This thought-provoking collection not only takes us into the past and the future, but also explores what might happen if we attempt to manipulate time to our own advantage. These stories show what happen once you start to meddle with time and the paradoxes that might arise. It also raises questions about whether we understand time, and how we perceive it. Once we move outside the present day, can we ever return or do we move into an alternate world? What happens if our meddling with Nature leads to time flowing backwards, or slowing down or stopping all together? Or if we get trapped in a constant loop from which we can never escape. Is the past and future immutable or will we ever be able to escape the inevitable? These are just some of the questions that are raised in these challenging, exciting and sometimes amusing stories by Kage Baker, Simon Clark, Fritz Leiber, Christopher Priest, Kristine Kathryn Rusch, Robert Silverberg, Michael Swanwick, John Varley and many others.

A Hugo Award-winning author and music journalist explores the weird and wild story of when rock 'n' roll met the sci-fi world of the 1970s As the 1960s drew to a close, and mankind trained its telescopes on other worlds, old conventions gave way to a new kind of hedonistic freedom that celebrated sex, drugs, and rock 'n' roll. Derided as nerdy or dismissed as fluff, science fiction rarely gets credit for its catalyzing effect on this revolution. In *Strange Stars*, Jason Heller recasts sci-fi and pop music as parallel cultural forces that depended on one another to expand the horizons of books, music, and out-of-this-world imagery. In doing so, he presents a whole generation of revered musicians as the sci-fi-obsessed conjurers they really were: from Sun Ra lecturing on the black man in the cosmos, to Pink Floyd jamming live over the broadcast of the Apollo 11 moon landing; from a wave of Star Wars disco chart toppers and synthesiser-wielding post-punks, to Jimi Hendrix distilling the "purplish haze" he discovered in a pulp novel into psychedelic song. Of course, the whole scene was led by David Bowie, who hid in the balcony of a movie theater to watch *2001: A Space Odyssey*, and came out a changed man... If today's culture of Comic Con fanatics, superhero blockbusters, and classic sci-fi reboots has us thinking that the nerds have won at last, *Strange Stars* brings to life an era of unparalleled and unearthly creativity—in magazines, novels, films, records, and concerts—to point out that the nerds have been winning all along.

King of the Nerds Fantasy Reviews Another absolutely riveting installment in The *Riyria Revelations* series! Once again, Michael J. Sullivan did not disappoint. There was suspense, humor, action, treachery, and even a tiny bit of love thrown in. *Ramblings & More* Mr. Sullivan continues to impress. In Royce and Hadrian he has created some of the best characters the genre has seen in some time, and in Avempartha he shows that he knows what to do with them. *Speculative Fiction Junkie* The *Weird* Delacorte Press

A 1937 vintage camper trailer half hidden in weeds catches Lynne McBriar's eye when she is visiting an elderly friend Ben. Ben eagerly sells it to her and she just as eagerly embarks on a restoration. But after each remodel, sleeping in the trailer lands Lynne and her daughter Dinah in a previous decade-exciting, yet frightening. Glimpses of their home town and ancestors fifty or sixty years earlier is exciting and also offers some clues to the mystery of Ben's lost love. But when Dinah makes a trip on her own, separating herself from her mother by decades, Lynne has never known such fear. It is a trip that may upset the future if Lynne and her estranged husband can't team up to bring their daughter back.

This "stimulating contribution to literary theory" reveals the deeply philosophical concerns and developments behind popular time travel sci-fi (London Review of Books). In *Time Travel*, literary theorist David Wittenberg argues that time travel fiction is not mere escapism, but a narrative "laboratory" where theoretical questions about storytelling—and, by extension, about the philosophy of temporality, history, and subjectivity—are presented in story form. Drawing on physics, philosophy, narrative theory, psychoanalysis, and film theory, Wittenberg links innovations in time travel fiction to specific shifts in the popularization of science, from nineteenth-century evolutionary biology to twentieth-century quantum physics and more recent "multiverse" cosmologies. Wittenberg shows how popular awareness of new science led to surprising innovations in the literary "time machine," which evolved from a vehicle used for sociopolitical commentary into a psychological device capable of exploring the temporal structure and significance of subjects, viewpoints, and historical events. *Time Travel* draws on classic works of science fiction by H. G. Wells, Edward Bellamy, Robert Heinlein, Samuel Delany, and Harlan Ellison, television shows such as "The Twilight Zone" and "Star Trek," and other popular entertainments. These are read

alongside theoretical work ranging from Einstein, Schrödinger, Stephen Hawking to Gérard Genette, David Lewis, and Gilles Deleuze. Wittenberg argues that even the most mainstream audiences of popular time travel fiction and cinema are vigorously engaged with many of the same questions about temporality, identity, and history that concern literary theorists, media and film scholars, and philosophers.

Playfully mashing up the romantic elegance of the Victorian era with whimsically modernized technology, the wildly popular steampunk genre is here to stay. Now...long live the revolution! *Steampunk Revolution* features a renegade collective of writers and artists, including steampunk legends and hot, new talents rebooting the steam-driven past and powering it into the future. Lev Grossman's "Sir Ranulph Wykeham-Rackham, GBE, a.k.a. *Roboticus the All-Knowing*" is the Six-Million-Dollar Steampunk Man, possessing appendages and workings recycled from metal parts, yet also fully human, resilient, and determined. Bruce Sterling's "White Fungus" introduces steampunk's younger cousin, salvage-punk, speculating on how cities will be built in the future using preexisting materials. Cat Valente's "Mother Is a Machine" explores the merging of man and machine and a whole new form of parenting. In Jeff VanderMeer's anti-steampunk story "Fixing Hanover," a creator must turn his back on his creation because it is so utterly destructive. And Cherie Priest presents "The Clockroach," a new and very unsettling mode of transportation. Going far beyond corsets and goggles, *Steampunk Revolution* is not just your granddad's zeppelin—it's an even wilder ride.

Sisters of the Revolution Head of Zeus

Sisters of the Revolution gathers a highly curated selection of feminist speculative fiction (science fiction, fantasy, horror, and more) chosen by one of the most respected editorial teams in speculative literature today, the award-winning Ann and Jeff VanderMeer. Including stories from the 1970s to the present day, the collection seeks to expand the conversation about feminism while engaging the reader in a wealth of imaginative ideas. From the literary heft of Angela Carter to the searing power of Octavia Butler, Sisters of the Revolution gathers daring examples of speculative fiction's engagement with feminism. Dark, satirical stories such as Eileen Gunn's "Stable Strategies for Middle Management" and the disturbing horror of James Tiptree Jr.'s "The Screwfly Solution" reveal the charged intensity at work in the field. Including new, emerging voices like Nnedi Okorafor and featuring international contributions from Angelica Gorodischer and many more, Sisters of the Revolution seeks to expand the ideas of both contemporary fiction and feminism to new fronts. Moving from the fantastic to the futuristic, the subtle to the surreal, these stories will provoke thoughts and emotions about feminism like no other book available today.

Contributors include: Angela Carter, Angelica Gorodischer, Anne Richter, Carol Emshwiller, Catherynne M. Valente, Eileen Gunn, Eleanor Arnason, Elizabeth Vonarburg, Hiromi Goto, James Tiptree Jr., Joanna Russ, Karin Tidbeck, Kelley Eskridge, Kelly Barnhill, Kit Reed, L. Timmel Duchamp, Leena Krohn, Leonora Carrington, Nalo Hopkinson, Nnedi Okorafor, Octavia Butler, Pamela Sargent, Pat Murphy, Rachel Swirsky, Rose Lemberg, Susan Palwick, Tanith Lee, Ursula K. Le Guin, and Vandana Singh.

The Big Book of Modern Fantasy Orbit

A most untraditional love story, this is the celebrated tale of Henry DeTamble, a dashing, adventuresome librarian who inadvertently travels through time, and Clare Abshire, an artist whose life takes a natural sequential course. Henry and Clare's passionate affair endures across a sea of time and captures them in an impossibly romantic trap that tests the strength of fate and basks in the bonds of love. "Niffenegger's inventive and poignant writing is well worth a trip" (Entertainment Weekly).

Every short story in this wonderfully varied collection has one thing in common: each features some alteration in history, some divergence from historical reality, which results in a world very different from the one we know today. As well as original stories specially commissioned from bestselling writers such as James Morrow, Stephen Baxter and Ken MacLeod, there are genre classics such as Kim Stanley Robinson's story of how World War II atomic bomber the Enola Gay, having crashed on a training flight, is replaced by the Lucky Strike with profoundly different consequences. Praise for the editors: 'Mr Watson wreaks havoc with what is accepted - and acceptable.' The Times 'One of Britain's consistently finest science fiction writers.'

Welcome to the Stasis, the clandestine, near-omnipotent organization that stands at the heart of Charles Stross's Hugo Award-winning novella, Palimpsest. By mastering the mysteries of the Timegate, the Stasis has repeatedly steered mankind away from the brink of utter extinction. Through countless millennia, through the "mayfly flickerings" of innumerable transient civilizations, its members have intervened at critical junctures, reseeding the galaxy with viable potential survivors. In the process, they have reconfigured the basic structure of the universe, all in the name of human continuity. Pierce is a newly recruited member of the Stasis, serving out a complex twenty-year apprenticeship while struggling to find his way through the paradoxical maze of history (and unhistory) that surrounds him. As his once simple existence expands and replicates over vast stretches of time, Pierce uncovers a new and unexpected destiny, one that will embroil him in the larger purposes of the Stasis and in the ultimate, unresolved fate of humanity itself. Skillfully merging the threads of an individual life with the grandest, most overarching concerns, Palimpsest offers both visionary brilliance and narrative excitement in equal measure. Powerfully imagined, beautifully constructed, and written throughout with great economy of means, it is the kind of mind-expanding mini-epic that only science fiction and only a master practitioner like Charles Stross could produce.
