of exhibits, oddities, images, and stories by some of the most renowned and bestselling writers and artists in speculative and graphic fiction, including Ted Chiang, Mike Mignola (creator of Hellboy), China Mi é ville, and Michael Moorcock. A spectacularly illustrated anthology of Victorian steampunk devices and the stories behind them, The Thackery T. Lamshead Cabinet of Curiosities is a boldly original,

enthralingly imaginative, and endlessly entertaining entry into a hidden world of weird science and unnatural nature that will appeal equally to fantasy lovers and graphic novel aficionados. Black Road Vol. 1 Melville House Elizabeth Gilbert, author of The Signature of All Things and Eat, Pray, Love “What a cool and fascinating ride. Leigh Ann Henion has tackled one of the great questions of contemporary,

intelligent, adventurous women: Is it possible to be a wife and mother and still explore the world? Her answer seems to be that this is not only possible, but essential. This story shows how. I think it will open doors for many.” Heartfelt and awe-inspiring, Leigh Ann Henion ’ s Phenomenal is a moving tale of physical grandeur and emotional transformation, a journey around the world that ultimately explores the

---

depths of the human heart. A journalist and young mother, Henion combines her own varied experiences as a parent with a panoramic tour of the world ' s most extraordinary natural wonders. Phenomenal begins in hardship: with Henion deeply shaken by the birth of her beloved son, shocked at the adversity a young mother faces with a newborn. The lack of sleep, the shrinking social circle, the health difficulties all collide and force

Henion to ask hard questions about our accepted wisdom on parenting and the lives of women. Convinced that the greatest key to happiness—both her own and that of her family—lies in periodically venturing into the wider world beyond home, Henion sets out on a global trek to rekindle her sense of wonder. Henion ' s quest takes her far afield, but it swiftly teaches her that freedom is its own form

of parenting—one that ultimately allows her to meet her son on his own terms with a visceral understanding of the awe he experiences every day at the fresh new world. Whether standing on the still-burning volcanoes of Hawai ' i or in the fearsome lightning storms of Venezuela, amid the vast animal movements of Tanzania or the elegant butterfly migrations of Mexico, Henion relates a world of sublimity and revelation. Henion ' s

---

spiritual wanderlust puts her in the path of modern-day shamans, reindeer herders, and astrophysicists. She meets laypeople from all over the world, from all walks of life, going to great lengths to chase migrations, auroras, eclipses, and other phenomena. These seekers trust their instincts, follow their passions, shape their days into the lives they most want to lead. And, somewhere along the way,

Leigh Ann Henion becomes one of them. A breathtaking memoir, Phenomenal reveals unforgettable truths about motherhood, spirituality, and the beauty of nature. Oprah.com "Part travel memoir, part parenting manifesto and part inquiry into those 'fleeting, extraordinary glimpses of something that left us groping for rational explanations in the quicksand of all-encompassing wonder.'" LEAP INTO THE FUTURE, AND SHOOT BACK TO THE PAST H. G. Wells's seminal short story "The Time Machine," published in 1895, provided the springboard for modern science fiction's time travel explosion. Responding to their own fascination with the subject, the greatest visionary writers of the twentieth century penned some of their finest stories. Here are eighteen

of the most exciting tales ever told, including "Time's Arrow" In Arthur C. Clarke's classic, two brilliant physicists finally crack the mystery of time travel—with appalling consequences. "Death Ship" Richard Matheson, author of *Somewhere in Time*, unveils a chilling scenario concerning three astronauts who stumble upon the conundrum of past and future. "Yesterday was Monday" If all the world's a stage, Theodore Sturgeon's compelling tale follows the

odyssey of an ordinary joe who winds up backstage. "Rainbird" R.A. Lafferty reflects on what might have been in this brainteaser about an inventor so brilliant that he invents himself right out of existence. "Timetipping" What if everyone time-traveled except you? Jack Dann provides some surprising answers in this literary gem. . . . as well as stories by Poul Anderson • L. Sprague de Camp • Joe Haldeman • John Kessel • Nancy Kress • Henry Kuttner • Ursula

K. Le Guin • Larry Niven • Charles Sheffield • Robert Silverberg • Connie Willis By turns frightening, puzzling, and fantastic, these stories engage us in situations that may one day break free of the bonds of fantasy . . . to enter the realm of the future: our future. Note: "A Sound of Thunder" by Ray Bradbury and "I'm Scared" by Jack Finney are not included in this edition. So You Created a Wormhole MCD From Lovecraft to Borges to Gaiman, a century of intrepid literary experimentation has created a corpus of

dark and strange stories that transcend all known genre boundaries. Together these stories form *The Weird*, and its practitioners include some of the greatest names in twentieth and twenty-first century literature. Exotic and esoteric, *The Weird* plunges you into dark domains and brings you face to face with surreal monstrosities. and only field manual/survival guide to time travel!DON'T LEAVE THIS TIME PERIOD WITHOUT IT! Humans from H. G. Wells to Albert Einstein to Bill & Ted have been fascinated by time travel-some say drawn to it like moths to a flame. But in order to travel safely and effectively, newbie travelers need to know the dos and don'ts. Think of this handy little book as the only thing standing between you and an unimaginably horrible death-or being trapped forever in another time or alternate reality. You get: Essential time travel knowledge:

Choosing the right time machine, from DeLoreans to hot tubs to phone booths-and beyond What to say-and what NOT to say-to your doppelganger Understanding black holes and Stephen Hawking's term "spaghettification" (no, it's not a method of food preparation; yes, it is a horrifically painful way to meet your end) The connection between Einstein's General Theory of Relativity, traversing wormholes and the 88 mph speed requirement The possible consequences of creating a time paradox-including, but not limited to, the implosion of the

universe Survival tips for nearly any sticky time travel situation: How to befriend a dinosaur and subsequently fight other dinosaurs with that dinosaur Instructions to build your very own Rube Goldberg Time Machine Crusading-for fun and profit Tips on battling cowboys, pirates, ninjas, samurai, Nazis, Vikings, robots and space marines How to operate a microwave oven Enjoying the servitude of robots and tips for living underground when they inevitably rise up against us Charmed Spirits Head of Zeus Welcome to the Stasis, the

---

clandestine, near-omnipotent organization that stands at the heart of Charles Stross's Hugo Award-winning novella, *Palimpsest*. By mastering the mysteries of the Timegate, the Stasis has repeatedly steered mankind away from the brink of utter extinction. Through countless millennia, through the "mayfly flickerings" of innumerable transient civilizations, its members have intervened at critical junctions, reseeding the galaxy with viable potential survivors. In the process, they have reconfigured the basic structure of the universe, all in

the name of human continuity. Pierce is a newly recruited member of the Stasis, serving out a complex twenty-year apprenticeship while struggling to find his way through the paradoxical maze of history (and unhistory) that surrounds him. As his once simple existence expands and replicates over vast stretches of time, Pierce uncovers a new and unexpected destiny, one that will embroil him in the larger purposes of the Stasis and in the ultimate, unresolved fate of humanity itself. Skillfully merging the threads of an individual life with the grandest, most overarching

concerns, *Palimpsest* offers both visionary brilliance and narrative excitement in equal measure. Powerfully imagined, beautifully constructed, and written throughout with great economy of means, it is the kind of mind-expanding mini-epic that only science fiction and only a master practitioner like Charles Stross could produce. devastating than he could ever have imagined. includes stories from Douglas Adams, Isaac Asimov, Ray Bradbury, William Gibson, George RR Martin, Ursula K.

Le Guin, Michael Moorcock and, of course, HG Wells. The Big Book of Modern Fantasy Image Comics This thought-provoking collection not only takes us into the past and the future, but also explores what might happen if we attempt to manipulate time to our own advantage. These stories show what happen once you start to meddle with time and the paradoxes that might arise. It also raises questions about whether we understand time, and how we perceive it. Once

we move outside the present day, can we ever return or do we move into an alternate world? What happens if our meddling with Nature leads to time flowing backwards, or slowing down or stopping all together? Or if we get trapped in a constant loop from which we can never escape. Is the past and future immutable or will we ever be able to escape the inevitable? These are just some of the questions that are raised in these challenging, exciting and sometimes amusing
