consequences. This book brings medical virology to life. It is dedicated to those who have

encountered *The Stealth Virus* and to those who have declared war upon it.

The Tilian Virus: Book One of the Pandemic Sequence

"I loved the story so much that I'm eagerly waiting to read more from him. I now have a new favorite book I'll read over and over again." (Five Stars, A Night Owl Top Pick) -Night Owl Reviews on Dark Inspiration "A surreal thrill ride of a read! Very reminiscent of Clive Barker at his best." -Hunter Shea, author of *Island of the Forbidden*, on *Dreamwalker* "James has a talent for combining action-packed vignettes into a powerful, fast-paced whole." -Library Journal on *Black Magic Epidemic!* An ancient virus has surfaced on Long Island, NY, turning its victims into black-veined, infectious, psychopathic killers. Chaos and madness rule. In desperation, the military quarantines the island, trapping Melanie Bailey and her autistic son, Aiden. Somehow Aiden survives infection. He could be the key to a cure...if Melanie can get him to the mainland. Gang leader Jimmy Wade also survives the virus, but he's acquired a hunger for human flesh. Believing consuming Aiden will make him all-powerful, he and his gang hunt the boy. Melanie and Aiden must evade both Wade's tightening grip and the growing army of the infected in an impossible escape from what all call Q Island.

The Reaper Virus

The Black and White Virus Russia and the United States are in the midst of a global struggle for world domination. Tensions are running high due to Russia's recent threat to unleash a chemical weapon containing a deadly virus capable of killing millions of people around the world. The media is covering the strong possibility of the viral threat day and night, causing many people to panic. Citizens across America are stocking up on supplies and wearing face masks to protect themselves if an attack were to happen. On top of the virus, many cities are dealing with civil unrest and increased cultural tensions due to several contentious events that captured the attention of the American people. Then the unthinkable happens. The bomb hits New York City, and

the virus spreads through a massive cloud plaguing the entire world. Only two known survivors remain, a wealthy, socialite White woman and a poor, hardworking Black man. They must put their immense cultural differences aside in order to make it out and survive.

The Science of the Coronavirus

Rachel Cummings, the young Chair of a university biology department is confronted with a problem that modern science says can't exist, but it does exist and may be deadly. Rachel is accused of being an alarmist, but she won't be pushed aside. Rachel knows that the situation could be disastrous if not resolved. She recruits Barry Protoc, a highly credentialed neuroscientist and microbiologist to help her find the truth. What they find puts them in the middle of a horrible nightmare that could possibly destroy civilization if left unchecked. The problem confronting Rachel and Barry actually started with the beginning of life on earth. The first life on earth existed in the form of cells. But there was a group of cells that could absorb new information, make decisions, take a directed action and multiply. They came together as "The Council" and they dominated the other cells. "The Council" wanted to control the surface of the planet, but they knew that was impossible in their current form. They had to evolve on the surface as a dominant species. They set evolution in motion. One among them, a renegade cell called VIRUS didn't agree. VIRUS felt they were dominant enough and could control the surface as they were. "The Council" tried to talk him out of it, but he wouldn't listen. VIRUS breaks away from "The Council" and threatens to destroy everything they create, regardless of how long it takes. "The

Council" has monitored and defeated VIRUS at every turn over the ages. They have become complacent, and VIRUS has taken advantage of that complacency by taking a host and building a following. VIRUS' host is a small boy by the name of Barry Protoc. If "The Council" allows VIRUS and his followers to continue, all life as we know it will be destroyed along with the future. They must stop VIRUS. "The Council" sends Traveler, their best agent, to the present to confront and defeat VIRUS. But Traveler doesn't exist in the present. He can't accomplish anything on his own. To defeat VIRUS traveler must work through a surrogate. That surrogate is Professor Barry Protoc. VIRUS is a thrilling story that sets ancient vendettas clashing in the present and provides the reader with an exciting story and an unexpected ending.

Q Island

From the imaginative mind of international bestselling author, Bobby Akart, comes a series ripped from today's headlines. Meet the Virus Hunters, the disease detectives on the front line of a never-ending battle to save humanity from viruses one-billionth our size.
