This book aims to offer a broad history of theatre in Africa. The roots of African theatre are ancient and complex and lie in areas of community festival, seasonal rhythm and religious ritual, as well as in the work of popular entertainers and storytellers. Since the 1950s, in a movement that has paralleled the political emancipation of so much of the continent, there has also grown a theatre that comments back from the colonized world to the world of the colonists and explores its own cultural, political and linguistic identity. *A History of Theatre*

in Africa offers a comprehensive, yet accessible, account of this long and varied chronicle, written by a team of scholars in the field. Chapters include an examination of the concepts of 'history' and 'theatre'; North Africa; Francophone theatre; Anglophone West Africa; East Africa; Southern Africa; Lusophone African theatre; Mauritius and Reunion; and the African diaspora.

What do we mean by 'visual evidence'? How should we interpret visual texts, and what can they tell us? Why is 'visual literacy' so important and what benefits does it offer? Visual evidence encompasses a diverse range of media, from painting, cartoons and photography, to film, television and documentary. The central argument of this book is that visual evidence is a key to understanding both history and the

relegated to a supporting role as merely illustrating the written word. The book shows students, scholars and researchers how to read the visual media to elicit meaning. As primary sources, visual texts can be studied not only for what is directly depicted in the painting or film but also for what it tells us about the people, cultures and societies that made them. Each chapter features fascinating case studies and examples which situate theory in real life. A major appeal of the book is the wealth of illustrations and photographs of visual texts which are included throughout. The authors make detailed reference to these examples to illustrate the theory surrounding visual evidence. An intriguing case study of an unknown girl's photo album is just one of many examples offered, showing how we can analyze and learn from the visual text. This comprehensive and insightful edited collection brings together international media and cultural theorists, historians and art historians to demonstrate the

value of visual evidence not only to media and cultural studies, but also to history, the general humanities and the social sciences.

This edition of Shakespeare's Measure for Measure reprints the Bevington edition of the play accompanied by four sets of thematically arranged primary documents and illustrations designed to facilitate many different approaches to Shakespeare's play and the early modern culture out of which the play emerges. The texts include royal proclamations, speeches, court records, sermons, biographical

writings, prayers, ballads, poetry, excerpts from plays and the Bible, and drawings, woodcuts, and engravings. These documents contextualize the role of rulers and government in Jacobean society, crime and punishment in London's underworld, the religious and secular laws that regulated marriage and sexuality, Catholic and Puritan morality, and the religious and cultural significance of chastity and virginity in Shakespeare's time. Editorial features designed to help students read the play in light of the historical documents include an intelligent and engaging general introduction, introductions to each thematic group of documents, thorough headnotes and glosses for the primary documents (presented in modern spelling), and an

extensive bibliography.

Over the course of the twentieth and twenty-first centuries, Mexican American and African American cultural productions have seen a proliferation of upward mobility narratives: plotlines that describe desires for financial solvency, middle-class status, and social incorporation. Yet the terms "middle class" and "upward mobility"—often associated with assimilation, selling out, or political conservatism—can hold negative connotations in literary and cultural studies. Surveying literature, film, and television from the 1940s to the 2000s, Elda María Román brings forth these narratives, untangling how they present the intertwined effects of capitalism and white supremacy. *Race and Upward Mobility* examines how class and ethnicity serve as forms of currency in American literature, affording people of color material and symbolic wages

as they traverse class divisions. Identifying four recurring character types—status seekers, conflicted artists, mediators, and gatekeepers—that appear across genres, Román traces how each models a distinct strategy for negotiating race and class. Her comparative analysis sheds light on the overlaps and misalignments, the shared narrative strategies, and the historical trajectories of Mexican American and African American texts, bringing both groups' works into sharper relief. Her study advances both a new approach to ethnic literary studies and a more nuanced understanding of the class-based complexities of racial identity.
